## No Time To Stop Spending

Some people have the idea that because there is a war on in Europe, that they should refrain from spending money for anything other than the absolute necessities of life, which in our opinion is not the proper attitude to take.

We would suggest that every man, woman and child in Canada proceed along normal lines, and not become sceptical about spending money, for it is generally realized that if the purse strings are tightened to an extreme degree, business will not only suffer, but labor as well is bound to suffer.

The saying, "It's money that makes the world go round," holds as true to-day as at any time in our history, and perhaps more so. To those who have been planning on making purchases of various kinds, we would advise them to do so, and thus keep our Canadian dollars moving.

And while we are suggesting that everyone "carry on" as usual as far as spending is concerned, we might also point out that it is the duty of everyone to contribute as generously as their finances will permit, to the various war service funds, in order that our soldiers at the front may enjoy a few extras while fighting for their country, the British Empire and the freedom of all Christian people.
