Ayer's Cherry Pectoral,
For the Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma, and Consumption.
Scarcely never before in the whole history of Medicine has anything won so widely and so deeply the confidence of mankind, as this excellent remedy for pulmonary complaints. Through a long series of years, and among most of the races of this mixed people, it has been its lot to rise higher and higher in their estimation as it has become better known. Its uniform power and power to cure the various affections of the lungs and throat, have made it known as a reliable protector against them. While adapted to all forms of disease and to young children, it is at the same time the most effectual remedy that can be given for incipient consumption, and the diseases of the throat and lungs. As a protection against sudden attacks of Croup, it should be on hand in every family, and indeed as all are sometimes subject to colds and coughs, all should be provided with this antidote for them.
Though settled Consumption is thought incurable, still great numbers of cases where the disease was not settled, have been completely cured, the patient restored to sound health by the use of Cherry Pectoral. So complete is its mastery over disorders of the Lungs and Throat, that the obstinate of them yield to it. When notoriety could reach them, under the Cherry Pectoral they subside and disappear.
Singers and Public Speakers find great protection in it.
Asthma is generally cured by taking the Cherry Pectoral in small and frequent doses.
Generally are its virtues known that we need only publish the certificates of them here, or do more than assure the public that its qualities are fully sustained.
PREPARED BY
DR. J. C. AYER & CO.,
Practical and Analytical Chemists,
LOWELL, MASS.
Sold by all druggists everywhere.
Ottawa, August 7, 1869.
