SCARLET FEVER ANTITOXIN

During the past few years there was discovered a scarlet fever antitoxin which gives the same satisfactory results in the treatment of scarlet fever as has been secured in the treatment of diphtheria with diphtheria antitoxin.

Scarlet fever is caused by a certain disease germ which giyes off a poison or toxin It is this toxin, which in some cases, kills, and which in all cases do more or less damage to the various organs of the body.

The scarlet fever antitoxin counteracts the toxin. Given early and in sufficient quantity, it not only cures but prevents the damage which may be so serious.

Those who are responsible for the care of children should appreciate that the life of the child, when attacked by sickness, may depend upon prompt treatment. Certainly in two diseases, scarlet fever and diphtheria, every hour's delay endangers the life of the child.

In Canada there were 362 deaths from scarlet fever during 1926. This loss of human life is, of course, serious. In addition, there is a much larger number, some of whom are more or less permanently damaged.

Scarlet fever antitoxin, like diphtheria antitoxin, should be made freely and readily available throughout Canada for the saving and conserving of human life.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

The Council adjourned.

Some of our readers are asking who was the man, with wife and young boy, who was too sick to be allowed to see the baseball game at Dundalk on the 24th of May. If the ice cream was the cause of the trouble the matter should be reported to the Department of Health. We are glad to learn that the persons in charge were generous enough to refund the money for admission to the grounds.—Markdale Standard.
