F. W. DUNCAN
Flesherton

The time for the pruning of your apple orchard is in the spring before the growth starts, but if this is impossible it may be done immedately after the trees leaf out. It is desirable to have the wounds, if large, heal as rapidly as possible to prevent decay. When pruning is done in the autumn or early winter the wood is likely to dry out and split.

Ottawa Happenings

Ottawa, Monday March 17th 1930

Divorce and still more divorce has been our bill of fare for last week. On Tuesday March 11th Mr. Woodsworth's bill which had for its object the providing of a Divorce Court for Ontario was voted on almost without debate. When the vote was counted it was declared, yeas 78, nays 78. The speaker cast his vote against the bill. But upon a recount more slowly made it was found that a mistake had been made and the vote stood yeas 78, nays 79, so that it was defeated without the speaker's casting vote. I was very sorry not to be in the house when the vote was called. There is some chance, however, that it will be reinstated on the order paper and that we will have a second chance.

I feel that a Divorce Court could deal with the problem much more efficiently than parliament can. A provision would be made for the children, which is not now the case and I cannot see that having a court to deal with divorce would cause any increase in the number seeking divorce.

On Thursday, March 13th Mr. Bourassa moved the second reading of bill no 7 to amend the Marriage & Divorce Act. He made a long and eloquent speech which left the House completely in the dark as to the import of the bill. Thanks to the clear reasoning of Mr. J. T. Thorson, Winnepeg South Centre, the real purpose of the bill was disclosed to the house.

Until 1926 in the four western provinces the law in respect to divorce was an inheritance that came to them on their entry into confederation, and it was the law governing England on this subject in 1857 and by it divorce was much more difficult for women than for men. In addition to the usual ground for divorce the women had to prove physical or mental cruelty. In the legal sense of the world cruelty, mental cruelty, really was insanity resulting from cruel treatment, and physical cruelty impaired health resulting from cruelty. Both left the woman in a position where it was impossible or almost impossible to have a divorce granted.

Because of the splendid work done by Joe Shawthen member for Calgary the House passed a law which put men and women on equal footing in regard to divorce. The purpose of Mr. Bourassa's bill was to disallow the Act and put women of the four provinces in the position they had been previous to 1926. Strangely enough the Honorable Ernest Lapointe supported Mr. Bourassa. The House rejected the bill by a heavy majority yeas 56 nays 114.

The resolutions asking for a Dominion Highway across Canada, for further grants to technical education and for the setting up of a special committee to deal with the estimates of the different departments were quite fully discussed. The first two were defeated, the last one talked out.

The heavy artillery came into play on Friday when the Prime Minister introduced his bill asking that clearance papers to vessels carrying liquor destined for a country into which the entrance of liquor had been prohibited by law, be refused. Mr Bennett very cleverly showed that the government had changed its sition in regard to giving clear- Euler stated the government's position in regard to giving clearances. But the end is not yet. It s said in the corridor that the Prime Minister will dissolve the House and go to the country if his bill is defeated. It is likely to carry in the Commons. Whether it will pass through the Senate is the question.

PORTLAW

News was received last week by relatives here of the serious illness of Mrs. Thos. Black, Orangeville, who with her husband and family, removed from this part something more than a year ago. Her sisters, Mrs. James Linton and Mrs. Wallace Fisher, and brother, Mr. Wm. Russell, were down to see her a few days ago. All are hoping for better news of her condition.

The little son of Mr. and Mrs. Frank Shier, who has been ill for some weeks, part of the time being spent in Owen Sound hospital, is not recovering as fast as hoped for.

The home of Mr and Mrs. Lawrence Lyons has been brightened by the arrival of a little girl. Congratulations are extended.

Congratulations to Mr. and Mrs. Thomas Blakey, whose family has been increased by another boy.

Miss Reta Linton left last week to visit at the home of her brother, Russell, in Toronto.

We understand that Mr. L. H. Sheardown has leased the Karstedt farm on the fourth line and will operate it in connection with the home farm.

MUST BE WELL DRAINED

The ideal soil for apples seems to be a deep well-drained sandy loam or a light clay loam with good moisture holding capacity and a moderately pervious subsoil. It has been shown also, that apple trees will grow on so-called poor soils and will give good results if properly managed. Soil drainage, however, is an important factor in relation to tree growth and productiveness. Fruit trees require a good range for root development and this desirable condition does not obtain on poorly drained soil. It is thus seen that for permanent and profitable results the soil for apples and other fruit trees as well should be deeply and thoroughly drained by natural or artificial means.

AN IMPORTANT DISCOVERY

Ontario farmers will probably be saved many thousands of dollars by a discovery made by Dr. G. Stevenson of O. A. C., stated the Hon. John S. Martin to the agricultural committee of the legislature recently. Dr. Stephenson has found that a certain condition of pigs and sheep making them unfit for marketing has been caused by worms. This is an entirely new angle and an important discovery from the farmer's standpoint. "The condition tions are general across the province," said Hon. Mr. Martin. "There have been large numbers of sheep and pigs that weren't fit for the market and the farmers didn't know what was the matter with them. Dr. Stephenson has found that these animals are filled with worms. If not checked, this condition will go right through the farm yards and affect the chickens and other poultry and animals. Tests and experiments are being made to cure this condition of worms."

Small Advts.
