Cole Lake Items.

Cole Lake, April 19.—William Shillington and R. Butterl spent Thursday in the city. The medicine show in the school house is drawing quite a crowd. Mr. and Mrs. George Campbell are moving. Mrs. George Butterl has returned, after visiting her daughter in Maberly. Mrs. A. E. Hartin and baby are ill. William Loucks has completed the new zinc roof and inside painting on William Shillington's house. Syrup making is about over, with just a few good runs of sap. Robert Butterl spent Easter at Huntsville with his brother, who was ill.

Dr. Morse's Indian Root Pills

are not a new and untried remedy—our grandfathers used them. Half a century ago, before Confederation, they were on sale in nearly every drug or general store in the Canada of that day, and were the recognized cure in thousands of homes for Constipation, Indigestion, Biliousness, Rheumatism and Kidney and Liver Troubles. To-day they are just as effective, just as reliable as ever, and nothing better has yet been devised to

Cure Common Ills

"Count Your Blessings"

WOULD you be willing to go back to the standards of living that prevailed in 1812?

In spite of all the praise of "the good old days," would you be content to give up the many conveniences we have gained in the past century?

Former generations knew nothing of the luxuries of modern travel with its observation cars, individual lights in Pullman berths, phonograph recitals, rich appointments, home-like comforts, and special safety devices with which the modern railway system surrounds its passengers.

The rural telephone now places the farmer in instant communication with the source of the latest market reports, and saves him many hours of precious time in the event of sickness or accident.

The introduction of the typewriter and adding machine has lightened the load and lengthened the day of the business office.

It was Advertising that first proclaimed the usefulness of these devices, that created an immediate and universal demand for them, that established a world-wide distribution which made them readily accessible to us all.

McCormick invented the reaper and thereby made himself an everlasting benefactor of the farmer. But it was Advertising that carried the wonderful news with its far-reaching significance to the "man with the hoe."

You know what housework used to be. Realize what it is now, since the advent of sanitary plumbing fixtures, hot-water heating, vacuum cleaners, and electric household appliances. Advertising has brought these things into your home. It has eliminated drudgery.

Advertising is service. Science, invention, commerce, are all indebted to its aid. It has raised the standard of living, elevated business ethics, and put us within reach of more real comforts, more real blessings, than we ever enjoyed before.

Advice regarding your advertising is available through any recognized Canadian advertising agency, or the Secretary of the Canadian Press Association, Room 503 Lumsden Bldg., Toronto. Enquiry involves no obligation on your part—so write if interested.
