The cattle beast found down the rocks last Sunday, belonged to Mr. Will Davidson. They got it out and I am informed by Mr. Bert Davidson, that they found out where it fell over and lit on a ledge about half way down, rolled off and fell the balance of the way, which was about 60 feet all told. The animal was none the worse for its fall outside of being very hungry, having had nothing to eat for, they thought, about two days, where it rolled off the ledge of rock and went on the last of the fall it lit quite near the river, in about 2 feet of mud and no doubt that saved it from having broken bones.

What might have resulted in a serious fire was prevented by the quick thought and also quick action of Mr. John McLean here, Mr. Sled's assistant in the garage went to hurry up the fire in the stove by pouring gasoline out of a can on the fire, there was an explosion and he kicked the can out of the garage door, another explosion followed and a burst of flame several feet high, Mr. McLean who was passing the garage at the time took the risk, rushed in and kicked the blazing can across the road, the fire was right near the pumps where more or less gasoline has been spilled on the ground in filling cars. Another lesson to teach people not to pour gasoline on fire or look out for a blow up. However, they say a miss is as good as a mile, the fire was put out with no damage.
