RELIGIOUS TEMPERANCE MEETING at the Sons of Temperance Hall, Princess Street, every Sunday afternoon, from 4½ to 5 o'clock.

THE LYNCHING AFFAIR IN PETROLIA

Mr George Putnam, who has for some time been keeping an hotel at the village of Petrolia, recently made up his mind to sell out and move out to his former place of residence. Accordingly he disposed of his furniture, and was preparing to start on Wednesday last, when towards evening he found that he had been robbed, money and bills to the amount of $510 having been taken from him. A great deal of sympathy was felt for him in the community, and the "Vigilance Committee" of the place, apparently a necessary appendage in new and rapidly growing communities, took the matter in hand. Suspicion fell upon three persons, the leader of whom, one Dighton, a butcher, was generally recognized as a rather doubtful character. Scouts too were sent out on different roads, to prevent suspicious looking individuals from either leaving or entering the village, and thus every precaution having been taken, the "Committee" proceeded with the main part of their task, that of ascertaining who was really the thief, and they certainly adopted a novel method, in so far as this Canada of ours is concerned, of getting information.

They made up their minds first that Dighton either stole the money, or that he knew who did. They accordingly went to the keeper of the lock-up, obtained the key from him, and then, taking Dighton out, conveyed him to the highest derrick, placed a rope round his neck, and demanded from him a confession, under threat of death by asphyxia. The man protested his innocence, but did not convince his interrogators that he spoke the truth. They jerked him up about ten feet, and letting him down again, renewed their demand that he should make a clean breast of it. He was still obdurate, protesting his innocence. The committee were still unconvinced, and gave him another rise, this time about fifteen feet, but still without effect. The man, although evidently suffering severely, still maintained that he knew nothing of the robbery. Up he went again, this time about twenty feet, and he was even kept dangling, like Mahomed's coffin, for a few seconds. When he was let down, life was apparently almost extinct, and the committee began to fear that they had carried the joke too far. However, he revived, and feeling now that his tormentors really meant mischief, he relented, and offered to conduct the committee to where the stolen treasure was concealed. They accompanied him, and found it, by his direction, buried under the roots of a tree, a sod having been carefully removed and replaced for the purpose. The whole amount, $510, was found there, and restored to Mr Putnam; and poor Dighton was replaced in durance vile at the lock-up, where he will probably remain until an investigation of the whole affair takes place before a magistrate. It was a novel way of extorting a confession; but we cannot recommend a general resort to it in similar cases. Had Dighton died under the test, it would have been a serious matter for the "committee."

No light is allowed to be carried in the British Museum on any pretence whatever.

A Richmond young lady found a burglar under her bed, and belaboured him so soundly with a prese-board that she thinks he will not be able to sit down comfortably for a fortnight. And she was in an evening toilet too.

We have good reason for believing that there is truth in the rumour according to which His Royal Highness the Prince of Wales will succeed to the colonelcy-in-chief of the Rifle Brigade, vacant by the death of Field-Marshal Sir Edward Blakeney. The appointment will be appreciated by the Rifles, while, as it has no emoluments now attached to it, none of the old and deserving officers of the army will have cause to renew the complaint made with good reason when the Prince became colonel of the 10th Hussars—that they are thereby kept out of any substantial benefit to which they had a right to look forward.—*Army and Navy Gazette.*

It is asserted that the only fixed policy which Grant possesses is with regard to Mexico. It is asserted that if he is elected to the Presidency, one of his first acts will be to call France to account for the establishment of the Mexican Empire. A letter from General Grant, which has lately come to light, indicates that, after the surrender of Lee and the close of the civil war, he would have been glad to have gone to Mexico and made common cause with Juarez against Maximilian and the party of progress and enlightenment.

HENRY W. LONGFELLOW.—A few years since the poet was coming from his home in the morning, when a venerable looking man accosted him, inquiring if he could tell him the location of the house which was formerly the headquarters of George Washington. "This is the house, Sir," replied the poet. "Do you suppose that I could get a chance to see the inside of it?" queried the old gentleman. "Certainly," continued Mr Longfellow. "I reside here, and I should be happy to show you over the premises." They entered and passed through the different rooms, and the historic associations of the place were pleasantly recalled by Mr Longfellow. When he concluded the visitor quietly turned round and said: "May I ask you your name?" "Oh, yes," responded the author; "My name is Longfellow." One would have supposed that the fame of so celebrated a man must have reached even the humble individual who was the recipient of so much courtesy; but after musing awhile and repeating the name slowly two or three times as it endeavouring to recall some past association, he exclaimed: "Any relation to the Longfellows of Wiscasset?"

THE ORIGINAL CHLORODYNE, invented by R. Freeman, Pharmaceutist, is allowed to be one of the greatest discoveries of the present century. It is largely employed by the most eminent Physicians and Surgeons in hospital and private practice in all parts of the world. It has effects peculiar to itself, and which are essentially different to those produced by the various compounds bearing the name of Chlorodyne, but have no pretence to possessing its virtues. It rapidly relieves pain, from whatever cause, allays the irritation of fever, soothes the system under exhausting diseases, and gives sleep without producing any one of the unpleasant feelings so commonly arising from the use of opiates. It continues to hold its unshaken position in the estimation of the Profession as the best, most reliable, and cheapest preparation. Eminent and scientific Physicians made affidavits that they have tested its effects in careful comparison with those of "DR. COLLIS BROWNE'S CHLORODYNE," and deposed to the facts that they found it a more certain and reliable preparation, and greatly preferred "FREEMANS."

Earl Russell communicated to the Royal College of Physicians and to Mr Freeman, that in Manilla the only remedy of any use in Cholera was Chlorodine.

The Medical Times and Gazette, January 18th, 1866, states, "It has an immense sale amongst the public, and is prescribed by scores of Orthodox Medical Practitioners, and, of course, it would not be thus singularly popular did it not supply a want and fill a place."

Manufactured by the Inventor, Richard Freeman, 70, Kennington Park Road, London, S.

The genuine has engraved on the Government Stamp (outside each Bottle), "FREEMAN'S ORIGINAL CHLORODYNE."

CONDY'S PATENT FLUID or natural disinfectant purifies, deodorises, and disinfects, by the agency of nascent or ozonic oxygen,—its active principle. Being entirely innoxious, this truly scientific preparation is peculiarly adapted for the following useful purposes, for which all other disinfectants, on account of their poisonous or other objectionable qualities, are unavailable and useless:—

Detecting organic impurities in air and water.

Purifying drinking and other water from organic matter, lead, &c.

Freshening the air of close places, and removing bad smells.

Freeing meat, fish, butter, or other provisions from taint.

Counteracting the effects of organic poisons taken into the stomach.

Curing Musty provender. Freeing wheat and other seed from smut.

Maintaining the health of plants in pots and conservatories.

Preserving and restoring the freshness of cut flowers kept in water.

Destroying the blight of the potatoe, vine, hop, mulberry tree, &c.

Washing dogs and other domestic animals.

Cleansing bottles, beer barrels, pickling tubs, dairy utensils.

Washing the hair and darkening its colour when turning grey.

Enhancing the purifying and invigorating effects of baths and tubs.

Dressing poisoned wounds and destroying animal virus.

Treating the infectious diseases of cattle, horses, dogs, &c.

One gallon makes 200 to 300 gallons adapted for use.

N B.—Condy's Fluid is the Standard Scientific Test for Organic Matter in Water, and affords the only known means of rapidly and completely freeing Drinking Water from Organic Taint, which is so common a cause of serious disease.

To rapidly purify the air, use the diluted fluid with "Condy's Ozoniser" or other Spray-producer.

CONDY'S PATENT OZONISED WATER,
(FOR TOILET PURPOSES,)

Removes from the mouth impure and foreign tastes and odours, whether arising from tobacco or other causes, and counteracts the irritation and morbid secretions of carious teeth. It purifies and softens the skin, and, used in the bath, tends to promote a healthy state of the whole body.

H. BOLLMAN CONDY,
Patentee, Battersea, London.

JUDSON'S SIMPLE DYES FOR THE PEOPLE. Any one can use them; anything can be dyed with them. It is impossible in this small space to enumerate the many uses to which these wonderful and beautiful chemical preparations can be applied; while their chief use is for dyeing textile fabrics, they are also invaluable as a colouring agent for almost every known material, the ease with which they can be used and the brilliancy of the result being, indeed, almost magical. By their use almost any article of clothing can be dyed in a few minutes for a few pence without soiling the hands.

MEMORANDA.

MAGENTA: The strength and beauty of this dye is almost incredible. A Sixpenny bottle will dye 20 yards of Bonnet Ribbon in 10 minutes; it will also produce a clear Rose Pink by using less dye. Suitable also for Woollen Goods, Feathers, Silks, &c.

WOOLLENS: Magenta, Mauve, Violet, Purple, Orange, Pink, and Crimson produce the most satisfactory results. Use a large quantity of boiling water in an earthen pan. RIBBONS and SILKS: Brush them with soap and water to avoid creases, and to render them clean. Dye in boiling water.

FEATHERS: Dye in hot water (a few drops of the dye is sufficient for one feather).

COTTON: Mauve, Violet and Purple are recommended.

LEATHER: Blue, Magenta, Violet and Orange. Dye in warm water.

WHITEWASH: To color: *Magenta*, for Pink or Rose; add half a bottle to a pail of water, then stir in the Whitening as usual. Mauve, Violet, Purple, Blue and crimson produce pretty tints by using one bottle or more, as directed above.

STARCH: Stir in a few drops of Colour—Magenta, Mauve, Violet, Blue or Pink; these impart delicate tints to Lace, Linen, &c.

WILLOW SHAVINGS, Wicker, Ivory, Bone, Hair, Fibres, Seaweed, &c., attract the dye quickly, if applied in boiling water.

BLUE: For laundry purposes is A 1.

BOOK EDGES: A Sixpenny bottle of Magenta, Violet, Crimson or Blue will make from a pint to a quart of beautiful colouring, according to shade required. Apply with a brush.

PAPER and WOOD STAIN: Ditto.

OAK STAIN: A bottle of No. 2 Black to half a-pint of hot water.

SATINWOOD STAIN: A Sixpenny bottle Canary dissolved in a pint of boiling water

PHOTOGRAPHS may be tinted; dilute the dye with water; a bottle of Magenta to a pint of water. &c.

ILLUMINATING: Magenta, Violet, Blue, Orange; pour a few drops into an egg cup add warm water; use with a brush or pen Borders of books, similar to Ward and Lock's Arabian Nights, &c., may be prettily illuminated in this manner.

BLANCMANGE, JELLY, CORN FLOUR, ICE CREAMS, &c: While in a liquid state add one or two drops of Magenta. A more simple or elegant tinting cannot be had.

CONFECTIONERS will find Magenta, Violet Orange and Pink useful colours.

GELATINES and GLUES are successfully coloured with these dyes.

INK: A Sixpenny bottle of Magenta to a pint or more of cold water.

WATER: One drop of dye will tint a quart.

PRINTING on Cotton, Silk or Wool in the ordinary way.

BLENDING some of the dyes in the bath will produce an infinity of shade, according to taste.

DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL.

DR. DE JONGH'S Oil is convincingly proved by an overwhelming weight of medical testimony, and by the practical test of successful experience for twenty years in all parts of the world, to be, beyond all question, the purest, the most efficacious, the most palatable, and, from its rapid curative effects, the most economical of all kinds.

Hence the universal celebrity of Dr. de Jongh's Oil, and the unparalleled demand for this unrivalled preparation.

SELECT MEDICAL OPINIONS.

SIR HENRY MARSH, BART., M.D.,
Physician in Ordinary to the Queen in Ireland.

"I have frequently prescribed Dr. de Jongh's Light-Brown Cod Liver Oil. I consider it to be a very pure oil, not likely to create disgust, and a therapeutic agent of great value."

DR. EDWARD SMITH, F.R.S.,
Medical Officer to the Poor Law Board of Great Britain.

"We think it a great advantage that there is one kind of Cod Liver Oil which is universally admitted to be genuine—the Light-Brown Oil supplied by Dr. de Jongh. It has long been our practice, when prescribing the oil, to recommend this kind, since, amidst a much variety and uncertainty, we have confidence in its genuineness."—(Extract from "Consumption: its Early and Remediable Stages.")

DR. LANKESTER, F.R.S.,
Coroner for Central Middlesex.

"I consider that the purity of this oil is secured in its preparation, by the personal attention of so good a chemist and intelligent a physician as Dr. de Jongh, who has also written the best medical treatise on the oil with which I am acquainted. Hence, I deem the Cod Liver Oil sold under his guarantee to be preferable to any other kind as regards genuineness and medical efficacy."

DR. LETHEBY,
Medical Officer of Health, and Chief Analyst to the City of London.

"In all cases I have found Dr. de Jongh's Light-Brown Cod Liver Oil possessing the same set of properties, among which the presence of cholaic compounds, and of iodine in a state of organic combination, are the most remarkable. It is, I believe, universally acknowledged that this oil has great therapeutic power; and from my investigations, I have no doubt of its being a pure and unadulterated article."

DR. BARLOW, F.R.S.,
Senior Physician to Guy's Hospital.

"I have frequently recommended persons consulting me to make use of Dr. de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure oil, well fitted for those cases in which the use of that substance is indicated."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."

"Dr. Granville has found that Dr. de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the pale oil."

EDWIN CANTON, ESQ., F.R.C.S.,
Surgeon to Charing-cross Hospital.

"For several years past I have been in the habit of prescribing Dr. de Jongh's Light-Brown Cod Liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."
