Miss Margaret Gun, Teacher, M.M.M.

GREAT DEMAND FOR CHICKENS.

The present time is most favorable for the production, fattening and marketing of farm chickens. There has been such a substantial increase in the consumption of chickens and eggs within the last few years that it is not possible to rear a greater number of suitable market chickens than can be sold with profit. Last year there were not sufficient chickens sold in Canada to supply the home markets. As a result of the shortage of chickens the trade with Great Britain was lessened. This is unfortunate on account of the great demand for Canadian chickens in Great Britain and the good prices that are paid.

The Chief of the Poultry Division, Mr F C Hare states that numerous letters have been received from produce merchants, poulterers and commission merchants who desire to learn in what localities chickens can be bought in great numbers and at reasonable prices From several Canadian cities, and especially from Montreal, produce firms have asked to be informed where market chickens suitable for shipping to Great Britian could be obtained in the greatest numbers. British poulterers and commission merchants have repeatedly asked for the same information. The letter of a well established produce house in London, England, was received last week. This firm wished to "start an undertaking for the purpose of importing Canadian poultry to Great Britain." They desired information as to the probable success of such a project and the possibility of obtaining poultry, (especially fowls), in large quantities, and the best districts for the collection, &c, of them. Last fall a firm in Cape Colony wished a poultry trade developed with that Colony. One shipment of Canadian chickens was made to Cape Colony which arrived in a satisfactory condition and pleased the trade. A New York firm wrote that they desired to import Canadian chickens and were recommended by the Department to a firm in the Maritime Provinces, from whom they purchased chickens and were impressed favorably by them.

The above and similar requests are difficult of solution even by one in touch with the Canadian produce firms and packing houses that are buying and marketing chickens. The majority of our established firms are equipped with a complete plant for marketing in Canada or Great Britain several times more chickens than they can buy. Their profits are dimished, through scarcity of chickens. Nevertheless merchants in Great Britain, Cape Colony the United States and even in Australia are looking to a supply of Canadian chickens to satisfy their growing trade.

The problem of supplying this wonderfully increased demand for chickens can be solved by the farmers alone. Instead of the farmer rearing fifty or a hundred chickens that receive little attention or feed, he should rear from 200 to 1000 chickens annually. These should be of a utility type, such as can be found in the popular breeds Plymouth Rocks and Wyandottes. The chickens should be hatched and reared by incubators and brooders, and when ready for market the cockerels should be placed in fattening crates and fatted. The equipment required to do this work is not an expensive one; $200 to $250 is the cost of incubators, brooders, houses and fattening crates for finishing 1000 chickens. It is as necessary for realizing the greatest profits from the poultry business as threshing and mowing machinery is for general farming. The work connected with finishing 1000 chickens with the proper appliances is no more than is necessary for rearing 200 chickens by the natural means. Poultry farming is a business that requires to be developed in the same manner as the butter, cheese and fruit branches. A substantial profit can be made from the poultry business, when it is carried on as an adjunct to farming, and with the same careful attention and financing.

The Dominion Department of Agriculture is endeavoring to increase the poultry trade of Canada; to encourage the growing of the greatest number of high class chickens, and to assist in the marketing of them. A revised edition of the bulletin "Profitable Poultry Farming" has just been issued, and will be mailed without charge on application to the Commissioner of Agriculture and Dairying, Ottawa. The information it contains is of great value in the poultry work, and it should be in the hands of every interested poultryman in Canada.

WESTERN FAIR, LONDON.

Canada's Premier Exhibition Wil Show the Country's Unexampled Growth.

The combined victories of peace and commerce in this third year of the new century are destined to illumine the brightest pages of Canadian history. Prosperity is abroad in all the land, from acres vast and plentiful, and from mining fields both east and west comes the harmony of buoyant progress. To few will be granted the inspiration of witnessing the activity in the east, the west, the north and the south but to all is open the opportunity of seeing the sum total of Canada's current development summarized and represented in the great Western Fair to be held at London, September 11th to 19th. Do not be the one to miss it.

The footsteps of the exhibition management never did lag. No sooner were the gates closed upon the last fair than the Directors commenced broad liberal planing for this season's show. Splendid features of unique interest have been thought out and beneficial ideas devised for rendering the exhibits of the man building and other departments even more alluring than ever before. The Art Gallery will be particularly attractive and the competition in the different classes unusually keen.

Details are being perfected for displays of machinery and agricultural implements that cannot fail to illustrate the latest creations of inventive genius as applied to farm cultivation. Manufacturers on this and the other side of the line will be present to demonstrate the merits of their respective machines, and when it is said that the Live Stock Department seems bound to excel last year's success no further words are needed. Farmers and breeders interested in thorough bred animals cannot afford to neglect this all important part of the Western Fair.

The list of special attractions has not been completed as yet but those already selected augur well for the continued triumph of the ring and platform events.

Watch for the readers and advertisements to appear in this paper later on and remember that the Western of 1903 will out shine all its glorious predecessors. Prize Lists and all information may be had for the asking.

A REVERIE.

It is easy enough to be pleasant
When life flows by like a song,
But the man worth while is the one who will smile,
When everything goes wrong.
For the test of the heart is trouble,
And it always comes with the years,
And the smile that is worth the praises of earth
Is the smile that shines through tears.
—Ella Wheeler Wilcox.

Live Stock Markets Toronto.

Trade was dull at the Western Cattle Market to-day. There was very little demand for cattle of any kind and the total receipts were light. Trade in sheep was better on a good demand.

Export Cattle—The highest price paid was $5 per cwt and extra choice cattle ranged from this price down to $4.80. The general run of choice sold at $4.40 to 4.60, and cows were about steady at $2 60 to $3.80.

Butchers' Cattle—Few were wanted, and fortunately, few were offering. Picked lots sold at $4.60 to $4.75 per cwt and choice at about $4.40 to $4.60. Fair to good sold at $4 to $4 30, and cows at $2.50 to $3.50.

Stockers and Feeders—Cattle of 700 to 900 lbs run at $3.50 to $3 80, and lighter at $2.75 to $3.50. Feeders have an easier tendency at $2.75 to $4.30.

Milch Cows—The run was light and trade was rather quiet. The range of prices paid was tending higher at $26 to $56 each.

Calves—The run was fair and trade was good, everything being sold. Prices are unchanged at $2 to $10 each and 3½c to 5c per lb.

Sheep and Lambs—The run was fairly light and everything was sold early. Prices all round are unchanged. Export sheep are quoted at $2 50 to $3.70, culls at $2 to $3 and spring lambs at $2 50 to $4 or 4c to 5¼c per lb.

Hogs—Prices are unchanged at $5.80 for selects and $5.55 for lights and fats. Feeders, short keep $4 25 to $4.50.

DARLING'S DRUG STORE

DEAD BUG

A COMBINED BUG KILLER AND POTATO GROWER

Is going to take the place of Paris Green because it kills the bugs and makes the potatoes grow instead of killing the plant as Paris Green does--if you get too much on. We want every potato grower to try it whether a large grower or small but we know you do not like to experiment so we reprint the guarantee given by the manufacturers:

"We hereby guarantee Dead Bug—when properly applied—to kill the bugs and increase the yield of potatoes and we further agree that if you plant one acre of potatoes using Dead Bug on one half and Paris Green on the other, if you don't get more potatoes from the half where Dead Bug is used—providing of course that soil is the same,—we will refund the money paid for Dead Bug."

We are agents for Dead Bug. It is cheaper than Paris Green but we can furnish Paris Green at lowest market price.

J. A. DARLING,
