FEED FOR STOCK.

The winter is the time that tries stock, for while for some months, they have been feeding on juicy grasses, now they are compelled to confine their attention n the change in their condition, and in

to dry hay or straw. The effect is seen cows in the diminished flow of milk. It has long been a problem how to get over this difficulty. Hay, to be properly cured, has to be dried, and although it was telt to be very desirable to have green fodder it was considered to be impossible of accomplishment. A new plan, however, is being tried with some success on the her side, which promises under certain ons, to give us green fodder for our tock, even in the midst of winter. The chefies of such a thing are easily seen, can be done. The process is simply can-The anniversary of the Bible Christian ning on a large scale. Fodder is cut green, clover, green corn, grain of any kind, etc., being used. After cutting, it is brought to the barn where a cutting machine is put into operation, and whole The salaries paid in the Uxbridge High loads of the green material are cut up Schools amounts to \$2,270. In the public into pieces about an inch in length. Those pieces are then put into a pit, salt Miss Palmer has resigned her position being strewn over it at proper intervals, and the whole packed tight, and when full the top sealed so as to exclude the

of the collections made in aid of the victims air. After twenty-four hours, perhaps thirty-six, the pit is opened and the fod-The anniversary of the Christian Church | der will be found to have settled, when Sunday School, Oshawa, will be held on fresh material must be put in and tramped down. This must be repeated at intervals, until the pit is full, when the whole is securely sealed. This is done by putting a cover over the small apartheld in the Bible Christian Church, Port ure left for putting in the material and piling on earth to the level of the ground above. Those who have tried the plan, say that the pits should be deep, say not less than 15 feet, 20 being better as its depth gives better packing facilities. Those who have tried this method of preserving green fodder, speak in the highest terms of its excellence. To be sure the preparation of the pits would require trouble and cost, but there seems no reason to doubt that the benefit ultimately would well repay the outlay. To those An entertainment under the auspices of the Harmony Union Sabbath School, will the advantages, as cows with such feed be held on Monday evening, December should give as much milk as they would in summer on grass. Another is, that by this means, much more stock could be ing, returned home last week with seven kept owing to the large quantity of food possible to be provided. The advantage A movement is on foot to secure Mr. to be derived from such a method, if the material can be properly saved, and there seems no reason to doubt that it can, are so many and so obvious as to need no
