POLICE COURT.

(Oakville Record)

Edmund Connelly, originally of Orangeville, was sentenced on Saturday morning to sixty days, by Police Magistrate Shields. Connelly was arrested on Friday night and charged with drunken and disorderly conduct. Canned heat was the cause of his downfall.

A fine of $10 and costs was imposed by Police Magistrate Shields in the Oakville court on Monday afternoon on Wm. Hoffman, of Listowel, Perth county, charged with reckless and negligent driving. Evidence was produced to the effect that on the evening of July 30th, the defendant had, while crossing the Chisholm Street intersection on the Toronto-Hamilton Highway at an unlawful rate of speed, struck from his bicycle and caused serious injury to one David Richardson, of Oakville. T. A. Hutchinson, of Milton, represented the Crown, and R. G. MacFarlane, of Listowel, acted for the defendant.

Refreshment Stands Robbed.

The Davenport Brothers' refreshment stand, Trafalgar, on the Dundas highway, was broken into and relieved of goods valued at an excess of $75.00, last Friday night. The theft was not discovered till morning. Thieves broke into and looted Hishon Brothers' refreshment stand, situated on the Lakeshore west, early Friday morning, of goods valued at $50. The first intimation of the robbery was given when the burglary alarm went off shortly after one o'clock. Mr. Hishon gave chase and fired on two figures who were seen breaking for cover, but was unsuccessful in either catching or identifying the thieves. Last night (Wednesday) burglars again rifled the contents of the stand and relieved it of goods valued at about $25.—Oakville Record.

Later—The booth of T. Cort, near the Sixteen bridge, was entered on Saturday night and the robbery amounted to $200.

CANADA'S TELEPHONE LIST.

Is Second Only to the United States Per Hundred Persons.

Over the 16,072,758 telephones in the United States—one for every seven persons in the country—an average of 191 conversations per person are carried on in a single year, according to the fiftieth anniversary compilation of telephone statistics issued by the New York Telephone Company. Sixty-two per cent. of the world's telephones are to be found in the United States—or ten times as many telephones in proportion to population as are possessed by the rest of the world.

The United States, the report continues, had 14.2 telephones for every hundred people; Canada had 11.6; Denmark, 9; New Zealand, 8.7; Sweden, 6.9; and Norway, 6.1. In Germany there were but 3.9 per 100 inhabitants; in Great Britain and Northern Ireland, 2.8, and in France, 1.7. The telephone systems in those three countries were under Government ownership and operation.

Communities of less than 100,000 people in the United States were served by 11.6 telephones per 100 persons. The larger European countries were far behind in this respect, with farmers' telephone lines almost unknown. British and French development was concentrated in the larger cities.
