WEDNESDAY EVENING, SEPT. 30.

SEE LAST PAGE.

IRON-CLAD "ROYAL ALFRED" AT QUEBEC.

The iron-plated war ship Royal Alfred came to inspection last Thursday, and many of our citizens availed themselves of the opportunity of examining the inside of the first iron clad ever at anchor in the harbour of Quebec. The ferrymen of the Lower Market did a brisk business that day, for their little craft were thronged alongside the monster war ship. The first thing which strikes the attention of a visitor, on first setting foot on the deck of any vessel in the English service, is the scrupulous cleanliness of everything. It would take too long to enumerate, for every article belonging to the section is in proper order and place, and ready at a second's notice for inspection or service. The men are turned out at five every morning, and the order is to fold up their hammocks and stow them in regular order, on the top of the nettings on each side of the ship. These hammocks are arranged in regular order and set the rail off to more advantage. We were placed under the guidance of a young sailor, about 16 years of age, who first directed his steps to the fore part of the cabin of Admiral Sir Rodney Martin, K.C.B. These compartments are nicely fitted up more with a view to comfort than luxury. The furniture is plain, solid and simple, with a few steel engravings of members of the royal family hanging from the sides. A small circular table, highly polished, stands in the middle of the after cabin, to which a great deal of interest was directed owing to its historical character. A steel plate imbedded in the table bears the following inscription which speaks for itself:—"Upon this table, on board Her Majesty's ship Hesper, under the command of Rear-Admiral Munday, Garibaldi and the Neapolitan General Letizia concluded an armistice which led to the fall of Naples, and the establishment of the Kingdom of Italy." Adjoining apartment of the Admiral is separated off this cabin, with a swinging table in the centre, toilet tables, and wardrobe-room furniture. We next passed through a hatchway to the main deck, beneath the upper deck, on the starboard side of which is the Captain's cabin, very neatly arranged with select and suitable furniture. The Royal Alfred has a mast amidship only, which is known as a battery section. The armour plating of this section of the ship is six inches and a-half thick, supposed to be impenetrable from shot of the largest size. It contains 10 nine-inch guns of the pattern, which throw a shell weighing 250 pounds. The following brief description of this gun was given us by William Armstrong, the inventor, of a 12-pounder field piece, at the meeting of the institution of Civil Engineers in London, and may be read with interest in this place:—"The gun is composed wholly of wrought iron, and the prominent feature in its manufacture is the application of material in the form of long bars, which are coiled into spiral tubes, and then welded by forging. For the convenience of manufacture these tubes are made in lengths of from two to three feet, which are welded together when necessary by welded joints. From the muzzle of the trunnions, the gun is made in one thickness, and is, therefore, so far as that portion is concerned, strictly analogous to the barrel of a gun-piece. Behind the trunnions, two additional layers of material are supplied. The internal layer consists like the inner tube, of spiral coils, but the intermediate layer is composed of iron slabs, bent into a cylindrical form, welded at the edges. The reason of this destruction is that the intermediate layer has chiefly to sustain the shock on the breech, and it is therefore desirable that the fibre of the iron should be in the direction of the length, while elsewhere in the gun it is more advantageous to have it applied in the transverse direction. The breech end of the gun receives the breech screw, which presses against a movable block or stopper, for closing the bore. The screw is hollow, and when the stopper is removed the passage through the screw may be regarded as a prolongation of the bore. The bore is three inches in diameter and is rifled with 34 small grooves, having the driving side rectangular and radial, the opposite side rounded. The bore is widened at the breech end one-eighth of an inch, so that the shot may enter freely when it commences of the bore. The process of loading is effected by placing the projectile with the cartridge and a greased wad in the hollow of the breech screw, and thrusting them either separately or collectively by a rammer into the bore. The stopper is then dropped into its place, and secured by half a turn of the screw. The gun is fired by the friction tube, the vent being concealed by the stopper. The initial velocity of the shot of a 12-pounder is about 1,450 per second. In naval service the gun is fired by means of a detonating tube, which generally resembles the friction tube, and is ignited by percussion. A ham mer attached to the gun is moved by a cord, which strikes on the crown of the tube, thereby causing immediate ignition and the discharge of the gun." The Royal Alfred is worked by means of a screw, turned by horizontal horizontal engines, and can, notwithstanding her massive weight, of twelve or fourteen knots an hour. The engine room the same scrupulous cleanliness can be seen. The frame, crossheads, cranks, steam chests, and in fact all interior parts of the engine, are polished bright as silver, and can be handled without fear of soiling a new kid glove. The pumps and condenser are placed beneath, and are worked by an independent connecting rod, leading from the main shaft. In ordinary steamers it is usual to have one piston rod in each cylinder, but in this engine, owing to the great strength and weight, is constructed with two piston rods, having about five inches in diameter each. The cranks are composed solid wrought iron, which is necessary to resist the great strain upon them when the engine is in motion. The eccentric, a beautiful and intricate piece of mechanism, used for the purpose of moving the valves by means of a rod, is also in a perfect state of polish, and much admired by the visitors. She has six boilers, with four furnaces in each, making twenty-four-furnaces in all to be supplied with fuel when steam is up. The coal is dropped from the bunker and shot into an iron bucket which is suspended to a bar running the full length of the furnace range. When coal is required at any particular furnace, the bucket is filled and pushed upon a roller fitted on to the iron bar and capsized at the spot where wanted. The men were seated at their mess tables on the middle deck, engaged in a variety of ways. They appeared perfectly happy and contented, some passing their time singing, chatting and cracking jokes, while others were more profitably employed reading magazines and newspapers, and mending their clothes. They are divided into messes for the convenience of the commissariat. There are about 24 or 25 men in each mess, presided over by a petty officer or leading seaman. The British tar is a perfect tailor, and makes with his own hands the greater portion of his wearing apparel. One thing can be said in his favour; he is extremely polite and attentive to his guest. On Thursday, the men who conducted the visitors through the ship were exceedingly polite and attentive, ready at any moment to offer all explanations within their power. The screw shaft and passage leading to the end of the vessel is also an interesting spot in the ship and worthy of a visit. On one side of this passage is placed the magazine for ammunition, As no lights in lanterns or otherwise are allowed to enter the Magazine, it is fitted up with glass bulls eyes, through which the light is reflected. The magazine is kept cool by the introduction of air by means of a fan ventilator, and to prevent the possibility of any accident. We could occupy a great deal more space in describing the innumerable points of interest in this vessel, but we are prevented from doing so for want of space. The Royal Alfred, as we were informed by our young guide, is 298 feet long, with 59 feet breadth of beam. A portion fore and aft of the mid, or battery section, is without armour, but the bow and stern are sheathed like the battery section. She has in addition to the guns abovenamed height seven-inch guns capable of throwing a 100 lbs. shot. Her tonnage is 4,073, and she draws 29 feet of water.

The Royal Alfred, as we were informed, will remain in port a few days longer, during which time we hope another opportunity will be given to our citizens to pay her a visit.—*Quebec Chronicle.*

Special Notices.

AMERICAN HOUSE,
BOSTON, MASS.,

The largest first-class Hotel in New England, offers to Tourists, Families, and the Travelling Public, accommodations and conveniences superior to any other Hotel in the city. During the past season additions have been made of numerous suits of apartments, with bathing rooms, water closets, &c., attached; one of Tutt's magnificent passenger elevators, the best ever constructed, conveys guests to the upper storey of the house in one minute; the entries have been newly and richly carpeted, and the entire house thoroughly replenished and furnished, making it, in all its appointments, equal to any hotel in the country.

Telegraph Office, Billiard Rooms, and Cafe on the first floor.

LEWIS RICE & SON,
August 8. Proprietors.

HALL'S VEGETABLE SICILIAN HAIR RENEWER.

ITS EFFECT IS

MIRACULOUS.

It is a perfect and wonderful article. Cures baldness. Makes hair grow. A better dressing than any "oil" or "pomatum." Softens brash, dry and wiry hair into Beautiful Silken Tresses. But, above all, the great wonder is the rapidity with which it restores GRAY HAIR TO ITS ORIGINAL COLOUR.

The whitest and worst-looking hair resumes its youthful beauty by its use. It dose not dye the hair, but strikes at the root, and fills it with new life and colouring matter.

The first application will do good; you will see the NATURAL COLOUR returning every day,

AND BEFORE YOU KNOW IT,

the old gray, discoloured appearance of the hair will be gone, giving place to lustrous, shining and beautiful locks.

Ask for Hall's Sicilian Hair Renewer; no other article is at all like it in effect.

See that each bottle has our private Government Stamp over the top of the bottle. *All others are imitations.*

For sale by all druggists.

R. P. HALL & Co., Nashua, N.H., Proprietors.

Thirty Years' Experience of an old Nurse.

Mrs Winslow's Soothing Syrup is the prescription of one of the oldest Female Physicians and Nurses in the United States, and has been used for thirty years with never failing safety and success by millions of mothers and children, from the feeble infant of one week old to the adult. It corrects acidity of the stomach, relieves wind colic, regulates the bowels, and gives rest health, and comfort to mother and child. We believe it to be the best and surest remedy in the World, in all cases of DYSENTERY and DIARRHŒA IN CHILDREN, whether it arises from teething, or from any other cause. Full directions for using will accompany each bottle. None genuine unless the fac-simile of CURTIS & PERKINS is on the outside wrapper. Sold by all Medicine Dealers. 25 cents a bottle. Office, 215 Fulton Street, New York; and 205 High Holborn, London.

Be sure and call for

"Mrs Winslow's Soothing Syrup,"

having the *fac-simile* of "Curtis & Perkins" on the outside wrapper. All others are base imitations.

Sore Throat, Cough, Cold,

and similar troubles, if suffered to progress, result in serious Pulmonary, Bronchial, and Asthmatic affections, sometimes incurable.

BROWN'S BRONCHIAL TROCHES

are compounded so as to reach directly the seat of the disease and give almost instant relief.

The TROCHES are offered with the fullest confidence in their efficacy; they have been thoroughly tested and maintain the good reputation they have justly acquired. For Public Speakers Singers, Military Officers, and those who overtax the voice, they are useful in relieving an Irritated Throat, and will render articulation easy. Being of true merit, and having *proved* their efficacy by a test of many years, each year finds them in new localities in various parts of the world, and the *Troches* are universally pronounced better than other articles.

OBTAIN only "BROWN'S BRONCHIAL TROCHES," and do not take any of the *Worthless Imitations* that may be offered.

Batchelor's Hair Dye.

This splendid Hair Dye is the best in the world; the only true and perfect Dye; harmless, reliable, instantaneous; no disappointment; no ridiculous tints; remedies the ill effects of bad dyes; invigorates and leaves the Hair soft and beautiful *black or brown*, Sold by all Druggists and Perfumers; and properly applied at Batchelor's Wig Factory, No. 16 Bond street, New York.

Philosophy of Marriage.

A new Course of Lectures, as delivered at the New York Museum of Anatomy embracing the subjects:—How to live and what to live for; Youth, Maturity, and old Age; Manhood generally reviewed; The cause of indigestion; Flatulence and Nervous Diseases accounted for; Marriage philosophically considered, &c., &c. Pocket volumes containing these Lectures, will be forwarded post-paid, on receipt of 25 cents, by addressing "SECRETARY, New York Museum of Anatomy and Science, 618 Broadway, New York."

Dr Record's Essence of Life,

The only unquestionable and absolute remedy for Nervousness, Debility, and Restoration to Manhood. The medicine, taken for four weeks, cures as certain as water quenches thirst. Sold in Bottles at $3 (in gold), or four times the quantity for $9. To be had from the Agent,

E. BAYLIS,
Aug 4. 38 Bond Street, New York.

Hunt's Empire Hair Gloss is put in large bottles for 25 cents.

July 29.

ADDRESS TO THE NERVOUS AND DEBILITATED, whose sufferings have been protracted from hidden causes, and whose cases require prompt treatment to render existence desirable: If you are suffering, or have suffered from involuntary discharges, what effect does it produce upon your general health? Do you feel weak, debilitated, easily tired? Does a little extra exertion produce palpitation of the heart? Does your liver, or urinary organs, or your kidneys, frequently get out of order? Is your urine sometimes thick, milky, or flocky, or is it ropy on settling? Or does a thick scum rise to the top? Or is a sediment at the bottom after it has stood awhile? Do you have spells of short breathing or dyspepsia? Are your bowels constipated? Do you have spells of fainting, or rushes of blood to the head? Is your memory impaired? Is your mind constantly dwelling upon this subject? Do you feel dull, listless, moping, tired of company, of life? Do you wish to be left alone, to get away from everybody? Does any little thing make you start or jump? Is your sleep broken or restless? Is the lustre of your eye as brilliant? The bloom on your cheek as bright? Do you enjoy yourself in society as well? Do you pursue your business with the same energy? Do you feel as much confidence in yourself? Are your spirits dull and flagging, given to fits of melancholy? If so, do not lay it to your liver or dyspepsia. Have you restless nights? Your back weak, your knees weak, and have but little appetite, and you attribute this to dyspepsia or liver-complaint?

Now, reader, self-abuse, venereal diseases badly cured, and sexual excesses, are all capable of producing a weakness of the generative organs. The organs of generation, when in perfect health, make the man. Did you ever think that those bold, defiant, energetic, persevering, successful business-men are always those whose generative organs are in perfect health? You never hear such men complain of being melancholy, of nervousness, of palpitation of the heart. They are never afraid they cannot succeed in business; they don't become sad and discouraged; they are always polite and pleasant in the company of ladies, and look you and them right in the face—none of your downcast looks or any other meanness about them. I do not mean those who keep the organs inflated by running to excess. These will not only ruin their constitutions, but also those they do business with or for.

How many men, from badly-cured diseases, from the effects of self-abuse and excesses, have brought about that state of weakness in those organs that has reduced the general system so much as to induce almost every other disease—idiocy, lunacy, paralysis, spinal affections, suicide, and almost every other form of disease which humanity is heir to, and the real cause of the trouble scarcely ever suspected, and have doctored for all but the right one.

Diseases of these organs require the use of a Diuretic.

HELMBOLD'S FLUID EXTRACT BUCHU

Is the great Diuretic, and is a certain cure for diseases of the Bladder, Kidneys, Gravel, Dropsy, Organic Weakness, Female Complaints, General Debility, and all diseases of the Urinary Organs, whether existing in Male or Female, from whatever cause originating, and no matter of how long standing.

If no treatment is submitted to, Consumption or Insanity may ensue. Our flesh and blood are supported from these sources, and the health and happiness, and that of Posterity, depends upon prompt use of a reliable remedy.

Helmbold's Extract Buchu, established upward of 18 years, prepared by H. T. HELMBOLD, Druggist, 494, New York, and 104, South 10th Street, Philadelphia, Pa. PRICE—$1,25 per bottle, or six bottles for $6 50, delivered to any address. Sold by all Druggists everywhere.

None are genuine unless done up in steel-engraved wrapper, with fac-simile of my Chemical Warehouse, and signed

H. T. HELMBOLD.

EFFECT OF ADVERTISING.—It is amusing at times to observe the stores of the merchants who don't advertise; to see the anxious proprietors looking into the streets and see the people go by, wondering why they don't come in, while the stores of their neighbours who do advertise are thronged with customers. Some people will learn by observation, others will not.—*Daily Palladium.*
