The Daily News,

MONDAY EVENING, NOV. 30.

☞ *SEE FIRST PAGE.*

A DOUBLE SURPRISE.

The New York *Sun* gives the following particulars of a surprise party which took place at the residence of young widow B., in Hoboken, N. J., a few evenings since:

A party of congenial spirits had arranged a surprise party for the fun loving widow, and fixed upon a certain evening for carrying out their design. In the meantime, the widow had fixed upon the same evening for uniting her destiny with that of a gay and festive bachelor from Williamsburgh. It was intended to have the wedding come off secretly, as the widow wished to surprise her friends the next day by appearing in her new *role* of the "wife." The bridal party, consisting of the minister, the widow and a female friend, the "gay bach" and a male friend, had gathered in the back parlour, the marriage ceremony was about to commence, when ting-a-ling-a-ling went the door bell, in rushed a bevy of laughing, chatting belles and beaux, and in a moment the front parlour was taken possession of by the jolly group. The interesting ceremony to take place on the other side of the folding doors was suspended, and the widow, comprehending the situation, resolved not to wait till morning before surprising her friends, but to spring the grand *coup* upon them at once. Sliding back the double doors, the blushing bride stood before her astonished visitors, arrayed in bridal robes, and addressed them as follows: "My friends, I perceive that you intend this as a pleasant surprise for my enjoyment, and as one good deserves another, I offer you a surprise in return. As you came in I was on the point of being married to my friend Mr W ——, of Williamsburgh; please arrange yourselves and witness the ceremony." It is needless to add that the party remained, and everything went off as merry as several marriage bells.

THE MURDER OF POLLARD IN RICHMOND.

The following are the particulars of the tragedy which took place in Richmond, Va., on Tuesday morning: On Saturday a report was published in the *Southern Opinion* relative to the elopement of the daughter of William H. Grant, a wealthy tobacconist of Richmond. On Tuesday morning about ten o'clock, as H. Rives Pollard, the editor of the paper, was near his office door, corner of Main and Fourteenth streets, going in, a shot was fired from the upper window of a building opposite. Mr Pollard immediately fell dead, eleven buckshot having entered his body, one passing through his heart. The police searched the building and found James Grant, a brother of the lady named, in a room. He surrendered and was taken to the station house. A double-barrelled gun, with one barrel discharged, was found in the room.

Another despatch states:

A reaction has set in since morning, when a crowd cheered for the slayer of Pollard, and there are very few, now that the facts have been made public and are comprehended, who do not denounce the manner in which he was killed. Grant was found locked in the room, from the window of which the shot was discharged. He was alone, and a gun was found there with one barrel still loaded. No one was seen to fire from the window, and Grant neither admits nor denies that he did it. The joy with which the editor's murder was received has been greatly tempered.

Mr Pollard was struck with nine buckshot, one of which penetrated the heart; the others went in the neck, face and breast. An inquest is being held, and Grant is in gaol, receiving the congratulations of his friends and Pollard's enemies. Pollard's paper has lately assaulted a number of people in a very coarse manner, and many desired his death who feared to attempt his life openly. He was heavily armed when shot, but was unconscious of danger, as he was about to enter his office, with his gloves in one hand and his cane in the other.

Richmond, Va., Nov. 26.—E. A. Pollard has arrived here, and published a card, which appeared after dark in an extra of the *State Journal*. He says he comes for justice, and not for vengeance; that he will devote himself entirely to the matter, and if the civil authorities do not bring the assassin to trial, he will invoke the power of the military, under the Reconstruction acts, and that he will not allow another number of the *Opinion* to be published. The following is the card:

Richmond, Nov. 26.—Before I left New York yesterday, I had read the despatches sent from Richmond gloating over my poor brother's death. As to the brutal joy over such an event: as to the crowd, probably the base cowards who had watched in the street for the consummation of the deed of blood, cheering an assassin who had shot his victim from a three-storey window, secreted and locked in a room; to this hideous salutation of death; as to this man, reeking with murder, "receiving the congratulations of his friends," allowed the freedom of the office of the Police Chief; as to his being unconfined, unconcerned; as to efforts to put justice at defiance; as to a Coroner's jury on their oaths declaring that death was "caused by an unknown person"—let these things stand to the shame of their perpetrators, and write their own commentary on the chivalry of Richmond. They shame not me, they shame not the dead. My heart is sufficient to him. No man can insult my tears. I come to claim but one thing, "Justice." Whatever were the offences of my poor brother, every man deserves justice. We boast that it is equal and exact to all. Is assassination not murder? Is it ever justifiable? Is the element of assassination ever to be allowed in any mode of taking redress? And where, in the black achievement and crooked paths of crime, has there been the equal of this deed? Considering all its circumstances, where has the post of the assassin, the place of concealment, ever before been chosen with such hideous solicitude for his own safety? Where has cowardice ever before barricaded itself with such dastardly pains? Let justice be done. Let all true people reconsider. I am far from defending the article which has been referred to in my brother's paper. I deeply regret it, but my brother did not write it. The murderer never inquired for the real author. He never asked any word of explanation. He never applied to have the article corrected. He took not one single measure which the brave man, no matter how wronged, always takes before he comes to the last resource of blood. He went without one alternative to that resource, and he went where no one but the coward treads—on the path of the assassin.

EDWARD A. POLLARD.

Prussia, in view of her deficit, is retrenching vigorously. Literally the first thing at the re-assembling of the Chambers last week was the communication of an official letter to the legislators themselves, which abrogated the only privilege they had hitherto enjoyed, viz. the exemption from paying any postage for their letters, a matter of some little moment in a country not blessed as yet with a low and uniform rate. The Senators, taken utterly by surprise, were for an instant doubtful what to say to this revelation, but they soon recovered their equanimity, made *bonne mine au mauvais jeu*, and cheered it amid loud laughter.

THE HIGHEST BALLOON ASCENT.

One dull day in August, just after noon, a balloon rose in the air at the foot of Cleet Hills, on the western edge of the central plain of England. It was inflated with the lightest of gases which chemical skill could produce, and it rose with amazing velocity. A mile up and it entered a stratum of clouds more than a thousand feet thick. Emerging from this, the sun shone brightly on the air ship; the sky overhead was of the clearest and deepest blue, and below lay cloudland—an immeasurable expanse of cloud, whose surface looked as solid as that of the earth now wholly lost to view. Lofty mountains, and deep, dark ravines, appeared below; the peak and sides of those cloud mountains next the sun glittered like snow, but casting shadows as black as if they were solid rock. Up rose the balloon with tremendous velocity. Four miles above earth a pigeon was let loose; it dropped down through the air as if it had been a stone. The air was too thin to enable it to fly. It was as if a bark laden to the deck were to pass from the heavy waters of the sea into an inland unsaline lake; the bark would sink at once in the thinner water. Up, up, still higher! What a silence profound! The heights of the sky were as still as the deepest depths of the ocean, where, as was found during the search for the lost Atlantic cable, the fine mud lies as unstirred from year to year as the dust which imperceptibly gathers on the furniture of a deserted house. No sound, no life—only the bright sunshine falling through a sky which it could not warm.

Up—five miles above earth!—higher than the inaccessible summit of Chimborazo or Dawangiri. Despite the sunshine, everything freezes. The air grows too thin to support life, even for a few minutes. Two men only are in that adventurous balloon—the one steering the air ship, the other watching the scientific instruments, and recording them with a rapidity bred of long practice. Suddenly, as the latter looks at his instruments, his sight grows dim; he takes a lens to help his sight, and only marks from the falling barometer, that they are rising rapidly. A flask of brandy lies within a foot of him; he tries to reach it, but his arms refuse to obey his will. He tries to call on his comrade, who has gone up into the ring above; a whisper in that deep silence would suffice—but no sound comes from his lips—he is voiceless. The steersman comes down into the car; he sees his comrade in a swoon, and feels his own senses failing him.

He saw at once that life and death hung upon a few moments. He seized or tried to seize the valve in order to open and let out the gas. His hands are purple with intense cold—they are paralyzed, they will not respond to his will. He seized the valve with his teeth, it opened a little—once, twice, thrice. The balloon then began to descend. Then the swooned marksman returned to consciousness, and saw the steersman standing before him. He looked at his instrument; they must have been nearly eight miles up; but now the barometer was rising rapidly, the balloon was descending. Brandy was used. They had been higher above earth than mortal man or any living thing had ever been before. One minute more of action—of compulsory inaction—on the part of the steersman, whose senses were failing him, and the air ship, with its intensely rarified gas, would have been floating unattended, with two corpses, in the wide realm of space.—*Once a Week*

LEASES—Forms of Leases and other descriptions of Law Printing kept in stock at the Daily News Office. Every description of printing done to order.

Kingston and Gananoque Route.

THE Steamer PIERREPONT, C. Hinckley, Jr., Master, will run as under.
LEAVE KINGSTON
On Tuesdays, Wednesdays, and Fridays at 3:30 P.M.
LEAVE GANANOQUE.
On Wednesdays, Fridays, and Saturdays, at 6 A.M.
For Freight or Passage apply to Captain on board, or to
G. M. KINGHORN.
Ferry Wharf, foot Brock Street.
Kingston, 24th Oct. 1868.

Kingston and Wolfe Island Ferry.
CHANGE OF HOURS.
COMMENCING MONDAY, 26th instant, one of the Ferry Steamers will run as under:

Leave Kingston daily, At 11:30 a.m. 3:30 p.m.	Leave Wolfe Isl'd daily, At 9 a.m. 1 p.m.

ON MONDAYS, TUESDAYS, & SATURDAYS,

8 a.m.	7:30 a.m.

ON MONDAYS AND SATURDAYS,

	4 p.m.

SUNDAY TRIPS.

Leave Kingston, 9:00 a.m. 1:15 p.m.	Leave Wolfe Island, 9:30 a.m. 3 p.m.

G. M. KINGHORN,
Ferry Wharf, foot Brock Street.
Kingston, October 24, 1868.

DAILY BOAT
For Bath Picton and Belleville.
THE ROYAL MAIL STEAMER
Bay of Quinte,
CAPTAIN FRANK COMER.
WILL LEAVE THE ST. LAWRENCE WHARF, foot of Johnson Street, for the above and intermediate ports, every day (Sundays excepted) at FOUR O'CLOCK,
Returning, leaves Belleville every morning (Sundays excepted) at SIX o'clock, a.m.
For rates of Freight and Passage apply to the Captain on board, or to
J. SWIFT & Co.,
Freight Agents.
C. H. HATCH,
Passenger Agent.
Kingston, April 20, 1868.

TIDMAN'S SEA SALT, for producing a real Sea Bath in your own Room. The above favourite preparation is strongly recommended.
Sole Proprietors—TIDMAN & SON, Chemists, 16 Wormwood Street, London, E.C.

EUGENE RIMMEL,
PERFUMER by appointment to their Majesties the Emperor of the French, the Queen of Spain, the Queen of Holland, the Queen of the Belgians, and the King of Portugal; and H.R.H. the Prince of Wales.

Toilet Soaps.	Toilet Powders.
Lavender Water.	Portable Fountains.
Cold Cream.	Toilet Vinegar.
Perfumed Vaporizer.	Hair Preparations.
Rose Leaf Powder.	Tooth Powders.
Perfumes for the Handkerchief.	Glycerine Toilet Requisites.
Eau de Cologne.	

All the above are carefully prepared for Exportation, and retain their excellent qualities in any climate.
96 Strand; 128 Regent Street; 24 Cornhill, London. 17 Boulevard des Italiens, Paris.

DR. VICTOR BAUD'S ORGANIC MEDICINE.
DR V. BAUD, Graduate and Member of the Medical College of Paris, Chief Physician Extraordinary for Epidemics in Paris, late M.D. of the Civil Hospitals of Algiers, has just introduced in England his ORGANIC MEDICINES.
They consist of three preparations—
THE BAUDEINE,
An efficient and prompt Remedy for Cholera, Yellow Fever, Diarrhœa, Dysentery, and the excessive action of the Bowels. A gold medal was awarded by the French Government to Dr V. Baud for this valuable preparation.
Price: Small, 1s 1½d; Medium, 4s 5d; Large Size, 11s per Bottle.
THE DIASTATIZED IRON,
For strengthening the System.—Price 2s 9d per Bottle.
THE DIASTATIZED IODINE,
For purifying the Blood.—Price 2s 9d per Bottle.
*** The above Preparations are in the form of Sweetmeats, pleasant to the taste, and particularly adapted for Infants and Mothers nursing.
By the combination of the Iron or Iodine with Cress Seeds in a state of germination, they are united with organic life, which thus renders them digestible. The irritative and stubborn mineral has thus become the nucleus of an organic substance capable of being absorbed by the blood without injury to the stomach.
Agent for England and British Possessions, E G. DUFRESNE, 79 Watling Street.
May be obtained of all Chemists.

CHOLERA, DIARRHŒA, &c.
EARL RUSSELL sent to the College of Physicians a communication received by him from Manilla (where cholera had been graing fearfully) to the effect that, of all remedies tried, Chlorodyne was the most effective.
"The day seems as yet, unhappily, far distant when public opinion or State interference will prevent the advertisement or sale of any secret medicine whatsoever. It is to be hoped that the profession will continue to brand as unworthy the conduct of those of its members who by testimonial or otherwise aid the disposal of such things."—*Lancet.*
TOWLE'S CHLORODYNE.
The Original Preparation of known Composition.
From Dr C. Kidd, Author of Standard Works on Chloroform.
Sackville-street, Piccadilly, London.
Sir,—I think if you would advertise your Chlorodyne more than you do, you would help to beat the others, which are secret compounds, out of the market. Many medical men think with me, and recommend your compound, but will never prescribe a secret remedy. CHARLES KIDD, M.D.
To Mr Towle, Chemist, Manchester.
A Surgeon from New York writes:—"I only requires to be known to be appreciated. I have no hesitation in characterising it (viz., Towle's Chlorodyne) as the most useful medicine that has appeared during the present century. In diarrhœa, colic, ague, spasms, I have found it to relieve more pain and cause more joy than any other article that can be named."
NOTE.—The Profession is warned against inferior, secret, and cheap compounds now in the market. Each genuine bottle bears a facsimile of Proprietor's signature on the stamp outside.
LIQ. CHLOROFORMI Co. OR CHLORODYNE WITHOUT PEPPERMINT.
Sole Manufacturer:—A. P. Towle, Chemist, Manchester.

DR COLBY'S ANTI-COSTIVE & TONIC PILLS.
SUGAR-COATED
ARE a safe and reliable remedy in all diseases of the *Stomach, Liver* and *Bowels*. They are not *Quack* Medicines puffed up by high sounding testimonials from imaginary people, but are the result of forty years experience of a first-class physician, and their extraordinary success is due to the fact that they answer exactly their name. The formula from which they are prepared, is based on sound, scientific principles, and has received the unqualified approbation of the *medical profession*. They do not profess to be a cure-all, but for all diseases arising from any derangement of the *Stomach, Liver* and *Bowels*, they furnish an effectual remedy. We have in our possession, over one hundred testimonials from physicians who have used them in their practice and highly approve of them, among which are the following:
J. H. GIBSON, M. D., Dunham, C. E.
C. E. COTTON, M. D., Cowansville.
CHARLES BROWN, M.D., Cowansville.
S. S. FOSTER, M. D. Broome.
J. C. BUTLER, M. D., Waterloo.
JOHN ERSKINE, M.D., Waterloo.
NORMAN CLEVELAND, M. D., Barnston.
N. JENKS, M. D. Barnston.

JOHN MEIGS, M. D., Stanstead.
JOSEPH BREADON, M. D., Surgeon, R N.
BENJAMIN DAMON, M.D., Coaticook.
LEMEUL RICHMOND, M.D., Derby Line.
WINSLOW LEWIS, M.D., Boston.
R. D. MUSSY, M. D., Boston.
F. J. AUSTIN, M.D., Sherbrooke.
E. D. WORTHINGTON, M. D., Sherbrooke.
Henry Simpson & Co., Montreal, Wholesale Agents.

JACOBS' RHEUMATIC LIQUID.
IS A SPECIFIC for Rheumatism or Lameness of any kind, Swelling of the Joints, Sore Throat, Cold in the Head and Diphtheria, Burns or Frost Bites, Scratches on horses, &c.' &c.,
JACOBS' RHEUMATIC LIQUID.
Is an internal as well as an external remedy, and is the only one that *always* gives entire satisfaction, and all who once use it will never consent to change it for any other.
We have not space to enumerate the virtues accorded to it by thousands who have used it, and voluntarily testify to its merits. Buy a bottle and satisfy yourself that it is the best remedy ever offered.
Henry Simpson & Co., Montreal, Wholesale Agents.

HUNT'S EMPIRE HAIR GLOSS.
THE BEST Tonic Hair Dressing ever discovered. It effectually cleanses the scalp, prevents the Hair from falling off or turning prematurely gray, and when the follicles and glands are not destroyed, will produce a new and luxuriant growth of hair where it has already disappeared.
It is the cheapest as well as the best, being only 25 cents for a large bottle. Buy it, try it, you'll like it and recommend it to your friends.
Henry Simpson & Co., Montreal, Wholesale Agents.

THE ORIGINAL CHLORODYNE, invented by R. Freeman, Pharmaceutist, is allowed to be one of the greatest discoveries of the present century. It is largely employed by the most eminent Physicians and Surgeons in hospital and private practice in all parts of the world. It has effects peculiar to itself, and which are essentially different to those produced by the various compounds bearing the name of Chlorodyne, but have no pretence to possessing its virtues. It rapidly relieves pain, from whatever cause, allays the irritation of fever, soothes the system under exhausting diseases, and gives sleep without producing any one of the unpleasant feelings so commonly arising from the use of opiates. It continues to hold its unshaken position in the estimation of the Profession as the best, most reliable, and cheapest preparation. Eminent and scientific Physicians made affidavits that they have tested its effects in careful comparison with those of "DR. COLLIS BROWNE'S CHLORODYNE," and deposed to the facts that they found it a more certain and reliable preparation, and greatly preferred "FREEMANS."
Earl Russell communicated to the Royal College of Physicians and to Mr Freeman, that in Manilla the only remedy of any use in Cholera was Chlorodine.
The Medical Times and Gazette, January 13th, 1866, states, "It has an immense sale amongst the public, and is prescribed by scores of Orthodox Medical Practitioners, and, of course, it would not be thus singularly popular did it not supply a want and fill a place."
Manufactured by the Inventor, Richard Freeman, 70, Kennington Park Road, London, S.
The genuine has engraved on the Government Stamp (outside each Bottle), "FREEMAN'S ORIGINAL CHLORODYNE."

CONDY'S PATENT FLUID or natural disinfectant purifies, deodorises, and disinfects, by the agency of nascent or ozonic oxygen,—its active principle. Being entirely innoxious, this truly scientific preparation is peculiarly adapted for the following useful purposes, for which all other disinfectants, on account of their poisonous or other objectionable qualities, are unavailable and useless:—
Detecting organic impurities in air and water.
Purifying drinking and other water from organic matter, lead, &c.
Freshening the air of close places, and removing bad smells.
Freeing meat, fish, butter, or other provisions from taint.
Counteracting the effects of organic poisons taken into the stomach.
Curing Musty provender. Freeing wheat and other seed from smut.
Maintaining the health of plants in pots and conservatories.
Preserving and restoring the freshness of cut flowers kept in water.
Destroying the blight of the potatoe, vine, hop, mulberry tree, &c.
Washing dogs and other domestic animals.
Cleansing bottles, beer barrels, pickling tubs, dairy utensils.
Washing the hair and darkening its colour when turning grey.
Enhancing the purifying and invigorating effects of baths and tubs.
Dressing poisoned wounds and destroying animal virus
Treating the infectious diseases of cattle, horses, dogs, &c.
One gallon makes 200 to 300 gallons adapted for use.
N.B.—Condy's Fluid is the Standard Scientific Test for Organic Matter in Water, and affords the only known means of rapidly and completely freeing Drinking Water from Organic Taint, which is so common a cause of serious disease.
To rapidly purify the air, use the diluted fluid with "Condy's Ozoniser" or other Spray-producer.
CONDY'S PATENT OZONISED WATER,
(FOR TOILET PURPOSES,)
Removes from the mouth impure and foreign tastes and odours, whether arising from tobacco or other causes, and counteracts the irritation and morbid secretions of carious teeth. It purifies and softens the skin, and, used in the bath, tends to promote a healthy state of the whole body.
H. BOLLMAN CONDY,
Patentee, Battersea, London.

JUDSON'S SIMPLE DYES FOR THE PEOPLE. Any one can use them; anything can be dyed with them. It is impossible in this small space to enumerate the many uses to which these wonderful and beautiful chemical preparations can be applied; while their chief use is for dyeing textile fabrics, they are also invaluable as a colouring agent for almost every known material, the ease with which they can be used and the brilliancy of the result being, indeed, almost magical. By their use almost any article of clothing can be dyed in a few minutes for a few pence without soiling the hands.
MEMORANDA.
MAGENTA: The strength and beauty of this dye is almost incredible. A Sixpenny bottle will dye 20 yards of Bonnet Ribbon in 10 minutes; it will also produce a clear Rose Pink by using less dye. Suitable also for Woollen Goods, Feathers, Silks, &c.
WOOLLENS: Magenta, Mauve, Violet, Purple, Orange, Pink, and Crimson produce the most satisfactory results. Use a large quantity of boiling water in an earthen pan. RIBBONS and SILKS: Brush them with soap and water to avoid creases, and to render them clean. Dye in boiling water.
FEATHERS: Dye in hot water (a few drops of the dye is sufficient for one feather).
COTTON: Mauve, Violet and Purple are recommended.
LEATHER: Blue, Magenta, Violet and Orange. Dye in warm water.
WHITEWASH: To color: *Magenta*, for Pink or Rose; add half a bottle to a pail of water, then stir in the Whitening as usual. Mauve, Violet, Purple, Blue and crimson produce pretty tints by using one bottle or more, as directed above.
STARCH: Stir in a few drops of Colour—Magenta, Mauve, Violet, Blue or Pink; these impart delicate tints to Lace, Linen, &c.
WILLOW SHAVINGS, Wicker, Ivory, Bone, Hair, Fibres, Seaweed, &c., attract the dye quickly, if applied in boiling water.
BLUE: For laundry purposes is A 1.
BOOK EDGES: A Sixpenny bottle of Magenta, Violet, Crimson or Blue will make from a pint to a quart of beautiful colouring, according to shade required. Apply with a brush.
PAPER and WOOD STAIN: Ditto.
OAK STAIN: A bottle of No. 2 Black to half a-pint of hot water.
SATINWOOD STAIN: A Sixpenny bottle Canary dissolved in a pint of boiling water
PHOTOGRAPHS may be tinted; dilute the dye with water; a bottle of Magenta to a pint of water, &c.
ILLUMINATING: Magenta, Violet, Blue, Orange; pour a few drops into an egg cup add warm water; use with a brush or pen Borders of books, similar to Ward and Lock's Arabian Nights, &c., may be prettily illuminated in this manner.
BLANCMANGE, JELLY, CORN FLOUR, ICE CREAMS, &c: While in a liquid state add one or two drops of Magenta. A more simple or elegant tinting cannot be had.
CONFECTIONERS will find Magenta, Violet Orange and Pink useful colours.
GELATINES and GLUES are successfully coloured with these dyes.
INK: A Sixpenny bottle of Magenta to a pint or more of cold water.
WATER: One drop of dye will tint a quart.
PRINTING on Cotton, Silk or Wool in the ordinary way.
BLENDING some of the dyes in the bath will produce an infinity of shade, according to taste.

LEA AND PERRINS' Worcestershire Sauce. This delicious Condiment, pronounced by connoisseurs "The only good sauce," is prepared solely by Lea and Perrins. The Public are respectly cautioned against worthless imitations, and should see that Lea and Perrins' Names are on Wrapper, Label, Bottle, and Stopper. Ask for Lea and Perrins' Sauce.
Sold Wholesale and for Export, by the Proprietors, Worcester; Messrs. Crosse and Blackwell; Messrs. Barclay and Sons, London; &c.-&c.; and by Grocers and Oilmen universally

BLACKWOOD'S EDINBURGH MAGAZINE (Tory.)
THESE foreign periodicals are regularly republished by us in the same style as heretofore. Those who know them and who have long subscribed to them, need no reminder; those whom the civil war of the last few years had deprived of their once welcome supply of the best periodical literature, will be glad to have them again within their reach; and those who may never yet have met with them, will assuredly be well pleased to receive accredited reports of the progress of European science and literature.

PRICE—$7, for the two volumes. By the post paid, $8.

DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL.
DR. DE JONGH'S Oil is convincingly proved by an overwhelming weight of medical testimony, and by the practical test of successful experience for twenty years in all parts of the world, to be, beyond all question, the purest, the most efficacious, the most palatable, and, from its rapid curative effects, the most economical of all kinds.
Hence the universal celebrity of Dr. de Jongh's Oil, and the unparalleled demand for this unrivalled preparation.
SELECT MEDICAL OPINIONS.
SIR HENRY MARSH, BART., M.D.,
Physician in Ordinary to the Queen in Ireland.
"I have frequently prescribed Dr. de Jongh's Light-Brown Cod Liver Oil. I consider it to be a very pure oil, not likely to create disgust, and a therapeutic agent of great value."
DR. EDWARD SMITH, F.R.S.,
Medical Officer to the Poor Law Board of Great Britain.
"We think it a great advantage that there is one kind of Cod Liver Oil which is universally admitted to be genuine—the Light-Brown Oil supplied by Dr. de Jongh. It has long been our practice, when prescribing the oil, to recommend this kind, since, amidst a much variety and uncertainty, we have confidence in its genuineness."—(Extract from "Consumption: its Early and Remediable Stages.")
DR. LANKESTER, F.R.S.,
Coroner for Central Middlesex.
"I consider that the purity of this oil is secured in its preparation, by the personal attention of so good a chemist and intelligent a physician as Dr. de Jongh, who has also written the best medical treatise on the oil with which I am acquainted. Hence, I deem the Cod Liver Oil sold under his guarantee to be preferable to any other kind as regards genuineness and medical efficacy."
DR. LETHEBY,
Medical Officer of Health, and Chief Analyst to the City of London.
"In all cases I have found Dr. de Jongh's Light-Brown Cod Liver Oil possessing the same set of properties, among which the presence of cholaic compounds, and of iodine in a state of organic combination, are the most remarkable. It is, I believe, universally acknowledged that this oil has great therapeutic power; and from my investigations, I have no doubt of its being a pure and unadulterated article."
DR. BARLOW, F.R.S.,
Senior Physician to Guy's Hospital.
"I have frequently recommended persons consulting me to make use of Dr. de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure oil, well fitted for those cases in which the use of that substance is indicated."
DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."
"Dr. Granville has found that Dr. de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the pale oil."
EDWIN CANTON, ESQ., F.R.C.S.,
Surgeon to Charing-cross Hospital.
"For several years past I have been in the habit of prescribing Dr. de Jongh's Light-Brown Cod Liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."

PROGRAMMES AND POSTERS Steamboat and Excursion Bills and Tickets, executed expeditiously at the DAILY NEWS STEAM PRINTING HOUSE Princess Street.

TO A YOUNG MERCHANT—When you pay more for the rent of your business house than for advertising your business, you are pursuing a false policy. If you can do business, let it be known."—FRANKLIN.
