FARMERS' MARKET.

Kingston, April 1.

There have been, with the exception of the Easter meat show, no markets of any magnitude in the city since our last weekly report, and the transactions have been, in consequence, entirely restricted to the mere supply of family requirements. The quotations generally remain unchanged. The stagnation perceptible in the butter-market indicates that the extreme height of the market price has been reached, and the hitherto exorbitant prices cannot prevail for a much longer period. The price of beef, too, has no doubt reached its maximum, and at Easter the general complaint of the butchers was the refusal of the public to comply with their demands. Flour is at present steady at a low figure, and farmers who hold flour, and wish to realize, can take the present market as the standard for the spring and early summer. Although large dealers show, by their movements, that they have now "touched bottom," yet no immediate rise need be looked for.

THE EXTENT OF THE CUBAN REVOLUTION.

The present movement for the liberation of Cuba from Spanish tyranny began on the 10th of October last, when 127 men at Yare, under General Charles Manuel de Cespedes, declared for the independence of the island. In less than six months it has spread until it now embraces an area of 20,000 out of the 30,000 square miles included in the whole island. Within these limits there are 147 cities, towns, and villages, of which more than one-half are in the hands of the revolutionists.

Out of the 150,600 men able to bear arms on the whole island, 45,000 are in the ranks of the patriots; 30,000 of them being stationed in the Eastern, and 15,000 in the Central Department. The total population of the district in rebellion is 548,738, of which there are in the Eastern Department 126,368 whites, 86,374 negroes free before the revolution, and 51,778 slaves just emancipated by the patriot leaders. In the Central Department the numbers are 172,567 whites, 42,444 negroes formerly free, and 69,207 slaves newly freed. The patriots have thus, it will be seen, given liberty to more than 120,000 slaves, and when they succeed in redeeming the whole island will do the same for 180,000 more.

The estimated wealth of the real estate in the territory held by the patriots was, in 1862, $550,000,000, and its industry and commerce were reckoned as representing a capital of $774,000,000. The annual productions were: Sugar, $62,000,000; tobacco, $15,000,000; other produce, $52,000,000.

It will thus be seen that the insurrection is by no means the trfling matter the Spaniards represent it to be. If the men who are conducting it can but fairly organize and put in action a form of government, there is no reason why belligerent rights should not be conceded to them, if, indeed, their independence should not immediately be acknowledged.—*N. Y. Sun.*

A Jamestown, Chautauque county, chap of tender years has been victimizing the good people of Cleveland, O. The Young Men's Christian Association got work for him, got him board in a pious family, and introduced him to half the moral people in Cleveland. A few days since, however, he decamped, leaving his board bill unpaid and taking with him borrowed articles to the amount of over $50. He was a wolf in sheep's clothing, and probably hasn't at this writing recovered from the affliction.

Levi S. Backus, for many years the publisher of the Canajoharie *Radii*, but who had just commenced the publication of the Cherry Valley *Gazette*, died in the latter place on the 17th inst. He had scratched his thumb on a nail in opening a box; gangrene or mortification set in, and resulted in his death. Mr Backus was deaf and dumb, and was the first person, afflicted with these misfortunes, to publish a newspaper in this country.—*Rochester Union.*

A cable message from Paris announces that Napoleon has demanded an explanation of the King of Prussia in regard to the recent mobilization of troops in the western provinces. France and Prussia are trying hard to checkmate each other on the board of Europe, and the mutual hatred which has existed between them since the days of the first Napoleon will sooner or later end in an open rupture. The French Emperor is crafty, but he has more than his match in Bismarck. Prussia is flushed with her success over Austria, and is inclined to be arrogant: France has dictated to Europe for a long time, and cannot brook a rival whom she has been accustomed to treat with contempt. Bismarck knows that his nation cannot cope with France in a war, although it defeated Austria; and Napoleon, just now, does not wish to embarrass his people in a struggle which would necessarily add to the unsatisfactory state of their finances. He will wait and watch until his government has reduced the oppressive taxation and placed the exchequer in a more prosperous condition by retrenchment, and then he will take the first opportunity that presents itself for settling up old scores with his powerful enemy.

MR BRIGHT ON ADULTERATION.

Lord Edward Cecil asked the House to resolve that Government should bring in a bill for the more effectual punishment of adulterations, and the use of false weights and measures. Mr Bright refused to agree, declaring that many convictions for false weights are merely for inadvertencies, and that till the standards were made more accurate it would be unjust to strengthen the law. Adulteration arose from extreme competition, was promoted by the ignorance of customers, and would disappear when they knew better. Inspection was objectionable, for if traders were to be tracked by inspectors in their private businesses every hour of the day, he should advise them to emigrate. The speech is a perfect illustration of the great art "how not to do it." Nobody was asking for inspection of food, or any such folly. What is wanted is a law empowering a customer to bring the seller of adulterated goods before a magistrate, to be heavily fined on conviction, and his name published like that of a bankrupt. The harmlessness of some adulterations has nothing to do with the matter. Let anybody sell plaster of Paris instead of flour if he likes, or put salt water in his beer, but let him say so. On what principle does Mr Bright object to the adulteration of the coin?

The death of the Earl of Glasgow is reported. The late Earl had for a long series of years been one of the leading supporters of the turf, and was the senior member of the Jockey Club.

All Europe seems to be going wild over velocipedes. Races are being organized at various points, with the usual accompaniments of prizes, betting, and their attendant excitement. Rouen, Vaucluse, and other cities, are preparing velocipede races for Easter Monday; at other points, where these races have already been held, men on horseback have had the greatest difficulty in keeping up with the racers. At some places, as at Vaucluse, where the Municipality has just added a fifth prize to the four previously offered by the Velocipede Club, only the one wheeled variety is to be admitted; at others, the two, three, and four wheeled varieties are equally in favour. Velocipede races have also just come off at Naples, and at Berlin. In fact the *furore* created by this ingenious "mount" seems to be spreading all over Europe. The Prince Imperial is exceedingly fond of this style of riding, and is to be President of the Paris Club. He is to have a dinner party, on the 16th instant, to celebrate his thirteenth birthday, and will on that occasion present each of his guests with a velocipede.

DR. VICTOR BAUD'S ORGANIC MEDICINE.

DR V. BAUD, Graduate and Member of the Medical College of Paris, Chief Physician Extraordinary for Epidemics in Paris, late M.D. of the Civil Hospitals of Algiers, has just introduced in England his ORGANIC MEDICINES.

They consist of three preparations—

THE BAUDEINE,

An efficient and prompt Remedy for Cholera, Yellow Fever, Diarrhœa, Dysentery, and the excessive action of the Bowels. A gold medal was awarded by the French Government to Dr V. Baud for this valuable preparation.

Price: Small, 1s 1½d; Medium, 4s 5d; Large Size, 11s per Bottle.

THE DIASTATIZED IRON,

For strengthening the System.—Price 2s 9d per Bottle.

THE DIASTATIZED IODINE,

For purifying the Blood.—Price 2s 9d per Bottle.

*** The above Preparations are in the form of Sweetmeats, pleasant to the taste, and particularly adapted for Infants and Mothers nursing.

By the combination of the Iron or Iodine with Cress Seeds in a state of germination, they are united with organic life, which thus renders them digestible. The irritative and stubborn mineral has thus become the nucleus of an organic substance capable of being absorbed by the blood without injury to the stomach.

Agent for England and British Possessions, E G. DUFRESNE, 79 Watling Street.

May be obtained of all Chemists.

CHOLERA, DIARRHŒA, &c.

EARL RUSSELL sent to the College of Physicians a communication received by him from Manilla (where cholera had been graing fearfully) to the effect that, of all remedies tried, Chlorodyne was the most effective.

"The day seems as yet, unhappily, far distant when public opinion or State interference will prevent the advertisement or sale of any secret medicine whatsoever. It is to be hoped that the profession will continue to brand as unworthy the conduct of those of its members who by testimonial or otherwise aid the disposal of such things."—*Lancet.*

TOWLE'S CHLORODYNE.

The Original Preparation of known Composition.

From Dr C. Kidd, Author of Standard Works on Chloroform.

Sackville-street, Piccadilly, London.

Sir,—I think if you would advertise your Chlorodyne more than you do, you would help to beat the others, which are secret compounds, out of the market. Many medical men think with me, and recommend your compound, but will never prescribe a secret remedy. CHARLES KIDD, M.D.

To Mr Towle, Chemist, Manchester.

A Surgeon from New York writes:—"I only requires to be known to be appreciated. I have no hesitatien in characterising it (viz., Towle's Chlorodyne) as the most useful medicine that has appeared during the present century. In diarrhœa, colic, ague, spasms, I have found it to relieve more pain and cause more joy than any other article that can be named."

NOTE.—The Profession is warned against inferior, secret, and cheap compounds now in the market. Each genuine bottle bears a facsimile of Proprietor's signature on the stamp outside.

LIQ. CHLOROFORMI Co. OR CHLORODYNE WITHOUT PEPPERMINT.

Sole Manufacturer:—A. P. Towle, Chemist, Manchester.

THE ORIGINAL CHLORODYNE, invented by R. Freeman, Pharmaceutist, is allowed to be one of the greatest discoveries of the present century. It is largely employed by the most eminent Physicians and Surgeons in hospital and private practice in all parts of the world. It has effects peculiar to itself, and which are essentially different to those produced by the various compounds bearing the name of Chlorodyne, but have no pretence to possessing its virtues. It rapidly relieves pain, from whatever cause, allays the irritation of fever, soothes the system under exhausting diseases, and gives sleep without producing any one of the unpleasant feelings so commonly arising from the use of opiates. It continues to hold its unshaken position in the estimation of the Profession as the best, most reliable, and cheapest preparation. Eminent and scientific Physicians made affidavits that they have tested its effects in careful comparison with those of "DR. COLLIS BROWNE'S CHLORODYNE," and deposed to the facts that they found it a more certain and reliable preparation, and greatly preferred "FREEMANS."

Earl Russell communicated to the Royal College of Physicians and to Mr Freeman, that in Manilla the only remedy of any use in Cholera was Chlorodine.

The Medical Times and Gazette, January 13th, 1866, states, "It has an immense sale amongst the public, and is prescribed by scores of Orthodox Medical Practitioners, and, of course, it would not be thus singularly popular did it not supply a want and fill a place."

Manufactured by the Inventor, Richard Freeman, 70, Kennington Park Road, London, S.

The genuine has engraved on the Government Stamp (outside each Bottle), "FREEMAN'S ORIGINAL CHLORODYNE."

CONDY'S PATENT FLUID or natural disinfectant purifies, deodorises, and disinfects, by the agency of nascent or ozonic oxygen,—its active principle. Being entirely innoxious, this truly scientific preparation is peculiarly adapted for the following useful purposes, for which all other disinfectants, on account of their poisonous or other objectionable qualities, are unavailable and useless:—

Detecting organic impurities in air and water.

Purifying drinking and other water from organic matter, lead, &c.

Freshening the air of close places, and removing bad smells.

Freeing meat, fish, butter, or other provisions from taint.

Counteracting the effects of organic poisons taken into the stomach.

Curing Musty provender. Freeing wheat and other seed from smut.

Maintaining the health of plants in pots and conservatories.

Preserving and restoring the freshness of cut flowers kept in water.

Destroying the blight of the potatoe, vine, hop, mulberry tree, &c.

Washing dogs and other domestic animals.

Cleansing bottles, beer barrels, pickling tubs, dairy utensils.

Washing the hair and darkening its colour when turning grey.

Enhancing the purifying and invigorating effects of baths and tubs.

Dressing poisoned wounds and destroying animal virus.

Treating the infectious diseases of cattle, horses, dogs, &c.

One gallon makes 200 to 300 gallons adapted for use.

N.B.—Condy's Fluid is the Standard Scientific Test for Organic Matter in Water, and affords the only known means of rapidly and completely freeing Drinking Water from Organic Taint, which is so common a cause of serious disease.

To rapidly purify the air, use the diluted fluid with "Condy's Ozoniser" or other Spray-producer.

CONDY'S PATENT OZONISED WATER,

(FOR TOILET PURPOSES,)

Removes from the mouth impure and foreign tastes and odours, whether arising from tobacco or other causes, and counteracts the irritation and morbid secretions of carious teeth. It purifies and softens the skin, and, used in the bath, tends to promote a healthy state of the whole body.

H. BOLLMAN CONDY,
Patentee, Battersea, London.

JUDSON'S SIMPLE DYES FOR THE PEOPLE. Any one can use them; anything can be dyed with them. It is impossible in this small space to enumerate the many uses to which these wonderful and beautiful chemical preparations can be applied; while their chief use is for dyeing textile fabrics, they are also invaluable as a colouring agent for almost every known material, the ease with which they can be used and the brilliancy of the result being, indeed, almost magical. By their use almost any article of clothing can be dyed in a few minutes for a few pence without soiling the hands.

MEMORANDA.

MAGENTA: The strength and beauty of this dye is almost incredible. A Sixpenny bottle will dye 20 yards of Bonnet Ribbon in 10 minutes; it will also produce a clear Rose Pink by using less dye. Suitable also for Woollen Goods, Feathers, Silks, &c.

WOOLLENS: Magenta, Mauve, Violet, Purple, Orange, Pink, and Crimson produce the most satisfactory results. Use a large quantity of boiling water in an earthen pan. RIBBONS and SILKS: Brush them with soap and water to avoid creases, and to render them clean. Dye in boiling water.

FEATHERS: Dye in hot water (a few drops of the dye is sufficient for one feather).

COTTON: Mauve, Violet and Purple are recommended.

LEATHER: Blue, Magenta, Violet and Orange. Dye in warm water.

WHITEWASH: To color: *Magenta*, for Pink or Rose; add half a bottle to a pail of water, then stir in the Whitening as usual. Mauve, Violet, Purple,—Blue and crimson produce pretty tints by using one bottle or more, as directed above.

STARCH: Stir in a few drops of Colour—Magenta, Mauve, Violet, Blue or Pink; these impart delicate tints to Lace, Linen, &c.

WILLOW SHAVINGS, Wicker, Ivory, Bone, Hair, Fibres, Seaweed, &c., attract the dye quickly, if applied in boiling water.

BLUE: For laundry purposes is A 1.

BOOK EDGES: A Sixpenny bottle of Magenta, Violet, Crimson or Blue will make from a pint to a quart of beautiful colouring, according to shade required. Apply with a brush.

PAPER and WOOD STAIN: Ditto.

OAK STAIN: A bottle of No. 2 Black to half a-pint of hot water.

SATINWOOD STAIN: A Sixpenny bottle Canary dissolved in a pint of boiling water

PHOTOGRAPHS may be tinted; dilute the dye with water; a bottle of Magenta to a pint of water. &c.

ILLUMINATING: Magenta, Violet, Blue, Orange; pour a few drops into an egg cup add warm water; use with a brush or pen Borders of books, similar to Ward and Lock's Arabian Nights, &c., may be prettily illuminated in this manner.

BLANCMANGE, JELLY, CORN FLOUR ICE CREAMS, &c: While in a liquid state add one or two drops of Magenta. A more simple or elegant tinting cannot be had.

CONFECTIONERS will find Magenta, Violet, Orange and Pink useful colours.

GELATINES and GLUES are successfully coloured with these dyes.

INK: A Sixpenny bottle of Magenta to a pint or more of cold water

WATER: One drop of dye will tint a quart.

PRINTING on Cotton, Silk or Wool in the ordinary way.

BLENDING some of the dyes in the bath will produce an infinity of shade, according to taste.

LEA AND PERRINS' Worcestershire Sauce. This delicious Condiment, pronounced by Connoisseurs "The only good sauce," is prepared solely by Lea and Perrins. The Public are respectly cautioned against worthless imitations, and should see that Lea and Perrins' Names are on Wrapper, Label, Bottle, and Stopper. Ask for Lea and Perrins' Sauce.

Sold Wholesale and for Export, by the Proprietors, Worcester; Messrs. Crosse and Blackwell; Messrs. Barclay and Sons, London; &c.-&c.; and by Grocers and Oilmen universally

By Henry Stephens of Edinburgh and the late J. P. Norton, of Yale College. 2 vols. Royal Octavo, 1600 pages and numerous Engravings.

PRICE—$7, for the two volumes. By the post paid, $8.

DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL.

DR. DE JONGH'S Oil is convincingly proved by an overwhelming weight of medical testimony, and by the practical test of successful experience for twenty years in all parts of the world, to be, beyond all question, the purest, the most efficacious, the most palatable, and, from its rapid curative effects, the most economical of all kinds.

Hence the universal celebrity of Dr. de Jongh's Oil, and the unparalleled demand for this unrivalled preparation.

SELECT MEDICAL OPINIONS.

SIR HENRY MARSH, BART., M.D.,
Physician in Ordinary to the Queen in Ireland.

"I have frequently prescribed Dr. de Jongh's Light-Brown Cod Liver Oil. I consider it to be a very pure oil, not likely to create disgust, and a therapeutic agent of great value."

DR. EDWARD SMITH, F.R.S.,
Medical Officer to the Poor Law Board of Great Britain.

"We think it a great advantage that there is one kind of Cod Liver Oil which is universally admitted to be genuine—the Light-Brown Oil supplied by Dr. de Jongh. It has long been our practice, when prescribing the oil, to recommend this kind, since, amidst so much variety and uncertainty, we have confidence in its genuineness."—(Extract from "Consumption: its Early and Remediable Stages.")

DR. LANKESTER, F.R.S.,
Coroner for Central Middlesex.

"I consider that the purity of this oil is secured in its preparation, by the personal attention of so good a chemist and intelligent a physician as Dr. de Jongh, who has also written the best medical treatise on the oil with which I am acquainted. Hence, I deem the Cod Liver Oil sold under his guarantee to be preferable to any other kind as regards genuineness and medical efficacy."

DR. LETHEBY,
Medical Officer of Health, and Chief Analyst to the City of London.

"In all cases I have found Dr. de Jongh's Light-Brown Cod Liver Oil possessing the same set of properties, among which the presence of cholaic compounds, and of iodine in a state of organic combination, are the most remarkable. It is, I believe, universally acknowledged that this oil has great therapeutic power; and from my investigations, I have no doubt of its being a pure and unadulterated article."

DR. BARLOW, F.R.S.,
Senior Physician to Guy's Hospital.

"I have frequently recommended persons consulting me to make use of Dr. de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure oil, well fitted for those cases in which the use of that substance is indicated."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."

"Dr. Granville has found that Dr. de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the pale oil."

EDWIN CANTON, ESQ., F.R.C.S.,
Surgeon to Charing-cross Hospital.

"For several years past I have been in the habit of prescribing Dr. de Jongh's Light-Brown Cod Liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."

TIDMAN'S SEA SALT, for producing a real Sea Bath in your own Room. The above favourite preparation is strongly recommended.

Sole Proprietors—TIDMAN & SON, Chemists, 16 Wormwood Street, London, E.C.
