Winter To Be Mild

Muskrats, Groundhogs, Squirrels; all give indication

That a mild winter is 99 per cent. an assured probability is the forecast of Chief Sam Snake of the Ojibway Indians, at Rama, and Dave Simcoe, colleague of Sam and prophet of the tribe.

First, the beavers have only scanty fur provision. They have not donned their woollies. Next, the muskrats have not started construction work on their winter quarters. The voracious appetite of the groundhog is conspicuous by its absence, and he is positively skinny; the squirrel hasn't bothered much to get supplies into his several pantries; and all the animals from moose to chipmunk are as thin as this season's debutante.

Both chief and prophet next point to the corn; no whiskers on the ears. Then the scantiness of the wild fruits and nuts is shown. And, above all, lakes and rivers are low, showing that a considerable rainfall is yet due.

Pear trees belonging to D. E. McLeod of Stoney Creek are heavy with bloom. In St. Catharines some raspberry bushes have yielded a fine crop of berries though not expected to produce fruit this year.

In Mildmay, Bruce County, Mr. W. G. Helwig, has been picking wild raspberries in the woods for several weeks back.
