To Ease a Headache Fast

Get Real Quick-Acting, Quick-Dissolving "ASPIRIN"

See How "ASPIRIN" Tablets Work

In 2 seconds by stop watch, an "Aspirin" tablet starts to disintegrate and go to work. Drop an "Aspirin" tablet into a glass of water. By the time it hits the bottom of the glass it is disintegrating. What happens in this glass . . . happens in your stomach.

For QUICK Relief

If you suffer from headaches what you want is quick relief.

"Aspirin" tablets give quick relief, for one reason, because they dissolve or disintegrate almost instantly they touch moisture. (Note illustration above.)

Hence—when you take an "Aspirin" tablet it starts to dissolve almost as quickly as you swallow it. And thus is ready to start working almost instantly . . . headaches, neuralgia and neuritis pains start easing almost at once.

● "Aspirin" tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Try it. You'll say it's marvelous.

Divorce Is Absolute

LOS ANGELES — A final decree formally ended last week the marriage of John Barrymore and Dolores Costello. Divorce proceedings were started more than a year ago by Miss Costello. She won an interlocutory decree Oct. 4 1935. Under the terms of her interlocutory decree she received custody of two children, John Jr., four, and Dolores five.

"Hold thought steadfastly to the enduring, the good, and the true, and you will bring these into your experience proportionably to their occupancy of your thoughts."

MINING FLASHES

Surface trenching to the extent of 4,270 feet has been completed on the Admiral Cadillac Gold Mines property and in the course of this work a new vein was uncovered, officials state. Work completed to date, it is stated, has revealed numerous veins and stringers and several test pits have been sunk in which encouraging results have been obtained. O. W. Bell is at the property for the purpose of making a geological survey and mapping of the holdings of the company. Financial arrangements have been completed, whereby sufficient funds are secured to carry on exploration.

* * *

What is believed to be the continuation of the vein encountered about one month ago, 100 feet east of the Pickle Crow boundary, has been picked up in diamond drill hole No. 45, at Winoga Patricia Gold Mines. H. L. Edwards, in charge of operations, in a wire to local interests, reports that hole No. 45 intersected the vein, one section of which assays $149 per ton in gold, while two feet of the wall rock gave a value of $2.80. The former hole showed a gold bearing section at a depth of from 40 to 55 feet, which included four feet of quartz with two feet highly mineralized and a two-inch "sweetener" carrying much visible gold.

* * *

Diamond drilling is proceeding on the Porcupine property of Delwood Porcupine Gold Mines, to prove up showings revealed on surface. One drill hole put down underneath the No. 2 at a steeper angle intersected the vein at a depth of 110 feet, from which a sludge assay of $21 was obtained over a width of five feet. No. 15 hole cut five feet of core averaging $24.50, while another hole intersected what is believed to be the extension of this vein showing a width of eight feet of mineralized quartz. Three other five-foot sections cut by the drill returned $16.80 and $14 per ton in gold. As drill work proceeds on Delwood other vein exposures on surface will be thoroughly explored.

* * *

Estimated net profit of $253,961, equal to 9.48 cents a share is revealed by Macassa Mines for the six months ended September 30, 1936, according to a statement submitted with dividend cheques. This compares with net of $174,607, or 6.64 cents a share in the similar 1935 period. The company milled 34,731 tons in the period giving recovery of $615,948 or $17.73 per ton, against 34,246 tons milled and recovery of $533,795 or $15.58 per ton last year.

* * *

Three diamond drill holes put down on the No. 3 vein at Skookum Gold Mines, Red Lake district, has intersected three lamprophyre dykes showing core lengths ranging up to 61.6 feet. In addition to drilling, a small amount of surface work has been carried on, resulting in discovery of a heavily mineralized dyke near the boundary of claim 6121. The dyke, which shows widths up to three feet, may prove to be an extension of No. 6 vein. G. Allan MacPherson of Mines Selections Ltd., consulting engineers, in a report on the property, states that surface showings and geological conditions known to exist definitely indicate the advisability of shaft sinking and underground exploration. The present drilling is being carried out to obtain knowledge of structural conditions essential to the location of a shaft site.

* * *

Black Eagle Red Lake Mines has discovered a new and well mineralized vein, carrying blue quartz and iron, according to latest word received from the property in the Red Lake area. The vein, which shows width of approximately seven feet, was located between the slate and porphyry formation. A pit is being put down on the showing which appears to be improving at depth, although diamond drilling is required, it is stated, to prove its possibilities.

Boy Scout Jamborees, held in different parts of England this summer were attended by nearly 30,000 Scouts. A North Country gathering at Durham attracted 10,000; a West Country affair at Plymouth drew 8,000, the Midlands Jamboree 8,000, and Sea Scouts from throughout the British Isles gathered at Portsmouth.

The program of the recent Windsor Boy Scout Field Day at Jackson Park, attended by some 300 Scouts, included such novel events as baseball throw, jumping, racing, Scout Law relay, knot relay, fireman's lift relay, log chopping competition, bridge building, morse and semaphore contests, undressing race, soapy water boiling competition, fire by friction, first aid and tent pitching, and concluded with a large campfire and presentation of prizes. The 15th Troop was declared champion, with the 23rd Troop second.

* * *

A new Scout hut erected by Lodge 29, I.O.O.F., for the 10th Chatham Scout Group sponsored by the Oddfellows, was recently officially opened by President H. S. Thomas of the Chatham Local Scout Association at a ceremony at the hut. Members of the Group's troop and pack under Scoutmaster R. Rowden and District Cubmaster Fred Bowers, contributed to the program by brief demonstrations.

BETROTHAL

Oh, we were wafted to the skies on
clouds of lovely blue!
The world became a paradise of pale,
rose-tinted hue.

—o—

Lots of people would never be able to borrow trouble if they had to give security.

—o—

All people who look over your shoulder when you are trying to write should be taken out and shot at sunset as spies of the worst order.

—o—

Officer: You held your position bravely.
New Recruit: I had to hold it. The mud was so thick I couldn't move.

—o—

Friend—Ah, Mr. Branson, and how is your most charming wife?
Mr. Branson—I have only one.

—o—

Joe—What kind of a watch have you?
Friend—I have a wonder watch.
Joe—Wonder watch? Never heard of that before.
Friend—Well, you see, it's this way: Every time I look at it I wonder what time it is.

—o—

Any chump who has a foundation for credit can get into debt up to his eyes, but it takes constructive thinking and hard persistency to pay out.

—o—

Young man—Suppose a very ugly man tried to kiss you, would you object?
Girl—Try it and see.

—o—

You reached into the rainbow's
stripes and chose a golden band;
Then, bending it, you formed a ring
and placed it on my hand.
You said: "I'll fasten this, on top,
with one bright twinkling star,
Through it, my love shall light your
way, no matter where you are!"

—o—

Billers—This typewriter will revolutionize the industry!
Sellers—How?
Billers—Look at the adjustable mirror, powder compartment, manicure set built in, and a hideaway for chewing gum.

—o—

Minister—I do wish I could think of some way to make the members of the congregation pay attention to me when I'm preaching.
Son—Why don't you put the clock right behind the pulpit?

Alleged WIT

Grandpappy Morgan, a hillbilly of the Ozarks, had wandered into the woods and failed to return for supper, so young Tolliver was sent to look for him. He found him standing in the bushes:

Tolliver—Gettin' dark, Grandpop.
Grandpappy—Yep.
Tolliver—Supper time, Grandpop.
Grandpappy—Yep.
Tolliver—Ain't ye hungry?
Grandpappy—Yep.
Tolliver—Well, ain't ye comin' home?
Grandpappy—Nope.
Tolliver—Why ain't ye?
Grandpappy—Can't.
Tolliver—Why can't ye?
Grandpappy—Standin' in a b'ar trap.

—o—

One never understands the real meaning of stamina until he witnesses a woman talking over the telephone.

—o—

Friend—How long have you been working for this firm?
Man—Ever since the boss threatened to fire me.

—o—

Atlas holding the world on his shoulder used to seem to us like a pretty good man, says Toronto man, but he is just a piker to the man who can lift our national debt.

—o—

New Boarder—By gosh, this is excellent hash. What's your recipe for making it?
Landlady—I have no recipe. It just accumulates.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

Smellies Will Help Talkies

LONDON, Eng., — Talk of the "smellies" coming to the screen and ousting the "talkies" may not be such a joke after all. It may be the time is coming when the screen drama shall have its appropriate odors.

An apparatus for synchronizing the smells with pictures has been among the exhibits at the International Exhibition of Inventions at the Central Hall, Westminster, and a description of the invention is interesting.

It is stated that when a scene of a field of violets is shown on the screen violet perfume is released in the building. The device is particularly adaptable to short features, cartoons and general advertising.

Bees Keep Track of Time

L. Illingowrth, Before a beekeepers' Convention at Cambridge, England declared: Bees have a sense of time. If food is put out at a certain time every day, the bees will regularly appear, for they soon get to know the time. Cease to feed them, and they will still turn up; but after six days they will gradually stop coming.

That their knowledge of time has nothing to do with the sun has been proved by experiment, but the feeding time must be at definite periods of the day. If food is placed for them at regular intervals of say, 19 hours, so that the period would still differ each day, the bees would still arrive at the usual hour. The sense of time did not come from hunger, but from the natural processes that go on in the body.

There were certain drugs that accelerated or retarded these processes and if the bees were given the drugs they would be late or early. With the wonderful sense of time bees soon found out just the best time to visit certain flowers for nectar.

The only Children's Church in the world, in Melbourne, is now sixty years old. No one over sixteen years of age may enter it unless they are teachers, preachers or voluntary helpers.
