### THE ERUPTION OF VESUVIUS.

The *Times'* Naples correspondent writes on November 17:—"We have it at last—the most stupendous eruption I have witnessed for many years. As you will remember, Vesuvius, after a long repose, began last year on the 15th of November to give indications of life. Since then it has been more or less active, when on the 8th of last month it flared up very brilliantly, and then sank again to comparative repose. Thus the mountain has been in labour for twelve months, bringing forth at times little more than mice, until at length it has produced a giant. On Saturday night, a column of fire rose continually to a great height, obedient to an impulse which seemed to be given every two or three seconds. The light fell for some miles across the bay, and the waves by their undulations seemed to increase its intensity, giving it the appearance at times of a path inlaid with millions of flashing diamonds, at others of a path of solid fire. On Sunday night the side of the mountain was covered with fire, while the clouds which obscured the summit prevented us from seeing what was going on, though from the redness of the atmosphere above, it was easy to conjecture that the strife of elements was great. On Monday (that is yesterday) the clouds had cleared away, and looking from my window I witnessed, not a column, but a huge body of black smoke, rising, I should say, upwards of 2,000 feet in the air; it was not a rigid column, but through the glass appeared to be formed of innumerable circlets, rolling one over the other, and mingling in their ascent. How grand it was! What an idea of power it gave! Unfortunately for the perfect beauty of the spectacle, a south west wind carried it inland, and we shall doubtless hear of whole districts being covered with that impalpable powder which generally insures a good harvest in the following season. The course of the lava, which flows most abundantly, was marked by a white smoke, which rose all the way from the summit down to a point long past the Atrio del Cavallo. Like the sluggish vapour from a marshy country, it rose slowly and lingered along the whole line, at points, however, ascending to a considerable elevation, suggesting the probability of another huge mouth having been opened. On such a scene it was that the sun, which was then rising, shed its light, irradiating the eastern side of the column, while the other side continued dark. Throughout the day it poured forth its volumes of circling smoke, and when night came such a spectacle presented itself as most persons "would give their eyes" to have seen. No language, I feel, is adequate to a description of its glories. The whole mountain seemed on fire; it was no longer a path of light that I saw, but a long extended sheet of fire, and, as some solitary sail moved across it, one might have imagined that he was looking upon another and not a better world, such a one as the genius of Virgil or Dante might create. This morning precisely the same work is going on, though we cannot see all the operations. Masses of clouds envelope the summit of the mountain, but above them I see the form, as it were, of the disimprisoned giant curling and writhing and stretching high into the heavens. At the base of the cone is visible that line of vapour which indicates that the lava is still flowing rapidly and abundantly."

Mayor Conway, of New Orleans, has appointed a Board of Engineers, at the head of which is Gen Beauregard, to devise a plan for the thorough drainage of the city and its protection from overflow.

Lord Napier of Magdala has departed for India, and will arrive in Bombay in considerably less than a year from the time he quitted that city. Within that period, from a comparatively obscure officer, he has become a General of world-wide note.

Smugglers carry on a large trade of late on the Michigan frontier. At Port Huron, a revenue officer seized 2,367 yards of superfine black silk, smuggled through Canada to Port Huron, on its way to the seaboard, there to be parcelled out. This seizure is asserted to be but a portion of a huge smuggling operation carried on at that port.

The Consistory for the creation of cardinals will be held next March. The Pope will then confer the purple on ten prelates at once, thus filling all the vacancies in the Sacred College, which he desires to see complete for the Œcumenical Council. On this occasion the Pope will restore the Roman Catholic hierarchy of Scotland, establishing a primate at Glasgow, and confer the cardinal's hat on Archbishop Manning.

The *Mobile Register* says Southern planters are better off to-day than they were before the war. They are free from debt, and receiving more for their cotton than ever before. Formerly they were always one crop in debt, and belonged to their factors. Now they have learned economy, and are their own masters.

Mr Sandfield Macdonald is the hardest working man in the House. He is always in his place, maintaining a careful watch over its legislation, and he has something pointed and instructive to say upon every subject of any importance that is brought up for consideration. Besides, he does a prodigious amount of office work.

A member of Congress, who is conspicuous for the part which he has taken in the investigation of frauds, is collecting data for a resolution that he will introduce in the House early in the session, calling for a committee to examine and report on the alleged corrupt use of the money in the Alaska purchase. He says that in his opinion a very large sum of money was used in the lobby at the time the bill for the appropriation of the money to pay for the new Territory was pending in Congress.

A solution is soon anticipated of the difficulties which have existed between Spain and the republics of the Pacific coast. Spain long ago selected the United States as a mediator, and asked for a peace conference to be held at Washington, and to be presided over by our Secretary of State. This proposition was agreed to by Ecuador, Bolivia, and Peru; but Chili, apparently on account of the bombardment of Valparaiso by Spain, but really on account of her domestic affairs, postponed answering as long as possible. It is only known that the delegates selected by Peru, Ecuador, and Bolivia, for the purpose of conferring with Chili on the peace question, have met at the Chilian capital, with what success the despatches by the next South American steamer will tell.

For sale by all Druggists.

**Mrs Winslow's Soothing Syrup.**

Rev. Sylvanus Cobb thus writes in the Boston *Christian Freeman*: We would by no means recommend any kind of medicine which we did not know to be good—particularly for infants. But of Mrs Winslow's Soothing Syrup we can speak from knowledge; in our own family it has proved a blessing indeed, by giving an infant troubled with colic pains quiet sleep, and its parents unbroken rest at night. Most parents can appreciate these blessings. Here is an article which works to perfection, and which is harmless: for the sleep which it affords the infant is perfectly natural, and the little cherub awakes as "bright as a button." And during the process of teething its value is incalculable. We have frequently heard mothers say they would not be without it from the birth of the child till it had finished with the teething siege, on any consideration whatever.

Sold by all druggists. 25 cents a bottle.

**WOMAN.**

—

FEMALES, owing to the peculiar and important relations which they sustain, their peculiar organization, and the offices they perform, are subject to many sufferings. Freedom from these contributes in no small degree to their happiness and welfare, for none can be happy who are ill. Not only so, but no one of these various female complaints can long be suffered to run on without involving the general health of the individual, and ere long producing permanent sickness and premature decline. Nor is it pleasant to consult a physician for the relief of these various delicate affections, and only upon the most urgent necessity will a true woman so far sacrifice her greatest charm as to do this. The sex will then thank us for placing in their hands simple specifics which will be found efficacious in relieving and curing almost every one of those troublesome complaints peculiar to the sex.

HELMBOLD'S EXTRACT OF BUCHU.

Hundreds suffer on in silence, and hundreds of others apply vainly to druggists and doctors, who either merely tantalize them with the hope of a cure or apply remedies which make them worse. I would not wish to assert anything that would do injustice to the afflicted, but I am obliged to say that although it may be produced from excessive exhaustion of the powers of life, by laborious employment, unwholesome air and food, profuse menstruation, the use of tea and coffee, and frequent childbirth, it is far oftener caused by direct irritation, applied to the mucous membrane of the vagina itself.

When reviewing the causes of these distressing complaints, it is most painful to contemplate the attendant evils consequent upon them. It is but simple justice to the subject to enumerate a few of the many additional causes which so largely affect the life, health, and happiness of woman in all classes of society, and which, consequently, affect more or less directly, the welfare of the entire human family. The mania that exists for precocious education and marriage, causing the years that nature designed for corporeal development to be wasted and perverted in the restraints of dress, the early confinement of school, and especially in the unhealthy excitement of the bal-room. Thus, with the body half-clothed, and the mind unduly excited by pleasure, perverting in midnight revels the hours designed by nature for sleep and rest, the work of destruction is half accomplished.

In consequence of this early strain upon her system, unnecessary effort, is required by the delicate votary to retain her situation in school at a later day, thus aggravating the evil. When one excitement is over, another in prospective keeps the mind morbidly sensitive to impression, while the now constant restraint of fashionable dress, absolutely forbidding the exercise indispensable to the attainment and retention of organic health and strength; the exposure to night air; the sudden change of temperature; the complete prostration produced by excessive dancing, must, of necessity, produce their legitimate effect. At last, an early marriage caps the climax of misery, and the unfortunate one, hitherto so utterly regardless of the plain dictates and remonstrances of her delicate nature, becomes an unwilling subject of medical treatment. This is but a truthful picture of the experience of thousands of our young women.

Long before the ability to exercise the functions of the generative organs, they require an education of their peculiar nervous system, composed of what is called the tissue, which is, in common with the female breast and lips, evidently under the control of mental emotions and associations at an early period of life; and as we shall subsequently see, these emotions, when excessive, lead, long before puberty, to habits which sap the very life of their victims ere nature has self-completed their development.

For Female Weakness and Debility, Whites or Leucorrhœa, Too Profuse Menstruation, Exhaustion, Too Long Continued Periods, for Prolapsus and Bearing Down, or Prolapsus Uteri, we offer the most perfect specific known

HELMBOLD'S COMPOUND EXTRACT OF BUCHU.

Directions for use, diet, and advice, accompany.

Females in every period of life, from infancy to extreme old age, will find it a remedy to aid nature in the discharge of its functions. Strength is the glory of manhood and womanhood.

HELMBOLD'S EXTRACT BACHU.

is more strengthening than any of the preparations of Bark or Iron, infinitely safer, and more pleasant.

HELMBOLD'S EXTRACT BUCHU,

having received the indorsement of the most prominent physicians in the United States, is now offered to afflicted humanity as a certain cure for the following diseases and symptoms, from whatever cause originating: General Debility, Mental and Physical Depression, Imbecility, Determination of Blood to the Head, Confused Ideas, Hysteria, General Irritability, Restlessness and Sleeplessness at Night, Absence of Muscular Efficiency, Loss of Appetite, Dyspepsia, Emaciation, Low Spirits, Disorganization or Paralysis of the Organs of Generation, Palpitation of the Heart, and, in fact, all the concomitants of a Nervous and Debilitated state of the system. To insure the genuine, cut this out. Ask for HELMBOLD'S. Take no other. Sold by all Druggists and Dealers everywhere. Price $1,25 per bottle, or six bottles for $6,50. Delivered to any address. Describe the symptoms in all communications. Address H. T. HELMBOLD, Drug and Chemical Warehouse, 594 Broadway, N.Y.

None are genuine unless done up in steel-engraved wrapper, with fac simile of my Chemical Warehouse, and signed
