NOT THE SAME PERSON AT ALL

'Fruit-a-tives" Stopped Pain and Terrible Dizziness

Mme. GODIN

It seems almost a miracle—the way "Fruit-a-tives" benefits women suffering at the change of life. "I was obliged to go to bed because of the terrible dizziness, pain and weakness," writes Mme Onesime Godin of Pepperville, N.B. "During this trying time 'Fruit-a-tives' proved a godsend to me, and now I am in perfect health. Every woman should follow my example and take 'Fruit-a-tives,' and they would surely get the wonderful relief that I did." 'Fruit-a-tives' has this wonderful fruit medicine 25c and 50c a box.

Here and There

(144)

An effort is being made to establish an airport at Banff. Alberta Government officials have inspected a site near the present golf links and the prospect that a field will be prepared within the next year is bright.

A further supply of airplanes and airplane parts arrived in Montreal recently when the Canadian Pacific freighter "Beaverford" brought two De Haviland Moth planes, one case of wings and two cases of spare parts.

A call for tenders for a large elevator with a capacity of 1,500,000 bushels has been sent out by the Saint John Harbor Commission. The new structure is to be erected on the Colwell Fuel Company's site in West Saint John, the work of construction to be got under way as soon as possible.

A Cadillac sedan equipped with rubber insulated steel flanged wheels has been specially equipped by the Angus Shops of the Canadian Pacific Railway at Montreal for the use of the engineering department of that company on inspection trips. The machine has an extra braking system operated by the steering wheel and can make as great a speed on the rails as it can on the highway. Over seventy miles an hour was made on a trial run.

A big black bear tried to stop a Canadian Pacific freight train the other day near Arndale station in Northern Frontenac county in Ontario, and when the encounter was over there was not enough of the bear left to make a pair of mitts. Bruin evidently wandered on to the tracks during the night and was blinded by the glare of the headlight. Black bear are found throughout Eastern Canada but are not often seen, except during the berry season, as they are night prowlers.

Addressing the Board of Trade of Vancouver, recently, E. W. Beatty, Chairman and President of the Canadian Pacific Railway, stated that present prosperity in Canada is clearly indicated by four main factors: Record of railway earnings (showing the volume of business), employment returns, reports of financial houses, and building construction. These indices were of special value he remarked because of the wide range of activities which they reflect. The gross earnings of the company, he added, had been greatly decreased, however, by reduced freight rates.

A unique piece of railway equipment, a dynamometer car, has been constructed by the Angus Shops for the Canadian Pacific Railway. The apparatus is intended to test the efficiency of locomotives at various speeds and is placed between the tender and the train during operation. The forces exerted on the coupler of the car are transmitted hydraulically to an instrument known as a chronograph, which records upon a moving band of paper. It is stronger by far than any of its predecessors and is said to be the finest car of its kind on the continent. One of its first duties will be testing of the new "3100" passenger locomotive of the C.P.R. the largest engine in the British Empire.

Goes to Reformatory

Oakville, Oct. 2.—Charged with having unlawfully retained money to the extent of $7.40 from his employer, Dr. J. B. Brown, of the Gulleen Dairy, Alex. Rae, of Oakville, was sentenced to one year in the Ontario Reformatory by Police Magistrate W. F. McIlveen to-day. Crown Attorney W. J. Dick conducted the prosecution.

COULD NOT WORK FOR MONTHS

Restored to Health by Lydia E. Pinkham's Vegetable Compound

Port Elgin, N. B. "For three months, I was nervous and weak with tired feelings and could not do my work. A friend advised me to take Lydia E. Pinkham's Vegetable Compound and I have got good results from it and recommend it to others."—LILA TAYLOR, Port Elgin, N.B.

This dependable medicine is sold by druggists everywhere.

MOTHERHOOD OF THE SEA.

Furnishes Rain, Regulates Winds, and Tempers Seasons.

What a prodigious fact is the ocean! It is three times as spacious as all the continents together. But the ocean has a powerful appeal to our imagination beyond its mere breadth and depth—the motherhood of the sea is impressive. Day by day she furnishes the rain, regulates the winds, and tempers the seasons in order to make the continents inhabitable, writes Ernest Ingersoll in the Montreal Family Herald and Weekly Star. In her bosom originated life, and thence she shared it with the land, nevertheless, with all her liberality, the parental sea is the prime conservator. You may find to day beneath her secret waves, living examples of animal forms just like those recorded as fossils in the very oldest leaves of her rock records.

Dip a bucket of water from the North Sea and your microscope will discover in it the very same sort of animalculae as those whose tests casten in the white cliffs alone its English shore affirmed that the pelt chalk was once the bottom of the ancient Sea—many millions of years ago.

Drop a bucket into the sea and you will get living microbes and tiny shells in a form unchanged since long before the time of the chalk. Such facts force on our minds the stability that order is and mobility. It is impossible in a world made like ours that the ocean should remain quiet. A tideless sea is unthinkable, yet with all its excess movement its waters and tides remain virtually [illegible]
