ANOTHER DEPRESSION

The new history of Grey County is not selling as freely as was hoped for, but this may be on account of "the depression." At the January session of County council, Sheriff Breese announced to the members that the books, which they had ordered were now ready for delivery and each member could receive his copy at the Sheriff's office. As a result of this announcement 'only two copies' of the book were sold! This naturally caused more "depression" among those who had worked so hard to produce the book. To think that out of that body of men only two could be found who were willing to put up the money for a copy of this valuable record of Grey County history! A most depressing thing to realize.

EDITORIAL NOTES.

The First of May comes on Sunday this year. What a temptation that is going to present to some fishermen.

* * *

The Dominion Express Company has a new name, duly established by an Act of the Canadian Parliament. This "common carrier" will in future be known as the Canadian Pacific Express Company.

* * *

There seems no doubt that the proposed waterways convention between Canada and the United States will be postponed for another year. The Dominion parliamentary session is rushing to its end and all such questions will be thrown to one side for at least another year.

* * *

The frog's orchestra, our outdoor band, furnished the usual serenade the former part of last week. We wouldn't mind if it would purchase a little fresh music. The old tunes are getting pretty well worn out. But then, perhaps the depression has hit them also.

* * *

Before the year is out there promises to be another out break of flag-waving and hysteria, both in Canada and the United States. It is well to remember, however, that the patriotism cannot be so exemplified. In a large part it is made up of calmness and intelligence. The baffled in legitimate argument are easily recognized when they adopt the contrary view.

* * *

It is true that almost every year new studies are added to the school curriculum. Does that account for the fact that in these modern times there are very many young men and women, who have spent a long period in acquiring facts, who are unable to read, write, or calculate properly? There seems to be no time left to give thorough drill in the essential three "R's." At least employers are constantly asserting that this is their experience, when they come to take on new help.

* * *

Recent investigations by Parliamentary commissions and committees go to show how little leading politicians in Canada profess to know when they find it politic to conceal facts that might be uncanny to make known to the public. Some of these political leaders profess so little about the doings of their associates and government—about the sources of the "sinews of war" on which they have in the past thriven—that one is forced to conclude that they are too child-like and unsophisticated to be safely left at large. Instead, they should have a nurse.

Asked Wrong Question

An incident occurred at the luncheon given the visiting brethren of the press by the Beauharnois Construction Co., that was the cause of much mirth. When the visitors entered the staff dining room where the luncheon was given, a number of men were seated at the tables partaking of their lunch Talk died down for a moment and in order to start it again one of the visiting editors casually enquired of another as to what kind of a man was Sweezy, the main man behind the Beauharnois power development and on account of the talk in connection with the works in question, further enquired as to what kind of horns he wore. Silence again reigned for a moment and then one of those who had been at the table casually stated, "I am Sweezy!" Needless to state the matter was dropped at once, and Bro. Wesley of the Walkerton Herald and Times collapsed.

How To Use Fertilizer

Experience shows that fertilizer broadcast on top of the soil will not give nearly as good results as will the same fertilizer drilled into the soil. The exact placing of fertilizers must be determined for each class of crops and for each general type of soil. Fertilizer drilled into the soil for grains gives better result than an equal quantity of the same fertilizer broadcast and worked into the soil. For grain, the tube application, as accomplished by the ordinary grain drill fertilizer equipment gives satisfactory application up to 400 lbs. an acre. For potatoes fertilizer should be sown on either side of the seed pieces but not in contact with them, and on a level with the seed pieces, neither above nor below them. For turnips and mangels grown on the drill, broadcast the fertilizer on the land just before drilling it up. For beans and peas, special care should be taken to prevent seed and fertilizer combining together. Two very important points in fertilizing all crops are: 1. Get the fertilizer down into the damp soil. 2. Don' let much of it come in contact with the seed or seed piece.

It Cuts Like Lumber

AND nails like lumber. Its light weight makes it easy to handle. It requires no expensive decoration, in fact none at all, when panelled.

Use it for obtaining fire-safe walls, ceilings and partitions throughout your home.

It has structural strength, insulation value, is draught and vermin-proof, easy to install, saves time in new construction and is an excellent base for Gyptex or Alabastine.

USE The NEW IVORY GYPROC Fireproof Wallboard

Gyproc may be easily identified by the name on the board and the Green stripe along the edge.

Trip To Montreal Visited Beauharnois

Last week the junior editor of The Advance was a guest of the C. P. R. on a trip to Montreal to attend a meeting of the Ontario and Quebec division of the Canadian Weekly Newspaper Association, where we enjoyed a few interesting days visiting relatives and many interesting scenes in that city.

Montreal is situated entirely upon a large island and was founded in 1642 near the site of an Indian village visited by Jacques Cartier in 1534. Montreal combines the modern trend of buildings with ancient edifices erected from 150 to 250 years ago. It is one of the greatest cosmopolitan cities in the world, with both French and English languages being spoken, French being predominant. Midway on the island looms up a mountain, called Mount Royal, 700 feet high, on top of which is a fine park in which a motor vehicle is not allowed to run. This mountain can be seen for many miles before the traveller reaches the city. On its southern side many fine residences have been erected with a fine view of the St. Lawrence and also of the Adirondack mountains, 70 miles away.

The older portions of Montreal preserve many architectural and civic characteristics of its earlier years, while in the surrounding countryside are found a simplicity of life and a survival of quaint institutions and customs recalling the seventeenth century, Brittany and Normandy, where came the ancestors of the French-Canadian habitants of today. The roads in Quebec are winding and very narrow, but many miles are paved and others are of good gravel construction.

Montreal boasts of a fine ocean harbor 1000 miles from the sea, a which 100 large ocean-going boats can dock at one time. When we were there only two boats were in, the Montclare and a freighter, both owned by the C. P. R. There are 10 miles of dock with large grain elevators, from which is shipped most of the grain from Canada, and large warehouses and cold storage plants.

Saturday we enjoyed a visit to the vast enterprise Beauharnois that will eventually, take the whole flow of the St. Lawrence river to manufacture 2,000,000 horse power of electric energy. The site of the power house is about 30 miles above Montreal and at the end of a canal 12 miles in length and of a width of about three quarters of a mile. The works under construction at the present time will deliver 500,000 h. p. of electricity energy, the first unit of which will be ready by October 1, 1932.

Besides the power canal a ship channel 600 feet wide and 27 feet deep is being dredged at the present time at one side of the canal. This is being built at a cost of $16,000,000 and will be turned over to the Dominion government at no cost. To allow the freighters to enter at the east end, where the power house is situated, the government will be obliged to construct two locks with a toal lift of 80 feet, the boats running through the canal to Lake St. Francis.

The manner of excavating the ship channel is very interesting. An electric hydraulic dredge can cut into the earth at the rate of 1,100 cubic yards an hour and moves forward as much as 210 yards in a day. It has excavated 819,000 cubic yards in one month. The cutter head is seven feet in diameter and is operated by a 200 h. p. motor, and the earth, as it is worked through is pumped into a settling basin by a 2,200 h. p. motor There was one spot where this dredge could not operate successfully and this was clay in which were huge boulders that could not go through the pipes. However a boulder 18 inches in diameter can go through the dredge and pipe line.

Two railway lines cross the canal and bridges have had to be constructed by the Company for them and at the present time seem strange as there is no water visible that would cause a bridge to be built.

One other interesting feature was the manner of the excavating of the main canal. Two huge derricks were erected on both sides of the canal from which were strung cables carrying a scoop of four cubic yards capacity that scraped the earth on both sides, the material being placed on both sides of the canal, forming dykes. These dykes are rip-rapped with stone to prevent erosion of the banks.

The building of this huge power development is a tribute to the belief in the great future of this country. While there has been considerable talk on the financing and other views of this great work it remains as the culmination of a great dream of the complete harnessing of the St. Lawrence river for power purpose, financed by Canadians, built by Canadians in Canadian territory.

Osprey Council

The Municipal council of the Township of Osprey met at Maxwell in the Orange hall, on Saturday, April 16th All members were present, with the Reeve, Mr. Taylor, in the chair.

The following communications were read and ordered filed. From Clerk of the Peace re the appointment of Reginald Londry as County Constable. From chairman of Old Age Pension Board re Old Pensions of the Township. From Lucas & Henry re the Grummett action. Resignation of Hy Arnott as sheep valuer; Mr. Wm. Russell was appointed in his place. Mr. Jesse Grummett and Allan Davison met council by appointment to discuss Davison action, on which no agreement was reached. The Collectors were ordered to return polls by May 15.

The following General accounts were ordered paid: Municipal World supplies to treas., $2.68; T. P. Carter, professional services to Yokom family, $75.00.

Road accounts paid were: A. Cambell, 4.20; R. Pedlar, 5.20; Wm. Davison 8.00; Alex. Moore, 4.80; W. J. Bannerman, 1.80; Jas. Fawcett, 3.20; Ed Madden, 1.80; S. J. Arnott, 2.00; Lloyd Moore, 9.00; Robt. Allister, gravel, 1.70; Hec. McInnis 8.40.

Council adjourned to meet at Maxwell on the 28th of May to hold a Court of Revision at 10 a. m., and general business at 1 p. m.

ONE-EYED CAR DANGEROUS

How often does the night driver get the impression that he is approaching an advancing motorcycle only to discover, a few seconds later, that it was another one-eyed highway menace. It is comforting to know that traffic authorities everywhere in Canada are concentrating this year on removing this danger to night driving. Driving with only one light, especially if it is the right-hand one, leaves other drivers in doubt as to the type of vehicle, and on a narrow road, is often disastrous. More than that, the driver with a single bulb has an insufficient illumination of the road and the other cars' stronger lights even though not glaring, are often enough to blind him.

LIE, STEAL, DRINK, SWEAR

There is a newspaper, the editor of which is openly advising readers to lie, steal, drink and swear. He thus explains his stand: "When you lie, let it be down to pleasant dreams; when you steal, let it be away from immoral associates; when you drink, let it be pure water; when you swear, let it be that you will support your home paper, pay your subscription and not send your job printing away from the home newspaper."

BUILDING FOR SALE

Building known as the Artemesia Twp. hall in the village of Flesherton. Offers for above to be closed by April 30, 1932. Highest or any offer not necessarily accepted. Building to be removed from lot by June 1, 1932. For further particulars apply to,
—C. J. BELLAMY, Sec. of Com.
