Cut Sow Thistle NOW

A little attention immediately to cutting Sow Thistle will prevent millions of seeds being scattered over your farm and your neighbor's farm.

Sow Thistle is one of the most pernicious weeds in the province. It has been on the increase. Further increase means loss of hundreds of thousands of dollars. Get it under control now before it gets your farm under control.

John S. Martin, Minister of Agriculture

T. Stewart Cooper, Agricultural Rep.

Markdale Leading Baseball League

Markdale made their fourth win of the season with only one defeat when they defeated the Kimberley team on Wednesday on the Markdale diamond 8 runs to 5. The game was interesting all the way through, with Markdale scoring most of their runs in the fourth inning when four men tallied before the side was retired. Alonzo Smith came into pitch in the fifth inning for Kimberley and Markdale was held to only one run after that. Hand pitched the whole game for Markdale and did very well.

Score by innings:

Kimberley — 0 1 2 1 0 1 0 0 0—5
Markdale — 2 0 1 4 0 0 1 0 x—8

The players were:

Kimberley — Myles, H. Cornfield, R. Stafford, E. Dillon, Fred Ellis, C. Fawcett, R. Ellis, W. Gilbert, E. Ellis, and A. Smith, spare.

Markdale — H. Bowler, Freeman, H. Beard, Hand, Mercer, Dundas, G. Beaton, Graham, White.

Umpires—Thurston and Turney.

Flesherton —	1	3	.250

Markdale 8, Kimberley 5

GAMES THIS WEEK

Thursday—Flesherton at Kimberley at 3 p.m.

Centre Grey Softball

We understand that Jim Hand of Markdale has received a move from the bank and will leave shortly. It will be a hard blow to the Markdale team as Hand is a first class player and could play any position. No doubt it will weaken the Markdale team considerably if he goes, but even at that they will put up a good scrap for the Centre Grey League trophy.

STANDING OF TEAMS

	Won	Lost
Maxwell	8	0
Rock Mills	5	3
Flesherton No. 1	5	3
Victoria Corners	3	4
Onwards	3	4
Kimberley	3	5
Flesherton No. 2	3	5
Vandeleur	0	4

It is generally conceded that Maxwell will lead the league this year, but it looks like a real fight for second place, for the privilige of playing off with the leaders for the winning of the league race. There has been some good contests for the prizes this month. Following are the winners for July:- Home Runs, Men F. Oliver, 3-base hits—W. Kerton, 2-base hits, a three cornered tie between F. Batchelor, Gallagher and E. Lyons Lady's 3-base hits, Mrs. Jno. Brackenbury; Ladies 2-base hits, Mrs. Allie McLean. Lady making most home runs during July, tie between Mrs. Allie McLean and Miss Millie Ferris. Only games where players were playing with their regular team was ther score counted for these prizes. On Wednesday night of this week the Onwards and Rock Mills will play their second game and on Saturday night Flesherton No. 1 and Victoria Coroners will again hook up. Prizes to be competed for this month will be announced next week.

Picnic at Owen Sound

The annual gathering of the Bentham-Wilcock connections was held on Friday afternoon last in Harrison's Park, Owen Sound, when about one hundred and fifty were in attendance. The afternoon was ideal and the outing was much enjoyed by all. Those present were from Singhampton, Toronto, and Mr. and Mrs. Robt. Wilcock and two children of Buffalo, N.Y., Mrs. Naizer of Mayville, N.Y., Mr. and Mrs. Thos. Wilcock and Russel Mr. and Mrs. Jim Wilson and two daughters, and Mrs. Essex and Jim of Regina.

Does Liming Pay?

(Experimental Farm Notes)

Lime is not a fertilizer, and increases fertility only indirectly as it renders conditions favorable for the action of plant food, and also as it stimulates bacterial action, which in turn acts on the organic matter in the soil, and breaks it up into a form available for plant food. Lime al so improves the texture of the soil by flocculation of the soil particles. Its greatest value however, lies in its capacity to correct soil acidity. Many crops will not grow on acid soils. This is true of most of our common farm crops, but is particularly apparent in connection with nitrogen, their place in the crop rotation is doubly important.

Lime to be used in correcting soil acidity, is put on the market in many different forms. It has been determined that material applied in the form of finely ground limestone is the most desirable and economical. The rate of application varies with the degree of acidity in the soil.

In order to determine the actual increase in crop yields due to the application of ground limestone, a project has been under way at the Dominion Experimenal Farms for 5 wears. Ground limestone is put on one set of plots at the rate of 2 tons an arce, just before seeding the oat crop, in a rotation of corn, oats, clover, timothy. Manure is applied to the land previous to ploughing for corn at the rate of sixteen tons per acre. Another set of plots are treated in the same way in every respect, except that limestone is not applied. This experiment is carried on in duplicate, and accurate records have been kept in connection therewith, for the five year period.

In every instance there has been a decided increase in the yield on the plots treated with lime. Corn has given a five year average increase in yield of 2.37 tons per acre. The yield of the oats has been 12.2 bushels per acre higher on the limed plot.

The increase in yield of clover is 0.54 of a ton, while timothy has yielded 0.68 of a ton more per acre. The increase in the value of crops on the limed plots after deducting the cost of the lime, has been as follows: corn $4.14, oats $5.58, clover $2.71, timothy $3.81. These values are figured from the average market price for these crops, over the five year period. Such results prove quite conclusively, that the application of lime is a very important factor in obtaining high yields.

It has also been proven that lime may be applied with very beneficial results on old pasture land. In many instances are carrying capacity of such pastures has been increased by an application to two tons of ground limestone. In answer to our title, it might be said that liming certainly does pay in the Eastern Townships, or any section where an acid condition of the soil exists.

P. O. RIPLEY,
Dominion Experimental Station
Lennoxville, P. Q.

SIX HILL STORES

We buy together in order that our customers in the six communities may materially benefit individually.

F. T. HILL & CO., Ltd.

Markdale, Ontario
