EUGENIA

Rev. McNeill read Psalm 8 as scripture reading and took his text from the 3rd and 4th verses in the same Psalm. He preached a very enthusiastic sermon, emphasizing that God's glory is magnified by his great works and by his love to man. The worldly conditions at the present time apparently have come almost to the precipice and will fall over if a change does not soon take place. The Lord has made man to have control over his works, therefore man should control them in a way that will please God. Some people work on, for their own selfish greed, despise their fellow-men and forget God at all times. Such like help to bring on depression.

CLEAN AND STERILIZE ALL DAIRY UTENSILS

The keeping quality of milk depends directly upon the number of bacteria present and this in turn depends upon the thoroughness with which dairy utensils have been cleaned and sterilized. The use of live steam or scalding with boiling water is always effective providing it is available in sufficient volume, but as a general rule the quantity available on the average farm is inadequate for effective results. It is for this reason that the use of chlorine in suitable form is recommended by bacteriological experts. It acts rapidly in cold water, and is cheaper and more convenient than the heat treatment generally recommended. When properly employed chlorine sterilization gives excellent results and the practice, already general among milk and other food plants is spreading to the dairy farms.

CONDITIONS SERIOUS

The Flesherton Advance:

Dear Sirs,- Conditions here have not started to improve as yet. Farm products are so very cheap that the farmer's buying power is practically gone, and of course that has its effect in all lines of trade, consequently business is very dull. We receive the Advance regularly every week which we appreciate, as it gives us the news of our old stamping ground.

—Wishing you every success, yours truly,
