Make No Mistake This Year—
Start Your Chicks on Startena!

This year when every chick you raise means twice as much profit as it did four or five years ago, the Purina Research Laboratories announce one of the most outstanding developments in the history of chick feeding —the discovery of Pur-a-tene.

What is Pur-a-tene? It's the concentrated goodness that's in many fresh vegetables and fruits. Scientists call it carotene or pro-vitamin A. Poultrymen see it in bright red combs, smooth plumage, added life and vigor. Purina Startena has been known for years as Canada's finest starting feed. Now it is made even better by the addition of Pur-a-tene.

Don't take chances this year. Start your chicks on Startena and get the kind of chicks you want at six weeks. See us today for a supply of Startena!
