VICTORIA CORNERS

Winter seems to be here in earnest. Wheeling and sleighing are very good. Cars run, but sometimes take to the ditch, but no real damage has been done yet. Snow falls quietly, but incessantly.

George Best is in Toronto attending the winter fair.

Robt. Ludlow was home from Brampton over the week end.

Ren Acheson secured a position in Toronto.

BOX SOCIAL

A box social and dance will be held in the Orange Hall, Orange Valley, on Friday, December 7th, under the auspices of L.O.L. 509. Admission 25c., ladies with boxes free. Program to be provided.

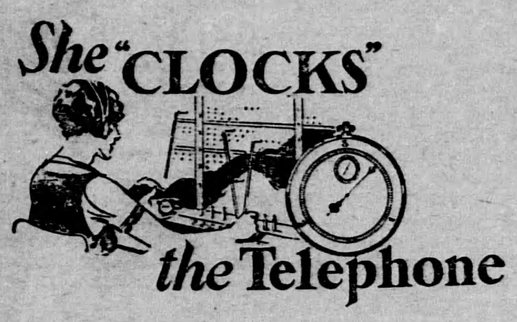
Priceville W.M.S.

The monthly meeting of the W. M. S. of St. Columba Church, Priceville, was held at the home of Mrs. Sam MacDermid. The meeting opened by singing a hymn with Mrs. Allie Muir presiding; Mrs. Lauchie MacArthru read the scripture and Mrs. F. McKinnon led in prayer.

After the minutes and other business, the Treasurer gave an encouraging report. Another hymn was sung and Mrs. Muir gave a very interesting talk on the Jerusalem Conference. The Watch Tower on the same subject was read by Anna Shortreed. Mrs. D. G. MacLean read a very interesting paper on the mission in Toulon. Another hymn was sung and all repeated the Lord's Prayer. A dainty lunch was then served by Mrs. MacDermid, assisted by A. Shortreed and Mrs. McKinnon.



THIS YOUNG LADY'S JOB is to "clock" the telephone service. She sits there with her decimeter stop watch and measures to tenths of a second the time taken to complete a call. Other "clockers" record the errors made, the speed with which "trouble" is repaired, all the items of telephone efficiency.

If speed and efficiency are not constantly on the climb these are the people who know it first and then there is a grand hunt to find out what's gone wrong.

It is a good game. It gets results. That is why your telephone serves you better this year than it did last year, and next year will serve you better than now. That is why it has contributed its share to Canadian progress.

FOR EXAMPLE, seven years ago the average interval from the time you lifted your telephone receiver until the operator answered was 5.1 seconds. Today the clocker finds the interval cut to 3.7 seconds. Tomorrow it will be still less.

Seven years ago there were 95 slow calls in every 1,000—a slow call being one in which the operator takes ten seconds or more to answer. Today there are only 33 in every thousand.

The number of errors of all kinds has been reduced from 40 in every 1,000 calls to 16, which is over ninety-eight per cent perfect.

FIVE YEARS AGO you ran 27 chances in every 1,000 calls of getting the wrong number. That is down now to 13 chances in 1,000, or nearly 99 times out of the 100 right.

There are only two chances in a thousand now that you will be cut off. There were five chances in a thousand, five years ago.

There used to be eight times in a thousand calls when you would break in on somebody else's conversation. Now there are only two such double connections per thousand.

THERE ARE "CLOCKERS" at work in other directions too and here are some of the things they have recorded.

The time taken to repair "trouble" on a line now has been cut to one-third of the time taken five years ago.

The time taken to install a new telephone used to be three hours and forty-five minutes. It has been cut now to one hour and forty-five minutes. That means something in hours saved, with 139,000 telephones installed in Ontario and Quebec this year.

PRETTY GOOD results. But the clocker isn't satisfied. Nobody in the telephone business is ever satisfied with today's mark. The system tomorrow must always be better to keep pace with the Canada of tomorrow.

Published by The Bell Telephone Company of Canada to tell you something about the telephone business and the people in it.
