An Agnes Macphail Story

The story is told that Miss Agnes Macphail was to give an after-service address in an Ottawa church on a recent Sunday evening. Going to the designated place, she found a church on either corner and happened to enter the wrong one. Finding she was mistaken she retraced her steps to the street, where she encountered a man, and asked him the location of the church where she was to speak. The man told her he would accompany her to it. "I'm going to hear Aggie too," he said.

Jack Moore cast a clam-baited hook into the sea from the rocks at Barview, Oregon. A 12-inch kelp took the hook. As Moore pulled up his catch a two-foot long cod dashed and partly swallowed the kelp. Moore pulled more strenuously. Then up dashed a four-foot cod and swallowed what he could of the two-footer. Moore held on valiently until Walter Zeler stepped in with a gaff and brought the triple catch to shore. It was put on exhibition at a local store

The Car You Buy Must Live in the Same Town With You

WHEN a man buys an automobile he must consider the town he lives in as well as the car he buys. The measure of strictly local responsibility back of the car, the local facilities for service, the interest of the local dealer in the welfare of the owner—these are some reasons why we are selling satisfaction with every new or used car we deliver.

A few of our Good Used Cars

Ford 1932 V-8 Tudor Sedan $500.00
Ford 1931 Tudor Sedan $350.00
Ford 1931 Spec. Sport Roadster $350.00

Better Cows And Higher Milk Production Needed

"We do not need more cows in Ontario—we need better cows," declared George H. Barr, director, Dairy Branch, of the Department.

"Without doubt," he continued, "one of the greatest opportunities in the dairy industry to increase profits on a dairy farm is to increase the production of the individual cow.

"We have information which is reliable that in some of our so-called dairy districts or counties, the production of milk per cow for six months is less than 3,000 pounds, and less than 80 pounds of butter fat. Estimating the fat at 22 cents per pound, the revenue is $17.60. Just how can there be any profit in keeping such a cow?

"In the same neighborhood there are herds which average 6,000 pounds of milk and over 200 pounds of fat per cow for the same period. Fat at the same price gives a revenue of $40.00 per cow.

"In order to encourage an increase in the production of milk and fat on Ontario dairy farms the different dairy associations in the province have offered quite liberal prizes for the past two or three years.

"The Central Ontario Cheesemakers' Association have led the way in this good work. In their 1932 competition for the largest production of fat per acre among cheese factory patrons in Central Ontario they offered $460 in cash, a silver shield and other special prizes. The winner of the sweepstakes prize in 1931 was Mr. H. Arnold of Campbellford, with 37.94 pounds of fat per acre on a 65-acre farm. He was again the winner of the sweepstakes prize in 1932 with 45.02 pounds of fat per acre, an increase of 7.08 pounds. Had we more patrons of this type there would be less trouble paying taxes.

"Just multiply that increase by 25,000 (the number of cheese factory patrons in Ontario) and then multiply the result by 20 cents per pound of fat and there would have been $35,400 extra money in the pockets of the cheese factory patrons in 1932."

Paving Tennis Court

One of the two courts of the Flesherton Tennis Club at Memorial Park is to be paved with cement, work on the project having commenced Saturday with Mr. P. Sherwood as the contractor. A couple of years ago this court was faced with asphalt, but was not satisfactory, as it crumbled with the frost and playing. The second court is of dirt construction and has been in fair shape, but if the cement court is a success the other one will be paved also. The Tennis Club is looking forward to a successful year and membership can now be taken in the Club for playing privileges.

HE KEEPS THINGS GOING

The municipal clerk in a great majority of cases is the man who really keeps the machinery of a municipality in operation. Every year or so new men are elected to positions in the council. They must secure instruction and guidance from someone and this someone is usually the clerk. A councillor is moved up to the reeveship or the mayor's chair and he is "green" about his new duties. The clerk sets him right and usually keeps him that way. Municipal councils couldn't get started and keep going without the clerk. He is the "power behind the throne." And if he has tact and good judgment and uses common sense the municipality is generally given credit for having a good council.—Ex.

Centre Grey Baseball League Is Likely

With Kimberley, Flesherton and Vandeleur baseball clubs organized it appears as though there will be considerable baseball in this district this year. Dundalk is seriously considering organizing and if they should there would be an excellent four team group to form the Centre Grey League again. A league is needed in order to have sufficient interest aroused to put the game across properly, and if Dundalk entered there would be plenty of interest displayed. With both Flesherton and Dundalk having the Thursday half holiday fair crowds would be assured for each game, and this would also suit Vandeleur and Kimberley.

Vandeleur, like Flesherton, will have a young team in the field with enough of the older players to balance the team. Kimberley, with many years of experience behind them, will field a strong outfit and will give plenty of trouble to any other nine.

The weather has been too unsettled to do much practising, but a change would allow the players to have workouts and round into condition.

Here's hoping that Dundalk enters and the Centre Grey League formed again. Many have thought that baseball was through in this district, but if the enthusiasm of the boys is any criterion the game should come back with a bang.

Heaves, the ailment common in horses, is frequently caused by repeated gorging with food or water, or both. Dusty grain or hay also predisposes of this trouble.
