FIND NEW DISINFECTANT

An effective disinfectant for poultry houses developed at the Dominion Experimental Station, Lennoxville, Que., and one which is proving entirely satisfactory for washing poultry equipment and houses, is made up as follows:

Dissolve three-quarters of a pound of concentrated lye in as small a quantity of water as possible. It will be necessary to do this several hours before it is required, as the lye should be cold when used. To this add 1½ quarts of raw linseed oil, slowly stirring meanwhile. Keep stirring until a smooth liquid soap is produced, then gradually add one gallon of commercial creosol, stirring constantly until the fluid is a clear dark brown. Use one-half cup of the mixture to a gallon of water.

We find ourselves in argument with the smart chap who says he's certain the frost is all out of the ground by now.

Three men entered a pawn shop in New York. Two of them with guns drove the shop staff into a room in the back and took everything of value The third man picked up a banjo and sat on the counter, playing a little tune. There were thousands passing while the hold-up was going on

Subscribe for your Daily and Farm Papers through The Advance

We announce the following clubbing arrangements for subscribers of the 'Advance' to receive their home paper and any others they may desire for one year.

(To Canadian Points Only)

Flesherton Advance and Toronto Daily Star	$7.25
Flesherton Advance and Toronto Daily Globe	$6.25

Car Used In Haying

The other day a Listowel farmer found a new use for his automobile. He hitched it to his hay fork, and used it to pull up the fork with its load of hay. For the purpose it was quite efficient, about several times handier than a horse or a team could be. It was simply a matter of drive ahead and then stop and back up. Not only this, but a weight of 20 pounds or so attached to a rope through a pulley and then to the carriage or truck on the over-head track, brought the carriage back to the tripping block and saved the man on the load a good long hard pull. This cannot be done to good advantage when a horse is used. He hasn't patented the idea, but it should be just as possible as was the idea of tying fish hooks in the fleece of sheep at their throats, to catch sheep dogs, and an application was once made for proctection for this brilliant idea. If you have a car, even if you haven't obtained a license to operate it as such, or even a permit to drive it upon the highway, you can run it out, hitch it to the hay rope, and when you drive in with a load of hay, leave the horses where they are and jump in the car to unload. No unhitching and hitching up again. The idea is good. —Listowel Standard.

The total gold production of Canada up to the end of last year had a value of $837,000,000 or over.

Jack and Jill went up the hill
At 60 miles or better.
A cop unkind
Was right behind—
They're seeking bail by letter.

Herb. H. Hannan of Cedarville and well known in South Grey in connection with farm work, has been awarded a scholarship by the Rockfeller Foundation and leaves in August for Denmark. He may ultimately visit other countries in Europe. The scholarship was won by Mr. Hannan for his interest in agriculture.

A baby chick with four legs and feet, perfect in every detail and otherwise normally formed was found by Ray McQuard, Long Branch, when a setting of eggs was hatched by one of his hens. The chick was killed by the hen soon after it was hatched and is carefully preserved in alcohol at the storeroom of the Anaconda American Brass Company, New Toronto.

Holiday Visitors

Visitors in town for the Old Boys' and Girls' picnic on Monday were as follows:

Mr. and Mrs. Harry Quigg (nee Wilda Crossley) of Harriston; Roy Thistlethwaite of Toronto, with his family; Miss Shirley Murray, Toronto; P. Loucks of Chatsworth; Mrs. A Carter of Toronto, with Mr. and Mrs. Wm. Moore; Mr. and Mrs. Gordon Badgerow, Jos. LeGard, Albert LeGard, Mr. and Mrs. Harry LeGard and family, Wm. Poulter and son, Herb. Jim Field and daughter, Audrey, and Mr. Bill Field, all of Toronto; Mr. and Mrs. Ted McDonald of Pickering Miss Sarah Pedlar of Toronto; Mr and Mrs. Dave Wright of Dundalk, Mr. and Mrs. Jas. Ferris and three children, Mr. and Mrs. Robt. Bellamy of Coldwater; Mr. and Mrs. Fred Bellamy of Collingwood; Mr. and Mrs. W. Duffield of Toronto with Mr. and Mrs. F. Cairns; Mr. and Mrs. A. W. Rowe of Dundalk and Mrs. Dynes of Knoxville, Tennessee; Mr. and Mrs Herb Smith of Owen Sound; Mrs. T S. Sproule of Toronto; Mr. and Mrs. Geo. McKee (nee Maggie Moorehouse) and children of Toronto, accompanied by Mr. and Mrs. J. M. Goodall of Bellwood; Mr. and Mrs. Glen Davis and Mrs. L. Davis of Toronto, Mrs. Chas. Phillips and son of Toronto; Mr. and Mrs. R. C. Phillips and son of Toronto and Mr. and Mrs. Geo. Phillips and Mr. and Mrs. Frank Phillips of Toronto; Mr. and Mrs. A. S. Thurston and family of Thornbury; Edna McCallum of Toronto; Mr. and Mrs. O Clipperton and family of Toronto. Miss Effie Sandiland of Dundalk; Mr and Mrs. Frank Irwin of Durham; Mr. and Mrs. H. Freeman and Mr. and Mrs. Jack Perkins of Markdale; Mr. and Mrs. C. White of Waubaushene; Mr. and Mrs. W. G. Pickell of Paris; R. G. Hannah and Mark of Toronto; Mr. and Mrs Bert Petch and Mr. and Mrs. A. Howden of Toronto; Mr. and Mrs. Leeder of Toronto; Mrs J. E. Thompson, all of Toronto.

QUITE TRUE

"It's the loafer at the corner who criticizes the man at work with shovel on the street. It's the idler who talks of the unfair distribution of wealth and the airs of the wealthy. It's the man who refused to attend school in his youth who talks about the airs of the educated. It's the man who knows nothing about economic conditions that is the loudest in expressing his views on the cause of the depression, and lack of employment. It's the farmer who leaves his machinery exposed who spends most of his time talking about the hardships of the farmer and who would sooner attend a public meeting of grumblers than stay home helping his wife, who fails to make farming pay. Some men find plenty of time to gallivant about the country finding fault with the way public affairs are managed, who could make a comfortable living and a contented home if they would attend to their own business, and gave the same amount of attention to the wife and family. These fault-finders, grumblers and public regulators may have a place in our public life, but they are a terrible nuisance. — Winchester Press.

There are 200,000 trained nurses, which shows the odds against a rich bachelor when he's sick.

Health Service

OF THE

Canadian Medical Association

Edited by

GRANT FLEMING, M.D. — ASSOCIATE SECRETARY.

BLOOD PRESSURE

The number of questions concerning blood pressure which come to the Health Service is evidence that a large number of people are worried about high or low blood pressure.

For a number of years, in making an examination, doctors have taken the blood pressure of their patients. The doctor is interested in the blood pressure because it is by putting together all his findings that he is able to determine the nature of any abnormal condition which may be present in his patient.

The blood is always under pressure otherwse it would not circulate. In the same person blood pressure varies as the result of such things as worry, excitement, position of the body and the use of stimulants. It also varies with age, sex, weight and general health.

High blood pressure is not a disease. It is the result of some cause which may be emotional, such as worry or excitement, but may be associated with some abnormal condition of other parts, such as the heart or kidney. There is no use in guessing as to the cause; that is for the doctor to find out. Worry about blood pressure may be the one thing which is keeping it above the average

It is a mistake to try to interpret your own symptoms or the results of some examination. If, for some reason, you have an X-ray examination, you are not able to interpret the picture; very likely you have no idea that you can do so, and you are quite right, for it requires experience to enable the doctor to know the meaning of the lights and shadows which the picture shows.

Blood pressure readings appear so simple—much like reading a thermometer—that many people seem to believe that they should be able to know the meaning of a blood pressure of 150 or some other figure. It is not with any idea of suggesting that there is something mysterious about the subject that we say quite frankly that the inerpretation of blood pressure readings is not simple. It is not simple because the significance of the blood pressure is not found in the blood pressure itself. It is obvious that, if the average blood pressure for a man of 50 years of age is 130, a man of 50, who has a pressure of 160 is above normal. Such a condition should receive attention, but need not cause alarm. The condition itself means nothing; it may be only temporary, but, in any case, until the cause is known the significance of the condition is obscure. A few years ago people worried about uric acid; now it is blood pressure. Secure the advice of your doctor, follow his instructions and leave blood pressure to take care of itself.

FERTILIZER TESTS ON WHEAT

Definite results from the application of fertilizer to fall wheat have been obtained by 73 farmers in Ontario. Already there are 232 plots under test and under the supervision of the Chemistry Department of the Agricultural College. Most of the leading fertilizer mixtures were used.

After three years of this experimental work the Chemistry Department makes the statement that winter killing of wheat can be overcome to a large extent by applying suitable fertilizers, on well drained soil. Also it was found that fertilized wheat stools out much more agundantly than does unfertilized wheat.

Fertilized wheat ripens more uniformly than unfertilized wheat, and 8 to 10 days earlier. Also a satisfactory catch of clover and grass is nearly always obtained if fertilizers are used when seeding grain.

Fertilizers applied with the drill give better results than the some fertilizers when applied broadcast.

As the increase in yields is the deciding factor in using fertilizers 11 extra bushels per acre seems to leave a margin of profit. This was the average obtained in the past two years. There is an added benefit for one of two years in the stand of clover and grass following wheat.

An inventor made a machine that stamps out an auto body in one movement. The driver of an express engine can do the same thing.

EXHIBIT OF INTEREST AT C.N.E.

Every occupier of land has weed problems and every Municipality has a Weed Inspector. Therefore, every one visiting the Canadian National Exhibition this year will anticipate seeing with more than usual interest the "Weed Exhibit" in the Ontario Government building. This exhibit is entirely new and is being arranged in order that visitors to the great exhibition may become more familiar with ways and means of combating weed enemies and that Weed Inspectors, farmers and others may have an opportunity of meeting with officials in charge of the booth.

A sad confession is made by the Forest Standard: "About the biggest mistake a man can make at this season of the year is to have more lawn and garden than his wife can look after."

1932 IN THE STUD
TROTTING STALLION

William W. Belwin

Sired by Belwin 2:06½
the horse that was sold for fifty thousand dollars.

BELWIN will stand for mares at Flesherton or will go out a distance of five or six miles in the country to accommodate parties who cannot bring their mares in.

Hard Times Low-down Price to insure mare in Foal of $10.00

Parties disposing of mares before the foaling time will be held responsible, whether in foal or not.

Inspected and enrolled for 1932.

W. W. TRIMBLE, Prop.

THE CLYDE STALLION

"Maintime"

formerly owned by Messrs. J. A Myles and Sons, now the property of H. P. Baker, Kimberley, will for the season of 1932, route as follows:

Monday—noon — Herb Kerr, Duncan; night — Dave Weber, Kimberley.

Tuesday—noon — John Campbell, Eugenia; night — Garnie McGee, 8th line, Art. Twp.

Wednesday—noon — Ed. Hillock Maxwell; afternoon K Mort Sayers, one hour; night — Will Conn, Feversham.

Thursday—noon — Jas. Fletcher 4th line, Coll. Twp.; night — Gordon Millar, 15-16 side line Coll.

Friday—noon — (via Banks) Thos Sheridan, Loree; night — Geo. Gould, Ravenna.

Saturday morning—Anywhere by appointment between Ruben Dobsons and Mat Merrit on the 10th line; noon —at home, Lot. 15, Con. 2, Euphrasia

TERMS — To insure $10.00 payable February 1933. Seasons Mares $8.00 payable last trip.

All accidents to mares at owners risk, colts held as collateral, until foals are paid for. Horsemen are invited to inspect this horse and examine pedigree.
