What Are Your Brains Worth?

In normal times and under normal conditions, the average uneducated working girl earns $400.00 a year. The average educated girl, finished with the proper training, earns $1200 a year.

Considering then that the average business woman has a career of seven years, she has increased her earning capacity to the extent of $5600 at least. This is not counting interest on the surplus.

When you consider that our average student completes a Secretarial Course in 150 days actual attendance she receives a cash dividend of $40 per day, every day she has spent in school.

These might not be exact figures, but we believe that every day a student has spent in Our College will pay her a dividend of at least $40 per day. Worth making a sacrifice for, isn't it? And the sacrifice once made will not have to be made again, because the income will grow bigger every day from that time on.

Gladys Torrence of Orangeville completed her Secretarial Course in 111 days actual attendance and received a lucrative position in Toronto. Luella Johnston of Orangeville, after a short course with us, increased her earning capacity by 300 per cent.

Apply the above figures to a young man, and consider that the average educated working man earns $2000 per annum, with a business career of at least 40 years. He has increased his earning capacity to the extent of $50,000. Without such training, a young man or woman has little chance to compete with those who have.

If you are afraid of your own ability, you do not even need to take a chance on yourself. If you can show us that you have a fair high school education, and will give us your unqualified attention, we

GUARANTEE

that you will be successful and we will see you in a nice position in a few months' time.

WHICH WILL PAY

the price of success, or the penalty of failure? If the former write the Weller Business College, Orangeville, or phone 295. Winter term opens January 2, 1929.

Portlaw Resident's Serious Accident

Mr. Thomas Taylor was the victim of a very distressing accident on Thursday la tswhich nearly cost him his life, and from which he is yet in a critical condition. He was using his sheep shears working with his flock when by some means he fell on the sharp point of the shears, which entered the lower part of the left lung and coming out behind the shoulder. Mrs. Taylor was near him at the time and as soon as she could leave her prosterated husband went to the house nd called their son, who lives opposite their home, and together they removed the injured man to the house. Dr. Carter was soon in attendance. He found that there was considerable internal hemorrhage from which there was danger of infection and other complications were liable to arise. We are all glad to hear, however, that the crucial point seems to have passed and the patient is doing as well as might be expected.

We await daily with anxious hearts the news of the condition of our sick sovereign, King George; and the oft-repeated prayer becomes more the language of our herts as it devoutly ascends "God Save Our King.
