LAXERINE GAS SAVERS (Reg.), 372 Bay St., Toronto

Celtic Element Manifest in Ballads of Newfoundland

New Collection Contains Much Genuine Folk Music of Good Quality

Elizabeth Greenleaf and Grace Mansfield have just published "Ballads and Sea-Songs of Newfoundland," The London Times says:

"In the most recent publication of songs from Newfoundland too many songs are given without their tune, but the tunes when they are given seem to have been accurately noted, even in cases where the underlaying of the words is contrary to their natural accentuation. Irregularities of time and mode have been preserved and the words are for the most part complete. Mrs. Greenleaf explains in in excellent introduction describing her visits to Newfoundland how she came to take up folk-song collection without any special training or experience, but she had the help of a competent musician in Mrs. Mansfield and the notes, which give very full references, have greatly benefitted from the editorial assistance of Professor Kittredge. Nevertheless, many of the songs have no place in a collection of folk-songs on even a loose interpretation of that elastic designation. At the same time, folk or not folk, their inclusion throws a flood of light on the practice of folk-singing and on the way that an oral tradition works in a society that has not yet wholly abandoned it in favor of print.

"There is a large Celtic element in the population of Newfoundland — Irish, Welsh and some Scotch, who are said still to preserve their Gaelic, though the present collection of 185 songs, which represents geographically only a small area of the island, includes none of them nor of any songs of the French-speaking people. The Celtic way with folk-song is different from the English, which is more conservative and keeps words and tune indissolubly associated, as Cecil Sharp always found. Among the Celts the bardic tradition is still potent. A gifted singer will make up a poem about current events and either sing it to a tune belonging to another song that happens to fit, or will make up a tune from typical lilts and phrases that are common to the whole body of his national folk-song, thus producing a tune which is new, but not original, original, but not new—the beginning of the process of communal growth, in fact, but not yet a true folk-song. A collector in Nova Scotia last summer found there a song composed on the subject of the evacuation of the Island of St. Kilda which was sung to her in Gaelic.

"The tunes are mostly good honest stuff, but not of any surpassing beauty, except in a few instances, such as the strong 'The Plains of Waterloo' and 'Bold Wolfe,' a good song whose words seem to be the product of grafting the historical exploits of General Wolfe on to a stock ballad. The 'snap' characteristic of Scottish and the cadence of three repeated notes characteristic of Irish folk-songs are found, as well as several Irish reels. Taken in all, the collection is a very mixed bag, containing much genuine folk-music of good qual- a good deal of popular music of fair to really bad quality, old and new in about equal proportions, and all of it indisputably alive."

"The modern world is just now more politically conscious and more politically anxious than it has ever been."—Nicholas Murray Butler.

MOTHER OF 13 WITHOUT A WRINKLE

What a rarity!—a woman with a large family and an unlined face. Read this letter she has written:—

"I am a woman of 50, have a family of 13 children, and have not a wrinkle on my face. Some time ago I passed through a very severe illness, and resolved to try Kruschen Salts, and am a new woman since taking them. I have taken Kruschen for twelve months—not a small dose, but half-a-teaspoonful every morning in a cup of hot water. I think Kruschen gives you a feeling of buoyancy and youth that nothing else does."—(Mrs.) E. T.

Many minor illnesses, depression and worry—which are the chief causes of wrinkles—are frequently due to the presence in the system of poisons bred by the waste products of digestion. These poisons are the root cause of rheumatism, headaches, kdney trouble and other complaints, which make people old before their time. It is the unfailing effect of Kruschen Salts to expel these poisons and keep the bloodstream pure. And a rich supply of pure, vigorous blood is the secret of youthful vitality—millions of men and women have already proved that.

The Dominion Coast-To-Coast

Charlottetown, Prince Edward Island.—Ten pairs of Hungarian partridges were set free in Prince Edward Island in October, 1917, and forty-nine more pairs in 1931. Now thousands of these birds are to be seen in the Island woods, which have become their natural habitation. The experiment is looked upon as being a complete success.

Saint John, New Brunswick. — Following a meeting of the Civic Industrial Committee, it was stated that the outlook for industrial development in Saint John is most promising, the starting of several large establishments being in prospect.

Quebec, Quebec.—A report by Mr. A. O. Dufresne, Director of the Quebec Bureau of Mines, shows a rise in Asbestos and copper production during the second quarter of 1933. Shipments of asbestos to consumers during this period amounted to 31,744 tons, compared with 26,779 tons in the same period of 1932 while copper shipments totalled 18,764,764 pounds against 16,018,319 pounds in the second quarter of 1932.

Ottawa.—The latest official returns show that on March 31, 1933, there were 761,288 licensed radio receiving sets in Canada, an increase over March 31, 1932, of 162,930 sets. The province of Ontario has the largest number with 340,347, or about one for every ten of the province's population. Quebec comes next with 195,389, followed by British Columbia with 61,368, Manitoba with 47,980, Alberta with 38,380, Saskatchewan with 32,367, Nova Scotia with 26,824, New Brunswick wth 16,908, Prince Edward Island with 1,484 and the Yukon and North-West Territories with 241. Montreal holds first place among cities with 128,366, Toronto coming second with 109,931 and Winnipeg third with 35,100.

Winnipeg, Manitoba. — During the month of June the four Western Provinces all reported production of creamery butter in excess of that of June, 1932. Manitoba's output amounted to 3,068,692 pounds compared with 2,983,827 pounds in June, 1932, an increase of 2.8 per cent.; Saskatchewan reported 3,135,738 pounds compared with 2,895,070 pounds, an increase of 8.3 per cent.; Alberta scored the highest increase, 13 per cent., production being 3,524,000 pounds, compared with 3,119,000 pounds in the previous year, while British Columbia produced 615,000 pounds against 578,905 pounds in June, 1932, a gain of 6.2 per cent.

Regina, Saskatchewan.—Coke production of the four Western Provnces in June amounted to 13,299 tons, a considerable increase over the 10,805 tons recorded for the same month last year. Production to date, however, for the whole year, is still slightly below that of the same period of 1932. being 79,746 tons against 82,407 tons in 1932.

Saskatoon, Saskatchewan.—Dr. J. B. Harrington, who is in charge of cereal experiments at the University of Saskatchewan, observes that new hybrid varieties of oats under test at the University are showing much greater resistance to dry weather than are the standard varieties. Several kinds of barley, such as Colsess and Regal, also show more ability to withstand dry weather than O.A.C. 21 barley. Dr. Harrington believes that the expermental results this year, while crops are small, will provide valuable information on such questions as the comparative strength of straw and the smattering of grain varieties.

Edmonton, Alberta. — The annual civic census of Edmonton shows the city to have a permanent population of 79,231, an increase of 844 over 1932. Of the total residents 61,406 live on the north side of the river.

Vancouver, British Columbia. — A new grain export record for Vancouver was made for the crop year 1932-33 with 96,872,772 bushels, the previous record being in 1928-29 when 95,407,519 bushels were exported. The new record represents an increase of 12,348,077 bushels over the 1931-32 crop year.

Colorado Farmers Grow More Turkish Tobacco

Denver. — Farmers are harvesting and curing a crop of 30,000 pounds of Turkish tobacco. This is the second commercial crop of that variety of tobacco produced here. Last year a small quantity was grown and made up into cigarettes which were retailed locally.

It is said that only in Colorado can Turkish tobacco be raised in this country and it is predicted that the leaf will in time replace sugar beets as Colorado's principal cash crop. The high duty on importations from Turkey make the crop an unusually profitable one for the domestic grower.

Ostriches, being pursued over rocky ground throw, stones with great force at the pursuers; the great birds are not aware of this fact, however.

The breeding turkeys during the winter months should receive only limited rations, as they have a tendency to become over-fat if well fed.

Recent Events From Overseas

Cabinet Members Enjoy Vacations

London, Eng.—The British Government is not on duty at the moment to deal with war debts. Westminster is on holiday until November. Cabinet Ministers are scattered in the following places:

Mr. MacDonald	Lossiemouth
Mr. Baldwin	Worcestershire
Mr. Chamberlain	Perthshire
Lord Hailsham	France
Lord Sankey	Wales
Sir J. Gilmour	Scotland
Sir John Simon	Brazil
Sir E. Hilton Young	Norfolk
Mr. Runciman	Scotland
Sir P. Cunliffe-Lister	Yorkshire
Lord Londonderry	Ulster
Sir G. Collins	Scotland
Major W. Elliot	Roxburghshire
Mr. Ormsby-Gore	Wales
Mr. J. H. Thomas	Brighton
Sir S. Hoare	Norfolk
Sir H. Betterton	Norfolk
Lord Irwin	Yorkshire

Telescope For Toronto

Newcastle, Eng.—The largest telescope ever made in Europe, and the second largest in the world, is taking shape at the Newcastle works of Sir Howard Grubb, Parsons & Co., for delivery to Toronto University. The contract is worth £40,000 to £50,000.

It will contain a 76-inch diameter mirror now being made from special glass in New York. The mirror alone will weigh 2¼ tons, and will be 1 ft. thick. It will be polished by Messrs. Grubb, Parsons for a whole year, experts working upon it until it is correct to the nearest one-five-hundred-thousandth of an inch. A 75-ton revolving steel dome to house the telescope is being manufactured at Middlesbrough.

Meanwhile, Messrs. Grubb, Parsons are also making the largest telescope in England—a 36-inch reflector for the Royal Observatory, Greenwich.

All Over a Cricket Ball

London, Eng.—A London County Council tramcar being driven along North-side Clapham Common, recently left the rails at the corner of Cedars Road, and careered a few yards over the roadway when a cricket ball, hit by a local 'Bradman," flew into the road and was "caught" by a wheel of the vehicle. The cricket ball was the only casualty.

Woman Saves Son

Bottle, Eng.—Mrs. Emily Spencer, a Liverpool mother, saved the life of her son recently when they were trapped in the quicksands at Seaforth, near here. Hundreds of people on the shore close at hand were unaware of what was happening.

Mrs. Spencer and her sons—George, aged nine, and James, aged seven—were walking across a shallow strip of water when they found themselves sinking. They struggled, but sank deeper. Soon they were in the sands up to their waists.

Mrs. Spencer seized her son James and, making a superhuman effort, pulled herself clear.

Throwing herself on her side, she rolled over and over, still clutching her son, and dragged him to safety.

Meanwhie, George had managed to free himself and had dashed away for help.

When rescuers came along they from shock.

Scouts' Reply to Ban

London, Eng.—Denmark banned British Scouts from landing in uniform. So Lord Baden-Powell has banned Denmark.

The Chief Scout sailed from Southampton recently with 650 Girl Guides and Scouts to cruise to Baltic ports.

Denmark said the party could land if they wore civilian clothes, but Lord Baden-Powell refused and cut the Copenhagen visit from the program.

Skull Fractured—Goes 100 M.P.H.

London, Eng.—A 11-year-old London clerk did 101.23 miles an hour in a motorcycle race at Brooklands recently —with a fractured skull.

He gained the prize for which he left his sick room. It was a gold star awarded for completing a lap at over 100 m.p.h.

This daring and determined young man, who resisted the appeals of his family and friends that it would be "madness' to race, is Mr. Edgar Owens. He lives in Court House Gardens, Church End, Finchley, and is employed by a builder.

He fractured the base of his skull in a "spill" at Donnington Park on Whit Monday. His memory went for a few days, and the surgeon at a Derby hospital told him not to ride again this year.

This race was his first time in the saddle since his accident. Only a few days ago he came and won not only the gold star but fourth place in another race.

Small £300 Autogyro To Be Housed in Garage

Feltham, Eng.—The cheapest and smallest air machine ever known has been flown at Hanworth Air Park, Feltham, Middlesex.

It is a new baby autogyro invented by Don Juan de la Cierva, who made the first autogyro to be flown in Britain.

When finally completed it will have only a 20 horse-power engine and will probably cost no more than £300.

Its engine will be made by a motorcycle firm, with running costs about half those of a small car.

A large suburban garden will provide all the take-off room needed, and an ordinary garage will house it.

Great care is being taken to keep the machine safe from intruders.

No details are being either confirmed or denied yet, but Mr. Cierva emphasized that the machine is essentially experimental.

New Peer Aged Nine

Brighton, Eng.—Lord Monk Bretton died in a nursing home here recently. He was 63.

He had a distinguished career in the Diplomatic Service, and was chairman of the L.C.C. in 1929-30.

The new baron, the Hon. John Charles Dodson, is nine years old.

Husband's Arrest

Cardiff, Wales.—David Thomas, 54, of Dudley Street, was accused at police court here recently of the attempted murder of his wife. He was remanded.

A policeman stated that Thomas approached him in the street and said, "I want to give myself up. I have cut my wife's throat."

Town Too Prosperous

Cairo, Ga.—This town has been hoping for a new postoffice building, but government investigators have reported that there are no idle men here. Some other town, therefore, will benefit by Cairo's prosperity.

London's "population" of cows decreased from 40,000 in 1865 to 1,087 in 1929.

Hair OFF Face Lips Chin

Unloved I once looked like this. Ugly hair on face . . . unloved . . . discouraged. Nothing helped. Depilatories, waxes, liquids...even razors failed. Then I discovered a simple, painless, inexpensive method. It worked! Thousands have won beauty and love with the secret. My FREE Book, "How to Overcome Superfluous Hair," explains the method and proves actual success. Mailed in plain envelope. Also trial offer. No obligation. Write Mlle. Annette Lanzette, 93 Church St., Dept. C40, Toronto, Canada.

STOMACH ACID BURNS LIKE FIRE

Sometimes stomach acid makes your stomach feel like a lake of fire. You can stop this quickly and get immediate relief from burning pain, sour acid stomach and indigestion with a spoonful of Bisurated Magnesia in half a glass of water. Any drug store has Bisurated and just one spoonful will prove how quickly it works.

Brampton Cow Sets New Record

19,012.3 Pounds of Milk and 1,312.7 of Butter Fat in Year is New Mark

"Brampton Basilua," Jersey cow owned by B. H. Bull & Son, Brampton, established a world's record for this breed of cow on Sept. 25th, when she completed the phenomenal production of 19,012.3 pounds of milk and 1,312.7 pounds of butter fat in 365 days.

This great cow, according to advices, weighs only 950 pounds, yet she outproduced all other cows of all breeds the world over on three times a day milking. Only two records have been established that are higher for butter fat, it is claimed, and these were made on four times a day milking.

The new champion was fed and milked by George Wood, who has handled more high record Jerseys than any other man in Canada. She is the highest testing cow in the world ever to make a world's record. She is the smallest cow ever to go over 1,260 pounds of fat in one year. She produced more butter fat in one month (136 lbs.) than any other Jersey cow ever produced in that time.

"Basilua" was imported from Jersey Island as a yearling by Bull & Son, and made an excellent record of more than 600 pounds of fat at two years. She went on her record-breaking pace as a 5-year-old. Her sire was imported by Brampton and sold in Tennessee, where he is still in service. His sire was also imported by Brampton, as were most of the outstanding animals in the pedigree of Basilua.

Digs Oyster Shells In Air

Swaying perilously 250 feet above the City, or London's financial district, almost on nodding terms with St. Paul's, there is a man digging for oyster shells. What is more, he finds them.

The man is a stone-mason named Edward Hughes. He is engaged in repointing the stone work on the top of the steeple of St. Bride's Church. Flattered by the visit of a reporter of The Daily Express the other day, he at once assumed the character of a professional guide:

"On my left," he said, "we have Nelson's Column; over there the Law Courts, Old Bailey, St. Paul's Cathedral, the Monument, the Royal Exchange, the Tower of London, Tower Bridge and, further round the Thames, Crystal Palace, Westminster Bridge, Houses of Parliament—and your offices."

After that he returned to work with:

"See this?" It was an oyster shell. "We dig hundreds of these out of the building. They were put there in 1680 when Christopher Wren was building this steeple. The shells were used in pointing, and very much more effective they were than the modern methods."

Cows May Be Sold On Time-Payment Basis

Sudbury, Ont.—Milch cows may be supplied on a time-payment basis to back-to-the-land settlers by the Ontario Government this autumn, Hon. Charles McCrea, Ontario Minister of Mines, announced here last week.

"Plans are not yet complete," said Mr. McCrea who is visiting settlers in this riding, "but the Government has agreed that determined settlers who have sufficient hay cut to keep the cow over the winter will be supplied a cow."

Payment for the cows would be made by deducting $2.50 monthly from the vouchers

The half-million British children who left school to seek work at end of the last school year are said to be the finest in physique, health, and intelligence the authorities have ever known. They were born in 1919, the year of the record birth-rate.

OFF COLOUR? HOW IS YOUR LIVER?
Wake up your Liver Bile —Without Calomel

Your liver's a very small organ, but it certainly can put your digestive and eliminative organs out of kilter, by refusing to pour out its daily two pounds of liquid bile into your bowels.
You won't completely correct such a condition by taking salts, oil, mineral water, laxative candy or chewing gum, or roughage. When they've moved your bowels they're through—and you need a liver stimulant.
Carter's Little Liver Pills will soon bring back the sunshine into your life. They're purely vegetable. Safe. Sure. Ask for them by name. Refuse substitutes. 25c at all druggists. 48

QUIVERING NERVES
Yield to Lydia E. Pinkham's Vegetable Compound

When you are just on edge . . . when you can't stand the children's noise . . . when everything is a burden . . . when you are irritable and blue . . . try this medicine. 98 out of 100 women report benefit.
It will give you just the extra energy you need. Life will seem worth living again.
