The accompanying cut was made from the architect's drawing and illustrates the new Head Office Building now in the course of erection for Imperial Bank of Canada. The building will stand at the south-east corner of King and Bay Streets, Toronto, and will house the chief Toronto Branch as well as the Head Office executive and staff. It is to be a bank building, six stories in height with a frontage of approximately one hundred feet on each street. The building will be on lines of classic beauty, dignified, characteristic and thoroughly modern in the utilitarian sense. It will be a striking example of what can be accomplished in Canadian design and construction with Canadian materials. Every thought has been given to the employment of Canadian labour, both in the purchase of materials and equipment and in the actual construction of the building itself.

The stone used in this building, for example, is an entirely Canadian product from the quarrying of the stone from the Lake St. John Quarry near Orillia to the cutting and setting of the finished material. The guiding principle in the awarding of contracts is to deal with those contractors and supply houses able to furnish "Made in Canada" goods, even down to the production of ores, etc., where this is possible.

The Architects are Messrs. Sproatt & Rolph, the Consulting-Engineers—Messrs. Harkness & Hertzberg and H. H. Angus, and the general contract is being carried out by the Redfern Construction Co. Limited.

Drought-Resisting Wheat Emerging In Canada

Edmonton, Alta. — High grade wheat, equal in quality to Reward wheat, possibly better in yield and having the property of drought resistance, is practically a certainty now although complete development may take another five years, it is indicated at the University of Alberta labratories where it is being bred.

The new type of wheat, which so far has been accorded neither a name nor a nickname is being developed under the direction of Dr. O. S. Aamodt, head of the field crops department of the university.

Experiments have been under way on the new grain for the past six weeks, it was stated and have reached the point now where ultimate success is regarded as assured.

Reward wheat has been cross bred with two Siberian drought resisting wheats in the experiments so far, but it is possible that another wheat of greater yield than either one will be added to produce ultimately a grain of high grade milling quality.

The Siberian wheats imported by Dr. Aamodt when he came to the University of Alberta from the University of Minnesota 6 years ago are Caesium and Multurum, developed by Russian natural scientists 10 years ago to meet the drought conditions of Siberia, which are almost exactly like those in the southern parts of Canada's prairies.

Both Caesium and Multurum however, have low grade milling qualities which would obviate their popularity in Canada. It was to achieve milling excellence with drought resistance that Dr. Aamodt undertook his experiments. The United States Department of Agriculture has just begun similar experiments at Washington.

Dr. Aamodt has been pursuing his studies by the aid of a Federal Research Council grant. He has been assisted by Walter Johnston in the laboratories here, and J. H. Torroe, in charge of field experiments.

PREVENTS MINERAL DEFICIENCY
RICKETS! Proper minerals are the treatment.

FEED FOR PROFIT

Have you unthrifty, poor producing animals? Mineral starvation may be starving your profits! See to it that your stock gets adequate calcium, phosphorus and other vital minerals, which most feeds lack. Feed C-I-L Mineral Supplements!—correctly balanced and digestible. Watch your animals — and your profits—thrive!

C-I-L NUTRI-MIN

100% available and digestible. Di-Calcium phosphate (bone derived) the wholly digestible, naturally balanced, concentrated calcium-phosphorus salt combined with other minerals supplying iron, iodine, sodium and chlorine.

C-I-L SOL-MIN
(Soluble Minerals)

The entire mineral portion of bone, especially processed to secure digestibility, and balanced with other essential minerals. Contains phosphorus, calcium, iodine, sodium, chlorine, iron and sulphur.

Scholarship Not Always Awarded To Best Students

Many a Canadian medical student cherishes the high ambition one day to be able to take post-graduate work at the University of Vienna. This term, at the University of Alberta, sees the uncommon anomaly of a Vienna student continuing his studies at a Canadian university.

Emmerich Munz met in Vienna and married Melmi Silbermann, whose home is at Barons, Alta., and who was studying medicine in the Austrian capital. He decided to take his fourth year in Edmonton, going on to Paris or Edinburgh or perhaps back to Vienna next year.

"When one travels," he explained to a student reporter, "one's philosophy is broader, but the person who always must live in the one country must have the philosophy of his newspaperman."

Munz told of many differences in university life on the continent. There the student, rather than the professor, is the important part of a university. If the professor is no good, no students attend his classes. about one-third of the student body in Vienna are women. Scholarships are not necessarily awarded to the best students but to many deserving poor.

Fewer Families on Relief

It is satisfactory to know that there were 1,069 fewer families on relief in Winnipeg on November 10 than at the same time last year. . . The number of families on relief has declined continuously since last Winter until the present time. On June 2 there were 7,146 families receiving relief; on September 1 there were 5,995, and on November 10 there were 5,979, or 16 fewer families than two months ago.—Winnipeg Free Press.

Have You Heard?

Curtis: "I would like to have some old-fashioned loving."

She: "O.K., come out to the house and I'll introduce you to Grandma."

A Married Slogan—He says: She goes her way, and I go hers.

Man—On her eighteenth birthday I gave my daughter her first front do r key.

Neighbor—That was the proper modern spirit, old man.

Man—Not necessarily—I just got tired having her knock off the milk bottles crawling through the pantry window.

Fashion decrees there shall be no change in the trousers' pocket.

Woman—Are you the plumber?

Plumber—Yes ma'am. I'm the plumber all right.

Woman—Well, I just wanted to remind you that my floors are highly polished and in perfect condition, so be very careful.

Plumber—Oh, don't worry, I've got nails in my shoes, so I won't slip.

The only people we know of who are as foolish as those who ridicule all new ideas because they are new, are those who ridicule all old ideas because they are old.

Man—What game of bridge does your wife play?

Neighbor—Judging from the cost I think it must be toll bridge.

In the modern household , practically everything is operated by switches — except the children!

Murphy — Do you believe in dreams, Riley?

Riley—Oi do.

Murphy—Well, phwat's ut a sign of if a married man dreams he's a bachelor?

Riley—Its a sign he's going to meet wid great disappointment when he wakes up.

There is not going to be much high stepping until we get back on our feet.

A bride and her groom arrived at the big hotel on their honeymoon. The room they occupied was beautifully furnished with a pair of twin beds. Upon seeing them the bride began to cry and the groom said:

Groom—Why, dear, what is the matter?

Bride (sobbing)—I thought we were going to have a room all by ourselves.

A wise man sees as much as he ought, not as much as he can.

Model—You say I am the first model you ever kissed?

Artist—Yes.

Model—And how many models did you have before me?

Artist — Four. An apple, two oranges, and a vase of flowers.

Many unworkable laws have been passed on the theory that things are simple and easily changed. The reverse is true. Life is very complex, taken all together. It rests upon simple enough facts, perhaps. But in their workings and repercussions, they become anything but simple.

One reason why it pays to be honest, is because there is less competition along that line.

Suitor: "Darling, you are everything to me."

She: "Um . . . hold everything."

Road Safety

Says the London Daily Herald:—The decision of the Ministry of Transport to collect and study analytical reports of all road accidents throughout the country is eminently sensible. A little more thought, a little more experiment and a little less slapdashery would not be a bad thing. . . It is not a question of penalising pedestrians for the benefit of motorists. It is a question of organising and disciplining pedestrians for their own safety. There is too much nonsense talked of the "rights of pedestrians," "rights of cyclists," "rights of motorists," and the like. It is not a matter of rights but a matter of co-operation for the common safety. And no road user, of whatever category, should object to reasonable restrictions for his own benefit and that of others.

The General Manager,
Imperial Bank of Canada,
TORONTO.

We report that we have examined the above condensed Balance Sheet as at 31st October, 1934, and have compared it with the books and vouchers at the Head Office and with the certified returns from the branches. We have obtained all the information and explanations that we have required and in our opinion the transactions of the Bank which have come under our notice have been within the powers of the Bank. In our opinion the above Balance Sheet discloses the true condition of the Bank, and is as shown by the books of the Bank. The above Balance Sheet does not include money which has been set aside by the Shareholders from time to time for the purpose of a Pension Fund.

Coronte Coiffure For Bobbed-Haired Girl

The coronet coiffure has long been a favorite with smart women who like to season sophistication with a dash of quaintness. This year it's more popular than ever. Simple to arrange and easy to keep in place, it gives the girl with bobbed hair a chance to wear a long-haired coiffure if and when she desires.

A thick braid is the only absolutely necessary requirement. If you saved your long hair when you had it bobbed the first time, have a braid made out of it. If not, you may buy one that matches the color and texture of your own locks.

Brush the hair back smoothly from the forehead and arrange rows and rows of tiny curls across the back and around the ears. Then put the braid up over the crown of your head so that the ends of it reach just in front of each ear, disappearing under the curls. Pin the braid firmly to the curls and to the smooth hair on top of your head as well. For formal occasions fasten small jewelled stars in the braid.

If your hair is long, the procedure is even more simple. Part your hair down the middle of the back of the head, driving it into two equal parts. Braid each section and then, crossing the braids at the back, bring them up over the top of the head and pin them in place.

Queer World

A Russian named Arjerow has been sentenced to ten years' imprisonment for bigamy. He married fifty-eight wives in six years, and is said to have been the father of 102 children.

Pieces of cow's horn are being used instead of metal plates to hold broken bones together until they can heal. The horn not only holds the parts together, but appears to supply substances made use of by the body in manufacturing new bone.

The Nanking (China) municipal authorities have forbidden youths under twenty to smoke. Offenders are liable to imprisonment and their parents to a fine.

Sani Gulyas has become church organist at Halas, Hungary, at the age of nine. He showed great musical aptitude before he was four, and was a proficient piano-player at the age of six.

A box big enough to hold the giant Jupiter would hold 11 x 11 x 11 or 1,331 earths—eleven each way.

Members of the Groton Hunt Club (Mass.) complained that all the autumn they had been riding after a fox which, as soon as it was cornered. turned and chased the hounds.

A Preston councillor has ridden on horseback from John o' Groat's to Land's End in order to reduce his weight.

Obila Row, a native of Madras, claims to be the smallest man in the world. He is only 2ft. 6ins high, weighs 19 lbs., and has a chest measurement of 16 ins. He is thirty years of age, and during the last ten years has grown only an inch.

Nearly a hundred "Nippys" marry every month.

Longest Bridge

Darlington England firm of engineers has just completed the building of the longest railway in the world. It is the Lower Zambesi bridge, erected to provide uninterrupted railway communication between Beira and Lake Nyasa, in East Africa, and is 11,650ft. 9ins., or nearly two miles and a quarter, in length. There are six approach spans, the latter being supported by concrete piers sunk in the bed of the river, or on mass concrete bases founded on the rock at the river bank. It is over a thousand feet longer than the famous Tay Bridge in Scotland.

The Americans claim that the Hell Gate Bridge, New York, is the longest in the world, and it is, in fact, nearly two thousand feet longer than the Lower Zambesi Bridge; but 10,818 ft. of this is over land and only a total of 2,735ft. is over three separate branches of the East river, whereas the entire width of the Lower Zambesi Bridge is over the water during the winter season.

Some men smile in the evening,
Some men smile at dawn,
But the man worth while
Is the man who can smile
When his two front teeth are gone.

Soured on the World?—That's Liver

Wake up your Liver Bile —No Calomel Necessary

Many people who feel sour, sluggish and generally wretched make the mistake of taking salts, oil, mineral water, laxative candy or chewing gum, or roughage which only move the bowels and ignore the liver.

What you need is to wake up your liver bile. Start your liver pouring the daily two pounds of liquid bile into your bowels. Get your stomach and intestines working as they should, once more.

Carter's Little Liver Pills will soon fix you up. Purely vegetable. Safe. Sure. Quick. Ask for them by name. Refuse substitutes. 25c at all druggists. 51
