COLLIERY EXPLOSION—FIFTY SEVEN MEN KILLED

(From the Manchester Guardian.)

Yesterday morning, about twenty minutes before nine o'clock, an explosion took place in the Arley mine of the Hindley Green Colliery, near Wigan, belonging to a limited liability association, called after the firm which formerly owned the pit, Messrs John Scowcroft and Company. By this disaster, so far as has been ascertained up to last evening, the lives of fifty six persons had been destroyed, while there were statements that one, if not two, who had been brought out of the pit alive, had subsequently died from the effects of the explosion.

The Hindley Green Colliery is one of the oldest mines in the neighbourhood, but the particular section of the workings in which the explosion took place, and to which it was confined, has only been opened out for some four or five years. The down cast shaft is 12 feet in diameter and 300 yards deep. At the pit bottom there are workings extending in three or four directions through the seam of coal, which is a level one, and about 4½ feet in thickness. Nearly 300 men and boys are employed in the mine, and were at work there yesterday morning. Of those 50 were in the working on the west side where the explosion happened. The pit is ventilated by means of a furnace at the bottom of the upcast shaft, which is 10 feet wide. There is only, as there is in many collieries, a stumb drift from the return air course into the upcast shaft, but such a work is in progress. Notwithstanding this, the mine appears to have been well ventilated. It was arranged on the sectional principle of ventilation, to which is to be attributed the comparative smallness of the loss of life. The men were supplied with safety lamps, which were fastened by padlocks.

The Arley seam is the only one at present worked, and hitherto the management has had no serious catastrophe to deplore. There are few, if any, old workings to embarrass the engineers, and the seam heretofore has not given off any extraordinary amount of gas.

At six o'clock yesterday morning the fireman made his customary examination, and his report of the state of the pit was perfectly satisfactory. The "places" were clear and in working order. Two firemen are employed, and both these men were in the west district at the time, and are amongst the killed.

Accounts differ as to the force of the explosion, which would seem to have been a very violent one. It was, however, sufficient to cause the reversal of the air current, but the proper ventilation was soon restored by means of water being pumped into the downcast shaft by engine power. None of the machinery of the shaft was injured, and, therefore, as soon as the ventilation was restored, those who were on the pit bank were enabled to descend and ascertain the extent of the calamity. In the course of seven or eight hours they brought out 54 dead bodies. Two men were rescued nearly four hours after the explosion; a boy who was also rescued alive and removed to his home died shortly afterwards, and two bodies are reported to be in the pump.

An underlooker named Ellis was close to the upcast shaft, near the furnace, at the time of the explosion, and he it was who first went to the surface. The manager, Mr Thomas Southworth, was not far away. They in company with an active band of volunteers, at once commenced the painful task of ascertaining the extent of the disaster. The first who were found to have suffered were some persons at work near the upcast shaft; they were burned owing to the flames from the furnace having been driven along the workings. The labours of the explorers were both tedious and arduous, for the explosion had so completely destroyed the ventilation that it was necessary to proceed with great caution, and of course every delay only increased the fears for the safety of those walled in by the deadly choke-damp. A few succeeded in penetrating the suffocating vapour and escaped with their lives; and one who was apparently dead was brought back to life by the employment of artificial respiration for nearly ten minutes. As the explorers proceed they were joined by a number of gentlemen from the adjacent collieries, willing to render all the assistance in their power. Mr George Gilroy, of the Ince Hall Coal and Iron Company, was among the number, and shortly after noon the Government Inspector, Mr Higson, reached the pit, and at once descended to take part in the search. It was six hours after the explosion when the last body was found, and the extremity of the workings was reached. Most of the deceased had left their working places, and were found in the main pony road, along which evidently they had been trying to escape.

The condition of the corpse varied considerably. Many of the boys who were killed had clean faces, and the features were placid as if the healthy-looking lads were merely slumbering. Some of the men were dreadfully wounded; others were much burned, and in one instance the flesh had been burned to the bone off a man's fingers. It will be seen from the appended list that many of the killed are relatives. In the workshop last night lay the corpses of two brothers named Tyldesley. They were two of the four sons of a widow who only lost her husband quite recently. The other two sons were in the pit at the time of the explosion; one escaped without injury, but the other had to be taken home. One man had his hat blown off his head, and the lamp extinguished by the explosion, but he escaped uninjured.

In the adjacent workings nothing was known of the explosion, beyond a slight report having been heard. The noise was so trifling that it was believed by some that there had been a fall of the roof in the west workings, where we are informed that a fall took place on Wednesday. In the workings there is a "down-step," where it was at first believed that the explosion originated, but we are assured that such was not the case. The bodies, as they were brought up out of the mine, were removed to the rooms adjoining the shafts. 37 were removed to the carpenters' workshop. To the smithy, which adjoins, 17 other bodies were removed.

A youth named Highton was taken home; he was badly injured, and only lived a very short time, making the total number of dead 57. Ten others are said to be suffering from severe burns.

Dr. Brayton, of Hindley, and two of his assistants, were fetched to the colliery, where they arrived in about three quarters of an hour. Unhappily, all but two of those brought up were beyond the need of medical assistance; those two were men named Meadows and Cunliffe; they were brought out between one and two o'clock, and restoratives having been administered to them they were enabled to be removed to their homes.

The Rev. John Lews, the Methodist Free Church minister at Hindley Green, who knew many of the deceased, was placed in charge of the bodies as they were removed to the workshop and smithy, and attended to those who came to identify their relatives or friends.

The Rev. G. H. Newbold, Vicar of Hindley, and his curate, were in attendance at the pit bank all day. Several other clergymen were also present, and many of the shareholders in the company were amongst the spectators during the afternoon.

SUGAR-COATED

ARE a safe and reliable remedy in all diseases of the *Stomach, Liver* and *Bowels*. They are not *Quack* Medicines puffed up by high sounding testimonials from imaginary people, but are the result of forty years experience of a first-class physician, and their extraordinary success is due to the fact that they answer exactly their name. The formula from which they are prepared, is based on sound, scientific principles, and has received the unqualified approbation of the *medical profession*. They do not profess to be a cure-all, but for all diseases arising from any derangement of the *Stomach, Liver* and *Bowels*, they furnish an effectual remedy. We have in our possession, over one hundred testimonials from physicians who have used them in their practice and highly approve of them, among which are the following.

J. H. GIBSON, M. D., Dunham, C. E.
C. E. COTTON, M. D., Cowansville.
CHARLES BROWN, M.D., Cowansville.
S. S. FOSTER, M. D., Broome.
J. C. BUTLER, M. D., Waterloo.

R. D. MUSSY, M. D., Boston.
F. J. AUSTIN, M.D., Sherbrooke.
E. D. WORTHINGTON, M. D., Sherbrooke.
Henry Simpson & Co., Montreal, Wholesale Agents.

IS A SPECIFIC for Rheumatism or Lameness of any kind, Swelling of the Joints, Sore Throat, Cold in the Head and Diphtheria, Burns or Frost Bites, Scratches on horses, &c.'

JACOBS' RHEUMATIC LIQUID.

Is an internal as well as an external remedy, and is the only one that *always* gives entire satisfaction, and all who once use it will never consent to change it for any other.

We have not space to enumerate the virtues accorded to it by thousands who have used it, and voluntarily testify to its merits. Buy a bottle and satisfy yourself that it is the best remedy ever offered.

Henry Simpson & Co., Montreal, Wholesale Agents.

THE BEST Tonic Hair Dressing ever discovered. It effectually cleanses the scalp, prevents the Hair from falling off or turning prematurely gray, and when the follicles and glands are not destroyed, will produce a new and luxuriant growth of hair where it has already disappeared.

It is the cheapest as well as the best, being only 25 cents for a large bottle. Buy it, try it, you'll like it and recommend it to your friends.

Henry Simpson & Co., Montreal, Wholesale Agents.

Agent,
St. Lawrence Wharf.
Kingston, Feb. 4, 1868.

CHOLERA, DIARRHŒA, &c.

EARL RUSSELL sent to the College of Physicians a communication received by him from Manilla (where cholera had been raging fearfully) to the effect that, of all remedies tried, Chlorodyne was the most effective.

"The day seems as yet, unhappily, far distant when public opinion or State interference will prevent the advertisement or sale of any secret medicine whatsoever. It is to be hoped that the profession will continue to brand as unworthy the conduct of those of its members who by testimonial or otherwise aid the disposal of such things."—*Lancet.*

TOWLE'S CHLORODYNE.
The Original Preparation of known Composition.
From Dr C. Kidd, Author of Standard Works on Chloroform.
Sackville-street, Piccadilly, London.
Sir,—I think if you would advertise your Chlorodyne more than you do, you would help to beat the others, which are secret compounds, out of the market. Many medical men think with me, and recommend your compound, but will never prescribe a secret remedy. CHARLES KIDD, M.D.
To Mr Towle, Chemist, Manchester.
A Surgeon from New York writes:—"I only requires to be known to be appreciated. I have no hesitation in characterising it (viz., Towle's Chlorodyne) as the most useful medicine that has appeared during the present century. In diarrhœa, colic, ague, spasms, I have found it to relieve more pain and cause more joy than any other article that can be named."
NOTE.—The Profession is warned against inferior, secret, and cheap compounds now in the market. Each genuine bottle bears a facsimile of Proprietor's signature on the stamp outside.
LIQ. CHLOROFORMI Co. or CHLORODYNE WITHOUT PEPPERMINT.
Sole Manufacturer:—A. P. Towle, Chemist, Manchester.

EUGENE RIMMEL,
PERFUMER by appointment to their Majesties the Emperor of the French, the Queen of Spain, the Queen of Holland, the Queen of the Belgians, and the King of Portugal; and H.R.H. the Prince of Wales.

Pomades, Rose and Violet Powders, Cosmetics, French Extracts, Lavender Water, Cherry Tooth Paste, Lime Juice and Glycerine, and every description of preparations for the Toilet.
Messrs Burgoyne, Burbidges, and Squire receive Indents for Yardley & Co.'s preparations.

THE ORIGINAL CHLORODYNE, invented by R. Freeman, Pharmaceutist, is allowed to be one of the greatest discoveries of the present century. It is largely employed by the most eminent Physicians and Surgeons in hospital and private practice in all parts of the world. It has effects peculiar to itself, and which are essentially different to those produced by the various compounds bearing the name of Chlorodyne, but have no pretence to possessing its virtues. It rapidly relieves pain, from whatever cause, allays the irritation of fever, soothes the system under exhausting diseases, and gives sleep without producing any one of the unpleasant feelings so commonly arising from the use of opiates. It continues to hold its unshaken position in the estimation of the Profession as the best, most reliable, and cheapest preparation. Eminent and scientific Physicians made affidavits that they have tested its effects in careful comparison with those of "DR. COLLIS BROWNE'S CHLORODYNE," and deposed to the facts that they found it a more certain and reliable preparation, and greatly preferred "FREEMANS."
Earl Russell communicated to the Royal College of Physicians and to Mr Freeman, that in Manilla the only remedy of any use in Cholera was Chlorodine.
The Medical Times and Gazette, January 13th, 1866, states, "It has an immense sale amongst the public, and is prescribed by scores of Orthodox Medical Practitioners, and, of course, it would not be thus singularly popular did it not supply a want and fill a place."
Manufactured by the Inventor, Richard Freeman, 70, Kennington Park Road, London, S.
The genuine has engraved on the Government Stamp (outside each Bottle), "FREEMAN'S ORIGINAL CHLORODYNE."

CONDY'S PATENT FLUID or natural disinfectant purifies, deodorises, and disinfects, by the agency of nascent or ozonic oxygen,—its active principle. Being entirely innoxious, this truly scientific preparation is peculiarly adapted for the following useful purposes, for which all other disinfectants, on account of their poisonous or other objectionable qualities, are unavailable and useless:—
Detecting organic impurities in air and water.
Purifying drinking and other water from organic matter, lead, &c.
Freshening the air of close places, and removing bad smells.
Freeing meat, fish, butter, or other provisions from taint.
Counteracting the effects of organic poisons taken into the stomach.
Curing Musty provender. Freeing wheat and other seed from smut.
Maintaining the health of plants in pots and conservatories.
Preserving and restoring the freshness of cut flowers kept in water.
Destroying the blight of the potatoe, vine, hop, mulberry tree, &c.
Washing dogs and other domestic animals.
Cleansing bottles, beer barrels, pickling tubs, dairy utensils.
Washing the hair and darkening its colour when turning grey.
Enhancing the purifying and invigorating effects of baths and tubs.
Dressing poisoned wounds and destroying animal virus
Treating the infectious diseases of cattle, horses, dogs, &c.
One gallon makes 200 to 300 gallons adapted for use.
N.B.—Condy's Fluid is the Standard Scientific Test for Organic Matter in Water, and affords the only known means of rapidly and completely freeing Drinking Water from Organic Taint, which is so common a cause of serious disease.
To rapidly purify the air, use the diluted fluid with "Condy's Ozoniser" or other Spray-producer.
CONDY'S PATENT OZONISED WATER,
(FOR TOILET PURPOSES,)
Removes from the mouth impure and foreign tastes and odours, whether arising from tobacco or other causes, and counteracts the irritation and morbid secretions of carious teeth. It purifies and softens the skin, and, used in the bath, tends to promote a healthy state of the whole body.
H. BOLLMAN CONDY,
Patentee, Battersea, London.

JUDSON'S SIMPLE DYES FOR THE PEOPLE. Any one can use them; anything can be dyed with them. It is impossible in this small space to enumerate the many uses to which these wonderful and beautiful chemical preparations can be applied; while their chief use is for dyeing textile fabrics, they are also invaluable as a colouring agent for almost every known material, the ease with which they can be used and the brilliancy of the result being, indeed, almost magical. By their use almost any article of clothing can be dyed in a few minutes for a few pence without soiling the hands.
MEMORANDA:
MAGENTA: The strength and beauty of this dye is almost incredible. A Sixpenny bottle will dye 20 yards of Bonnet Ribbon in 10 minutes; it will also produce a clear Rose Pink by using less dye. Suitable also for Woollen Goods, Feathers, Silks, &c.
WOOLLENS: Magenta, Mauve, Violet, Purple, Orange, Pink, and Crimson produce the most satisfactory results. Use a large quantity of boiling water in an earthen pan. RIBBONS and SILKS: Brush them with soap and water to avoid creases, and to render them clean. Dye in boiling water.
FEATHERS: Dye in hot water (a few drops of the dye is sufficient for one feather).
COTTON: Mauve, Violet and Purple are recommended.
LEATHER: Blue, Magenta, Violet and Orange. Dye in warm water.
WHITEWASH: To color: *Magenta*, for Pink or Rose; add half a bottle to a pail of water, then stir in the Whitening as usual. Mauve, Violet, Purple, Blue and crimson produce pretty tints by using one bottle or more, as directed above.
STARCH: Stir in a few drops of Colour—Magenta, Mauve, Violet, Blue or Pink; these impart delicate tints to Lace, Linen, &c.
WILLOW SHAVINGS, Wicker, Ivory, Bone, Hair, Fibres, Seaweed, &c., attract the dye quickly, if applied in boiling water.
BLUE: For laundry purposes is A 1.
BOOK EDGES: A Sixpenny bottle of Magenta, Violet, Crimson or Blue will make from a pint to a quart of beautiful colouring, according to shade required. Apply with a brush.
PAPER and WOOD STAIN: Ditto.
OAK STAIN: A bottle of No. 2 Black to half a-pint of hot water.
SATINWOOD STAIN: A Sixpenny bottle Canary dissolved in a pint of boiling water
PHOTOGRAPHS may be tinted; dilute the dye with water; a bottle of Magenta to a pint of water. &c.
ILLUMINATING: Magenta, Violet, Blue, Orange; pour a few drops into an egg cup add warm water; use with a brush or pen Borders of books, similar to Ward and Lock's Arabian Nights, &c., may be prettily illuminated in this manner.
BLANCMANGE, JELLY, CORN FLOUR, ICE CREAMS, &c: While in a liquid state add one or two drops of Magenta. A more simple or elegant tinting cannot be had.
CONFECTIONERS will find Magenta, Violet Orange and Pink useful colours.
GELATINES and GLUES are successfully coloured with these dyes.
INK: A Sixpenny bottle of Magenta to a pint or more of cold water.
WATER: One drop of dye will tint a quart.
PRINTING on Cotton, Silk or Wool in the ordinary way.
BLENDING some of the dyes in the bath will produce an infinity of shade, according to taste.

LEA AND PERRINS' Worcestershire Sauce. This delicious Condiment, pronounced by Connoisseurs "The only good sauce," is prepared solely by Lea and Perrins. The Public are respectly cautioned against worthless imitations, and should see that Lea and Perrins' Names are on Wrapper, Label, Bottle, and Stopper. Ask for Lea and Perrins' Sauce.
Sold Wholesale and for Export, by the Proprietors, Worcester; Messrs. Crosse and Blackwell; Messrs. Barclay and Sons, London; &c.-&c.; and by Grocers and Oilmen universally

The L. S. Pub. Co. also publish
The Farmer's Guide
By Henry Stephens of Edinburgh and the late J. P. Norton, of Yale College. 2 vols. Royal Octavo, 1600 pages and numerous Engravings.
PRICE—$7, for the two volumes. By the post paid, $8.

DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL.

DR. DE JONGH'S Oil is convincingly proved by an overwhelming weight of medical testimony, and by the practical test of successful experience for twenty years in all parts of the world, to be, beyond all question, the purest, the most efficacious, the most palatable, and, from its rapid curative effects, the most economical of all kinds.
Hence the universal celebrity of Dr. de Jongh's Oil, and the unparalleled demand for this unrivalled preparation.

SELECT MEDICAL OPINIONS.
SIR HENRY MARSH, BART., M.D.,
Physician in Ordinary to the Queen in Ireland.
"I have frequently prescribed Dr. de Jongh's Light-Brown Cod Liver Oil. I consider it to be a very pure oil, not likely to create disgust, and a therapeutic agent of great value."

DR. EDWARD SMITH, F.R.S.,
Medical Officer to the Poor Law Board of Great Britain.
"We think it a great advantage that there is one kind of Cod Liver Oil which is universally admitted to be genuine—the Light-Brown Oil supplied by Dr. de Jongh. It has long been our practice, when prescribing the oil, to recommend this kind, since, amidst a much variety and uncertainty, we have confidence in its genuineness."—(Extract from "Consumption: its Early and Remediable Stages.")

DR. LANKESTER, F.R.S.,
Coroner for Central Middlesex.
"I consider that the purity of this oil is secured in its preparation, by the personal attention of so good a chemist and intelligent a physician as Dr. de Jongh, who has also written the best medical treatise on the oil with which I am acquainted. Hence, I deem the Cod Liver Oil sold under his guarantee to be preferable to any other kind as regards genuineness and medical efficacy."

DR. LETHEBY,
Medical Officer of Health, and Chief Analyst to the City of London.
"In all cases I have found Dr. de Jongh's Light-Brown Cod Liver Oil possessing the same set of properties, among which the presence of cholaic compounds, and of iodine in a state of organic combination, are the most remarkable. It is, I believe, universally acknowledged that this oil has great therapeutic power; and from my investigations, I have no doubt of its being a pure and unadulterated article."

DR. BARLOW, F.R.S.,
Senior Physician to Guy's Hospital.
"I have frequently recommended persons consulting me to make use of Dr. de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure oil, well fitted for those cases in which the use of that substance is indicated."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."
"Dr. Granville has found that Dr. de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the pale oil."

EDWIN CANTON, ESQ., F.R.C.S.,
Surgeon to Charing-cross Hospital.
"For several years past I have been in the habit of prescribing Dr. de Jongh's Light-Brown Cod Liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."
