CROWS FEET and EYESTRAIN

Where do those crows' feet come from?

When your eye muscles become overworked they call on your facial muscles for aid. The results are obvious—crows' feet.

Unconsciously you use these muscles many times a day in trying to overcome defective eyesight.

An eye examination is the only sure way of telling the condition of your eyes. Let us examine yours and prevent many crows' feet and wrinkles.

DRUGS EXCITE THE KIDNEYS, DRINK WATER

Take Salts at First Sign of Bladder Irritation or Backache.

The American men and women must guard constantly against kidney trouble because we often eat too much rich food. Our blood is filled with acids which the kidneys strive to filter out; they weaken from overwork, become sluggish, the eliminative tissues clog and the result is kidney trouble, bladder weakness and a general decline in health.

When your kidneys feel like lumps of lead; your back hurts or the urine is cloudy, full of sediment, or you are obliged to seek relief two or three times during the night; if you suffer with sick headache, or dizzy, nervous spells, acid stomach, or if you have rheumatism when the weather is bad, begin drinking lots of good soft water and get from your pharmacist about four ounces of Jad Salts. Take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate clogged kidneys, to neutralize the acids in the system so they no longer are a source of irritation, thus often relieving bladder disorders.

Jad Salts is inexpensive; can not injure, makes a delightful effervescent lithia-water drink and belongs in every home, because nobody can make a mistake by having a good kidney flushing any time.
