Durham Stone Plant To Supply No. 10 Highway

The Durham Chronicle says: "An announcement that will be of great interest locally and will be welcomed with real enthusiasm by the employees was issued by the Highways Department the first of the week to the effect that Durham crushed stone will be used in the paving operations on Highway No. 6 and 10. This will mean that the local stone plant will be kept busy supplying material to the contractors the greater part of the summer and as the employees of the plant have had recent experience as to what it means when the plant is shut down during the summer there is no doubt that they will be highly pleased with this piece of news. Dr. D. B. Jamieson, who was in the city Wednesday interviewing the Minister of Highways, was given the assurance that Durham stone would be specified in these contracts.

In all likelihood the mixing plant for the work on No. 6 will remain in the Stone Plant yard the same as last year, and the material hauled to the scene of operations by truck. The stone for the work on No. 10 will likely be shipped by rail."

New Rector Appointed For Maxwell Church

The Right Rev. C. A. Seager, D. D. Bishop of the Anglican Diocese of Huron, has appointed the Rev. M. H. Elston, Rector of St. Luke's church, Yarmouth Heights in Elgin county to the parish of Dundalk and Maxwell, comprising St. Mary's church Maxwell; St. James church, Dundalk; Trinity church, Proton and St. Paul's church Melancthon, to succeed the Rev. M. F. Oldham who went to Tara last December 1st. Mr. Elston is a native of the city of St. Thomas and attended Huron college, London, graduating in 1932. He was ordained Deacon the same year and will be raised to the Priesthood in a short time. He is a young man of great promise and will fill the pastorate of these churches in a very capable manner. He will take charge the middle of May. The former rector will take the Services on April 29th.

Baseball Prospects

This Thursday evening a meeting of baseball players and fans has been called to discuss plans for 1934 operations. It is felt that a strong team can be welded together that will give any team in this section a real welcome. Dundalk and Kimberley will no doubt have teams entered and a fourth team from Heathcote and Thornbury is probable. As the latter are using Creemore, Toronto and Collingwood players this year, many of those with Thornbury in 1933 would then be turned loose and their inclusion in a team from the north end of the valley, it would be strengthened considerably. A five team league should not be organized—either four or six teams should compose the league and have games played every week. Interest in the League is then kept at a high level and a double schedule with four teams entered would be the making of baseball here this year. It is not known yet what locality would field the sixth team but if Markdale would come in there would be added interest. We want baseball served up to us in large quantities to make a successful year.

Stimulated Egg Market

The satisfactory out-turn of last year's storage egg deal and the new development of the export trade during the past year are factors which will lend a stimulating effect to the egg market during the coming spring. Another factor which, perhaps, has not been given sufficient consideration is that the demand for eggs for the manufacture of frozen eggs is much more active this spring than a year ago. At this time last year, stocks of frozen eggs in Canada were fairly heavy and breaking and freezing operations during last spring were not very extensive.

This year the situation is exactly reversed. Stocks of frozen eggs are now practically depleted and with business in general picking up there will be much more activity in the egg breaking industry during the coming spring. It is quite possible that the volume of eggs which will be used in the freezing industry this year may be such as to relieve the market of practically the same quantity of eggs as was exported during 1933.

It's the things you tell confidentially that spread most rapidly and over the largest territory.

Local and Personal

Miss Florence Marr of Toronto is visiting for a month with friends in town.

Miss Donalda McDonald left on Monday to take a position in Toronto.

Mr. Emerson Stevens of Lakeview is the guest of Miss Tena Henderson this week.

Mrs. M. Phillips has returned home after spending the winter with her daughter, Mrs. Wm. Gibson, at Ceylon.

An official of the Ontario Department of Highways was in town last week checking up on loaded trucks travelling on the highways.

The Ladies' Aid of St. John's United church will hold a bake sale on Saturday afternoon, April 21st, at Mr. W. Moore's.

Mr. and Mrs. Gordon Dixon of Walters Falls moved to town on Tuesday and are occupying Mrs. McLeod's residence.

This week the maple syrup makers are reaping a harvest. The run promises to be especially good this year, as there is plenty of frost in the ground to keep the sap moving.

The high school junior and senior hockey teams finished the season in Markdale Thursday evening last. Honors were divided, with the seniors winning 5-4 and the juniors losing 5-1.

The dedication of the new lodge rooms of Prince Arthur Lodge No. 333, A.F.&A.M., will be held on Friday, May 25th, commencing at 4.30 p.m. A. J. Anderson, Deputy Grand Master, will conduct the ceremony, assisted by other Grand Lodge officers.

Messrs. F. H. W. Hickling, W. G. Kennedy, J. Kennedy, Wm. Miller, J. A. Stewart and Geo. Armstrong attended a banquet in Owen Sound on Monday evening given by the York Trading Co. to the merchants of the county. The York Trading Co. is opening a distributing branch in Owen Sound their third in Ontario.

The Easter Thankoffering meeting of the W.M.S. will be held in St. John's United church tomorrow Thursday, at 3 p.m. A good program is being prepared. All the ladies of the congregation, and all others interested in missions, are invited to attend. Lunch will be served.

If the present fine warm weather continues the farmers will shortly be working the land for their spring sowing. Already the fields are drying fast and will soon be in fine shape for working. So far the highways are in good condition and drying out nicely on top, but whether the bottom will go out of them as it did last year remains to be seen.

RESTOCKING THE WOOD LOT AND PLANTING ON THE FARM

The season for planting trees is near, and plans should be made early as trees planted in early spring stand a much better chance of survival than those planted in late spring. The Forestry Branch is continuing the policy of free trees for planting and owing to the fact that there is a surplus of trees the former limit of 3,500 trees for reforestation purposes to one person will not be adhered to. The trees may be used for planting bare land, restocking a woodlot or the establishment of an evergreen windbreak. Five hundred trees are allowed to each applicant for planting a windbreak.

Every farm should have a woodlot large enough to supply the farmhouse with fuel and lumber for minor building and repairs in order that these products may be secured without making a cash outlay. Inferior soils such as sand, gravel, swamps, shallow and steep hillsides should be left in trees, as they will give very small financial returns if cultivated. These are the areas that should be planted, as they will continue to be a liability rather than an asset as long as they are destitute of trees.

Planting is not necessary on areas that have large trees as they will produce seed and it will be distributed by the wind, squirrels and other agencies. This natural reproduction can be secured by fencing out the stock and it will be composed of the more valuable species if they are left and the less valuable (weeds) are removed in order that they will not produce seeds. The planting of a few hundred trees of valuable species not growing now in the woodlot will give more variety and will make quite a difference in the value of the woods fifty years hence. A few trees well planted in locations where they will be sure to grow well is far better than planting thousands poorly where competition of the natural growth will choke them out. Eventually there will be no woodlot in a field if provision is not made to have seedlings, saplings and polewood coming along to take the place of trees that are cut.

Every farm should have an evergreen windbreak to protect the buildings from the cold winds of winter. A farmer can establish a windbreak by making a cash outlay of $1 for express charges on the trees. In 10 to 15 years he will have an effective windbreak that will increase the value of his farm and reduce the amount of fuel necesasry to heat the farmhouse. A year's delay in starting a windbreak means that the farm will be a year longer without an effective windbreak.

Application blanks for trees and descriptive literature may be secured by writing the Forestry Branch, Parliament Buildings, Toronto, or calling at the county agricultural office.

—HAVE YOU RENEWED?

Radio Broadcast

Singing her own song which she composed Mrs. Chester N. Long of Feversham broadcasted over C.K.C.R., Kitchener on Monday evening on a fifteen minute program, which commenced at 8.30 p.m. Mrs. Long composed the words of the song "When the Green Leaves Turn to Gold" the music being written by Miss Dorothy Foster of Rock Mills, who also accompanied at the studio piano. Mrs. Long has a fine soprano voice which came over the air splendidly. Her son, Bob, also sang "Let the Rest of the World Go By" as a tenor solo and in a duet with his mother rendered "Springtime in The Rockies."

Dominion Foundry & Steel Co. in Hamilton increased wages because they say conditions are better and it can be done. Yet all the more credit to the company because it went and did it.
