A REAL IRISH GRIEVANCE.

As Mr N. W. Senior was visiting a certain part of Ireland in company with a landed proprietor, named Trench, the following scene occurred :—

As we were returning, a wild-looking man, about sixty years old, came bounding down the hill side. He implored Trench to come and look at his holding, and say whether it was not the worst land in the glen. The priest, he said, had told him that if Mr Trench saw it he would lower the rent to the Poor-law valuation. The rent was £7 15s, the valuation £7.

We walked with him to his land, a tract of 14 or 15 acres between the hill and the river, on which his nine cows were feeding. They seemed in good case, and his three-windowed cottage was, as he admitted, "a mighty fine house." But it was thatched. If the rent was reduced, he would slate it.

"Why," said Trench, "£7 15s. does not seem too much for a mighty fine house and for land that feeds nine cows. What will the neighbours say? They will be all wanting reductions."

"Oh," he said, "the neighbours shall never know it. Your honour must remember that, when first you came to this glen, eight years ago, you gave me a shilling; and I have reckoned on you as my friend ever since."

"Well," replied Trench, "if you are over-rented, what will you take to give up your holding? Will you take £20?"

"No."

"Will you take £50?"

"No."

"I am afraid, then, that I can do nothing for you."

He knelt down to re-urge his entreaty, but was at last pacified by half-a-crown.

"This," said Trench, "is a specimen of the inhabitants of these mountain glens. Solitary, penurious, half-employed, uneducated, with no object except to hoard a little money, with no pleasure except eating, drinking, and sleeping; raised above their cattle chiefly by being discontented—yet they cling to this hill-side with a tenacity which nothing but the famine, or some bribe larger than I think it right to offer, could overcome. And if I were to persuade them to go to America, or even, to allow me to transplant them, as the Duke of Sutherland did his mountain cottiers, to the better land near the sea-coast, all the local newspapers would cry for vengeance on me as an exterminator.

The Queen of Prussia has caused a space to be reserved in the Park of the Invalides at Berlin, on which flying ambulance waggons will be established to teach young women how to tend the wounded in a campaign.

The tendency of literary manifestation, for several years past, has been towards condensation. The New York *Commercial Advertiser* says this is notably the case in the newspaper press, daily and weekly, and is also displaying itself in magazine literature. The average length of articles has been materially reduced. The newspaper, with short, pungent paragraphs, in which the intelligence that is to be given is boiled down into the fewest possible words, is always preferred to one which stretches its articles out into columns of useless adjectives. People who want to find out what is going on, prefer to do it in as short a time as possible, and from a sheet filled with scores of condensed paragraphs they can learn much more than if the same space is devoted to a small number of lengthy articles.

THE ORIGINAL CHLORODYNE, invented by R. Freeman, Pharmaceutist, is allowed to be one of the greatest discoveries of the present century. It is largely employed by the most eminent Physicians and Surgeons in hospital and private practice in all parts of the world. It has effects peculiar to itself, and which are essentially different to those produced by the various compounds bearing the name of Chlorodyne, but have no pretence to possessing its virtues. It rapidly relieves pain, from whatever cause, allays the irritation of fever, soothes the system under exhausting diseases, and gives sleep without producing any one of the unpleasant feelings so commonly arising from the use of opiates. It continues to hold its unshaken position in the estimation of the Profession as the best, most reliable, and cheapest preparation. Eminent and scientific Physicians made affidavits that they have tested its effects in careful comparison with those of "DR. COLLIS BROWNE'S CHLORODYNE," and deposed to the facts that they found it a more certain and reliable preparation, and greatly preferred "FREEMANS."

Earl Russell communicated to the Royal College of Physicians and to Mr Freeman, that in Manilla the only remedy of any use in Cholera was Chlorodine.

The Medical Times and Gazette, January 13th, 1866, states, "It has an immense sale amongst the public, and is prescribed by scores of Orthodox Medical Practitioners, and, of course, it would not be thus singularly popular did it not supply a want and fill a place."

Manufactured by the Inventor, Richard Freeman, 70, Kennington Park Road, London, S.

The genuine has engraved on the Government Stamp (outside each Bottle), "FREEMAN'S ORIGINAL CHLORODYNE."

CONDY'S PATENT FLUID or natural disinfectant purifies, deodorises, and disinfects, by the agency of nascent or ozonic oxygen,—its active principle. Being entirely innoxious, this truly scientific preparation is peculiarly adapted for the following useful purposes, for which all other disinfectants, on account of their poisonous or other objectionable qualities, are unavailable and useless :—

Detecting organic impurities in air and water.

Purifying drinking and other water from organic matter, lead, &c.

Freshening the air of close places, and removing bad smells.

Freeing meat, fish, butter, or other provisions from taint.

Counteracting the effects of organic poisons taken into the stomach.

Curing Musty provender. Freeing wheat and other seed from smut.

Maintaining the health of plants in pots and conservatories.

Preserving and restoring the freshness of cut flowers kept in water.

Destroying the blight of the potatoe, vine, hop, mulberry tree, &c.

Washing dogs and other domestic animals.

Cleansing bottles, beer barrels, pickling tubs, dairy utensils.

Washing the hair and darkening its colour when turning grey.

Enhancing the purifying and invigorating effects of baths and tubs.

Dressing poisoned wounds and destroying animal virus.

Treating the infectious diseases of cattle, horses, dogs, &c.

One gallon makes 200 to 300 gallons adapted for use.

N.B.—Condy's Fluid is the Standard Scientific Test for Organic Matter in Water, and affords the only known means of rapidly and completely freeing Drinking Water from Organic Taint, which is so common a cause of serious disease.

To rapidly purify the air, use the diluted fluid with "Condy's Ozoniser" or other Spray-producer.

CONDY'S PATENT OZONISED WATER,

(FOR TOILET PURPOSES,)

Removes from the mouth impure and foreign tastes and odours, whether arising from tobacco or other causes, and counteracts the irritation and morbid secretions of carious teeth. It purifies and softens the skin, and, used in the bath, tends to promote a healthy state of the whole body.

H. BOLLMAN CONDY,
Patentee, Battersea, London.

JUDSON'S SIMPLE DYES FOR THE PEOPLE. Any one can use them; anything can be dyed with them. It is impossible in this small space to enumerate the many uses to which these wonderful and beautiful chemical preparations can be applied; while their chief use is for dyeing textile fabrics, they are also invaluable as a colouring agent for almost every known material, the ease with which they can be used and the brilliancy of the result being, indeed, almost magical. By their use almost any article of clothing can be dyed in a few minutes for a few pence without soiling the hands.

MEMORANDA.

MAGENTA : The strength and beauty of this dye is almost incredible. A Sixpenny bottle will dye 20 yards of Bonnet Ribbon in 10 minutes; it will also produce a clear Rose Pink by using less dye. Suitable also for Woollen Goods, Feathers, Silks, &c.

WOOLLENS : Magenta, Mauve, Violet, Purple, Orange, Pink, and Crimson produce the most satisfactory results. Use a large quantity of boiling water in an earthen pan. RIBBONS and SILKS : Brush them with soap and water to avoid creases, and to render them clean. Dye in boiling water.

FEATHERS : Dye in hot water (a few drops of the dye is sufficient for one feather).

COTTON : Mauve, Violet and Purple are recommended.

LEATHER : Blue, Magenta, Violet and Orange. Dye in warm water.

WHITEWASH : To color : *Magenta*, for Pink or Rose ; add half a bottle to a pail of water, then stir in the Whitening as usual. Mauve, Violet, Purple, Blue and crimson produce pretty tints by using one bottle or more, as directed above.

STARCH : Stir in a few drops of Colour—Magenta, Mauve, Violet, Blue or Pink ; these impart delicate tints to Lace, Linen, &c.

WILLOW SHAVINGS, Wicker, Ivory, Bone, Hair, Fibres, Seaweed, &c., attract the dye quickly, if applied in boiling water.

BLUE : For laundry purposes is A 1.

BOOK EDGES : A Sixpenny bottle of Magenta, Violet, Crimson or Blue will make from a pint to a quart of beautiful colouring, according to shade required. Apply with a brush.

PAPER and WOOD STAIN : Ditto.

OAK STAIN : A bottle of No. 2 Black to half a-pint of hot water.

SATINWOOD STAIN : A Sixpenny bottle Canary dissolved in a pint of boiling water

PHOTOGRAPHS may be tinted ; dilute the dye with water ; a bottle of Magenta to a pint of water. &c.

ILLUMINATING : Magenta, Violet, Blue, Orange ; pour a few drops into an egg cup add warm water ; use with a brush or pen. Borders of books, similar to Ward and Lock's Arabian Nights, &c., may be prettily illuminated in this manner.

BLANCMANGE, JELLY, CORN FLOUR, ICE CREAMS, &c : While in a liquid state add one or two drops of Magenta. A more simple or elegant tinting cannot be had.

CONFECTIONERS will find Magenta, Violet, Orange and Pink useful colours.

GELATINES and GLUES are successfully coloured with these dyes.

INK : A Sixpenny bottle of Magenta to a pint or more of cold water.

WATER : One drop of dye will tint a quart.

PRINTING on Cotton, Silk or Wool in the ordinary way.

BLENDING some of the dyes in the bath will produce an infinity of shade, according to taste.

DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL.

DR. DE JONGH'S Oil is convincingly proved by an overwhelming weight of medical testimony, and by the practical test of successful experience for twenty years in all parts of the world, to be beyond all question, the purest, the most efficacious, the most palatable, and, from its rapid curative effects, the most economical of all kinds.

Hence the universal celebrity of Dr. de Jongh's Oil, and the unparalleled demand for this unrivalled preparation.

SELECT MEDICAL OPINIONS.

SIR HENRY MARSH, BART., M.D.,
Physician in Ordinary to the Queen in Ireland.

"I have frequently prescribed Dr. de Jongh's Light-Brown Cod Liver Oil. I consider it to be a very pure oil, not likely to create disgust, and a therapeutic agent of great value."

DR. EDWARD SMITH, F.R.S.,
Medical Officer to the Poor Law Board of Great Britain.

"We think it a great advantage that there is one kind of Cod Liver Oil which is universally admitted to be genuine—the Light-Brown Oil supplied by Dr. de Jongh. It has long been our practice, when prescribing the oil, to recommend this kind, since, amidst a much variety and uncertainty, we have confidence in its genuineness."—(Extract from "Consumption : its Early and Remediable Stages.")

DR. LANKESTER, F.R.S.,
Coroner for Central Middlesex.

"I consider that the purity of this oil is secured in its preparation, by the personal attention of so good a chemist and intelligent a physician as Dr. de Jongh, who has also written the best medical treatise on the oil with which I am acquainted. Hence, I deem the Cod Liver Oil sold under his guarantee to be preferable to any other kind as regards genuineness and medical efficacy."

DR. LETHEBY,
Medical Officer of Health, and Chief Analyst to the City of London.

"In all cases I have found Dr. de Jongh's Light-Brown Cod Liver Oil possessing the same set of properties, among which the presence of cholaic compounds, and of iodine in a state of organic combination, are the most remarkable. It is, I believe, universally acknowledged that this oil has great therapeutic power ; and from my investigations, I have no doubt of its being a pure and unadulterated article."

DR. BARLOW, F.R.S.,
Senior Physician to Guy's Hospital.

"I have frequently recommended persons consulting me to make use of Dr. de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure oil, well fitted for those cases in which the use of that substance is indicated."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."

"Dr. Granville has found that Dr. de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the pale oil."

EDWIN CANTON, ESQ., F.R.C.S.,
Surgeon to Charing-cross Hospital.

"For several years past I have been in the habit of prescribing Dr. de Jongh's Light-Brown Cod Liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."
