THURSDAY EVENING, MARCH 5.

LONDON TIMES ON THE ABYSSINIAN EXPEDITION.

The letter from Abyssinia which appear our last impression will explain to public the true character, history, and ects of the costly expedition. The rise itself is, as we recently observed, tion of money, but it is a question ney because it is a question of time, is a question of time because of the difficulties which our contributor fully explains. In a few words, the this,—that what is known in mili language as the base of our operations perforce to be established at a distance miles from the landing place of the The army can only begin its ad from Senafe, and for this reason, Senafe is the nearest point to the with which communication can be fully maintained. If our chief magistrate had have been establishe that Zoulla, the troops could have entered upon work of the expedition from that we should, perhaps, by this time accomplished four objects. Unhappily, is a part of the road between Zoulla a day or two of rain would render totally impassable, and it is therefore ry to organize at Senafe instead of Zoulla that depot of stores and provi from which the advancing army is to supplied. From Zoulla, where the were disembarked, to Magdala, where prisoners are confined, the distance is 400 miles. But before the troops begin to march upon Magdala the landed at Zoulla must be forwarded Senafe, and there accumulated in quantities sufficient for the needs of the expedi The despatch of these goods has the work of the army up to the pre time. surveys of exploring parties showed between the sea-coast and the foot of mountain range about 14 miles distant barren and sandy plain. At the foot this a pass was found to open head by a chain of defiles 50 miles long to table land above. The opening of this represents the station called Koomayloo, the first station on the table land is Senafe. Between those two stations lies work to be done, and unhappily it was covered that a particular point, just ten above Koomayloo, the defile is most one absolutely impassable in the rainy The road, in fact, at this point nothing more than the dry bed of a narrowed to the width of a few by cliffs rising precipitously on either When the rains began this piece of would be simply the channel of a stream, and all communication between the table land and the coast would consequently be at an end. Under these circumstances there was but one resource establish the base of operations on table land itself, so as to dispense communications below, and to make best of the dry season in moving the from the coast to the table that is, from Zoulla to Senafe. military as in other communications are various methods of transport table. There is railway communication which is the best of all; communication by wheeled carriages, which is next and, lastly, transport by packhorses baggage animals. From Zoulla to Koomayloo, across the 14 miles of plain, our pioneers have already laid a railroad, so this portion of the distance will soon no trouble at all. In the long pass Koomayloo to Senafe the object was get carriage transport if possible, and appears now to have been accomplished but the work was severe, and for two together nothing could be carried Zoulla to Senafe except on the back mule or other pack animal. Now, pack animals could only take a load 40lb. each, of which 40lb. went for own food on the way, so that weight of stores represented the contribution made to the magazines by a mule's journey to the table from the coast. Give the animal a loaded carriage and he can draw 300 weight sides his own provender, so that the means of transport would be doubled. In thus, however, the work of accumulating by such means a store of provisions munitions for an army of 8,000 men be very arduous indeed. In the time the troops themselves could not moved. They might have been marched easily enough from Zoulla to Senafe weeks ago, but when there they could not be fed, and so they were necessarily in the plain until the magazines in the hands had been completed.

It must now, however, be observed that all this preliminary labour has been accomplished, and the army has been parked on the table land at Senafe, we shall be at the beginning of a doubtful, if difficult, campaign. At an extraordinary cost of labour, ingenuity, and perseverance we shall have established our base operations at Senafe instead of Zoulla, from friends itself we must then commence a march 340 miles over a country of which we know very little. It appears to be assumed that no natural obstacles will intercept our communication with Senafe, whether we advance; but, at any rate, line of operations must be kept open, thus from the magazines at Senafe our may at any stage of the road between Senafe and Magdala receive its supplies. In short, all we have done hitherto mean only the accomplishment of an easy and unexpected task impossible to be by circumstances as a preliminary movement. We have now to begin the campaign, as we might have begun it first had the Sooro defile not been found impassable.

It is strange and unmerited complication of difficulties, that our very honesty of purpose should be turned against us, and that it is the fact. We proclaimed our sincerity on entering the country that we desired nothing but the deliverance of the prisoners unjustly confined. We disclaimed all idea of conquest, and distinctly announced that when the captives had been rescued we would retire from Abyssinia without retaining any hold upon the people or the land. This frank declaration, intended to assure and conciliate the Abyssinian chiefs, has had the effect of alarming them into a cautious and half-hearted neutrality. They would have been perfectly willing to aid us against Theodore—the enemy and terror of them all—but only on condition of effectual protection against his revenge. If we were simply to march from Senafe to Magdala, and from Magdala back to Senafe, and then take ship again for our own dominions, we shall leave our allies at the mercy of the common foe, who, relieved from our presence, will wreak his vengeance on those who sided with us against him. So the chiefs, we are told, hang back from our alliance, and leave us to do the work ourselves.

However, as this work according to all appearance, is no more than we can do with ease, it is, perhaps, as well that we should have no alliance to entangle us, and as the great difficulty in our way, that of getting a place to start from, has now been surmounted, we may hope soon to receive more encouraging accounts of the progress of the expedition. In the meantime the reports, not only of the health of troops, but of the good spirit and cordial understanding of all branches of the force, are highly satisfactory. We have an effective, and confident army actually on Abyssinian soil, and we have, in a military sense, no enemy before us. What difficulties may intervene between Senafe and Magdala, or what we may find at Magdala when we get there, it is, of course, impossible to say; but the dangers of the climate and even the obstacles of the country have hitherto proved far less than we had been led to expect.—*Times*, 13th.

The project of excavating a tunnel under Niagara River is again revived, with promise that the work will be commenced at an early day. The Buffalo *Courier* states that the enterprise is in the hands of capitalists and practical men, both in Canada and in New York State, and is likely to result in its construction.

The individuals who follow that branch of the fine arts vulgarly called counterfeiting in the United States, possess a large amount of political influence, and readily escape the penalties of the law. By a Congressional report just printed, it appears that since April, 1865, the President has pardoned one hundred and twenty-five persons convicted of making or uttering counterfeits of national currency.

A scandalous pamphlet has been published in Paris, asserting that the Empress Eugenie had an illegitimate child before marrying the Emperor; that this child is in England, in the hands of persons who are constantly levying black mail on her Majesty, and that her famous trip to England was solely caused by her desire to hush up the clamour of the above mentioned persons.

Frederick W. Elberling, assistant engineer at the Gramercy Park Hotel, New York, died on Wednesday from the effects of a singular accident. On the 12th inst. Elberling was directed to thaw out a frozen gas pipe by applying cloths which had been steeped in boiling water. Instead of doing this, he took a lighted candle and a can of alcohol, and pouring some of the alcohol on the pipe, set fire to it. The fire communicated to the can of alcohol, which exploded, and the burning fluid was scattered over Elberling, burning him severely. He then leaped into a large tub to extinguish the flames, but unfortunately turned on the hot water instead of the cold water, fatally scalding himself.

Dear Sirs,—We have much pleasure in testifying to the order of training for commercial pursuits obtained by the young men educated at your College.

We have now in our employment one of your graduates who, notwithstanding the fact that he never had any previous experience, has proved himself a most reliable, accurate, and efficient Book-keeper.

We may further state, that having had occasion to engage another office hand we gave a decided preference to one of your graduates. In short, we have no hesitation in saying, that as far as our experience goes, your course of training is eminently adapted to make a thoroughly efficient office man.

Yours truly,

Messrs MUSGROVE & WRIGHT,
B. A. Com. College, Toronto.

Dear Sirs,—We can eminently recommend your establishment to the business public, from which to select their Book-keepers. The young man in our employ bears testimony to the efficient system taught in your College, and the accurate habits derived therefrom, and though different houses pursue different methods, yet the general principles, rules, and varieties of commerce are so thoroughly inculcated by your system of tuition as to render the knowledge applicable to each new feature in each peculiar system.

Your efforts are worthy of every appreciation in founding a sound Commercial Emporium of the intelligent youth of Canada, and though occasionally students fail to become proficient, it can only be attributed to lack of ability on the students part, and not the incapacity of the tutor. We shall ever give and advise preference to your pupils for an office, and feel glad to thus attest our experience of the same.

CAUTION.

THE perfection and cheapness of the American (Waltham) watch have given it such a wide-world celebrity that unscrupulous dealers years ago imitated its style and pirated its trade marks. Irresponsible dealers are occasionally found who furtively trade upon the popularity of the American watch by selling a base imitation under the name of the genuine article.

It is hardly necessary to state that such watches are worthless as time-keepers, and when bought for the genuine are calculated to injure the high reputation which our watches have attained. The several grades of the American watch (except the lowest grade marked Home Watch Co.) are guaranteed by special certificate bearing the number of the watch and the signature of the Treasurer of the Company, R. E. ROBBINS. The purchaser should in all cases require one of these certificates, which is furnished to all dealers in the genuine watches.

The following are the trade marks on the several grades of our manufacture:—

Office of the General Superintendent,
Altona, Pa., 15th Dec., 1866.

GENTLEMEN—The watches manufactured by you have been in use on this Railroad for several years by our engine men, to whom we furnish watches as part of our equipment. There are some THREE HUNDRED OF THEM CARRIED ON OUR LINE, and we consider them GOOD and RELIABLE TIME-KEEPERS. Indeed I have great satisfaction in saying YOUR WATCHES GIVE US LESS TROUBLE and have worn and do wear much longer without repairs than any watches we have ever had in use on this road. As you are aware we formerly trusted to those of English manufacture, of acknowledged good reputation, but as a class they never keep time as correctly, nor have they done as good service as yours.

In these statements I am sustained by my predecessor, Mr Lewis, whose experience extended over a series of years.

Respectfully,
EDWARD H. WILLIAMS,
General Superintendent.

NEW YORK CENTRAL RAILROAD.

Locomotive Dep't Western Division,
Rochester, Dec. 24, 1866.

GENTLEMEN—I have no hesitation in saying that I believe the great majority of locomotive engineers have found by experience that WALTHAM WATCHES ARE THE MOST SATISFACTORY of any for their uses. They RUN WITH THE GREATEST ACCURACY AND STEADINESS, notwithstanding the rough riding of an engine; and as I have NEVER KNOWN ONE TO WEAR OUT, they must be durable. I hope to see the time when railway companies will generally adopt your watches, and furnish them to all engineers and conductors. In my opinion it would greatly tend to promote regularity and safety.

Yours respectfully,
CHARLES WILSON,
G. Chief Engineer,

HOOFLAND'S GERMAN BITTERS
AND
HOOFLAND'S GERMAN TONIC,
THE GREATEST REMEDIES FOR ALL DISEASES OF THE
Liver, Stomach, or Digestive Organs.

HOOFLAND'S GERMAN BITTERS

Is composed of the pure juice (or, as they are medicinally termed *Extracts*) of Roots, Herbs, and Barks, making a concentrated, highly and entirely *free from alcoholic admixture of any kind.*

HOOFLAND'S GERMAN TONIC,

Is a combination of all the ingredients of the Bitters, with the purest quality of *Santa Cruz Rum*, Orange, &c., making one of the most pleasant and agreeable remedies ever offered to the public.

Those preferring a Medicine free from Alcoholic admixture, will use

Hoofland's German Bitters

Those who have no objection to the combination of the Bitters, as stated, will use

Hoofland's German Tonic.

They are both equally good, and contain the same medicinal virtues, the choice between the two being a mere matter of taste, the Tonic being the most palatable.

The stomach, from a variety of causes, such as Indigestion, Dyspepsia, Nervous Debility, etc., is very apt to have its functions deranged. The Liver, sympathizing as closely as it does with the Stomach, then becomes affected, the result of which is that the patient suffers from several or more of the following diseases:

Constipation, Flatulence, Inward Piles, Fulness of Blood to the Head, Acidity of the Stomach, Nausea, Heartburn, Disgust for Food, Fulness or Weight in the Stomach, Sour Eructations, Sinking or Fluttering at the Pit of the Stomach, Swimming of the Head, Hurried or Difficult Breathing, Fluttering at the Heart, Choking or Suffocating Sensations when in a Lying Posture, Dimness of Vision, Dots or Webs before the Sight, Dull Pain in the Head, Deficiency of Perspiration, Yellowness of the Skin and Eyes, Pain in the Side, Back, Chest, Limbs, etc., Sudden Flushes of Heat, Burning in the Flesh, Constant Imaginings of Evil, and the Great Depression of Spirits.

The sufferer from these diseases should exercise the greatest caution in the selection of a remedy for his case, purchasing only that which he is assured from his investigations and inquiries possesses true merit, is skilfully compounded, is free from injurious ingredients, and has established for itself a reputation for the cure of these diseases. In this connection we would submit those well-known remedies—

Hoofland's German Bitters,
AND
Hoofland's German Tonic

PREPARED BY Dr. C. M. JACKSON,
Philadelphia, Pa.

Twenty-two years since they were first introduced into this country from Germany during which time they have undoubtedly performed more cures, and benefited suffering humanity to a greater extent, than any other remedies known to the public.

These remedies will effectually cure Liver Complaint, Jaundice, Dyspepsia, Chronic or Nervous Debility, Chronic Diarrhœa, Disease of the Kidneys and all Diseases arising from a Disordered Liver, Stomach, or Intestines.

DEBILITY,

Resulting from any Cause whatever

PROSTRATION OF THE SYSTEM,

induced by Severe Labor, Hardships, Exposure, Fevers, &c.

There is no medicine extant equal to these remedies in such cases. A tone of vigor is imparted to the whole system, the appetite is strengthened, food is enjoyed, the stomach digests promptly, the blood is purified, the complexion becomes sound and healthy, the yellow tinge is eradicated from the eyes, a bloom is given to the cheeks and the weak and nervous invalid becomes a strong and healthy being.

PERSONS ADVANCED IN LIFE,

And feeling the hand of time weighing heavily upon them, with all its attendant ills, will find in the use of this BITTERS, or the TONIC an elixir that will instill new life into their veins, restore in a measure the energy and ardor of more youthful days, build up their shrunken forms, and give health and happiness to their remaining years.

NOTICE.

It is a well-established fact that fully one-half of the female portion of our population are seldom in the enjoyment of good health; or, to use their own expression "never feel well." They are languid, devoid of all energy, extremely nervous, and have no appetite.

To this class of persons the BITTERS, or the Tonic, is especially recommended.

WEAK AND DELICATE CHILDREN

Are made strong by the use of either of these remedies. They will cure every case of MARASMUS, without fail.

Thousands of certificates have accumulate in the hands of the proprietor, but space will allow of the publication of but a few. Those, it will be observed, are men of note and of such standing that they must be believed.

Testimonials.

HON. GEO. W. WOODWARD,
Chief Justice of the Supreme Court of Pa., writes:

Philadelphia, March 16, 1867.

"I find Hoofland's German Bitters is a good tonic, useful in diseases of the digestive organs, and of great benefit in cases of debility, and want of nervous action in the system. Yours truly,

GEO. W. WOODWARD."

HON. JAMES THOMPSON,
Judge of the Supreme Court of Pennsylvania.

Philadelphia, April 28th, 1866.

"I consider "Hoofland's German Bitters" a *valuable medicine* in case of attacks of Indigestion for Dyspepsia. I can certify this from my experience in it. Yours, with respect.

JAMES JOHNSTON."

FROM REV. JOSEPH H. KENNARD, D. D.
Pastor to the Tenth Baptist Church, Philadelphia.

Dr. Jackson—Dear Sir: I have been frequently requested to connect my name with recommendations of different kinds of medicines but regarding the practice as out of my appropriate sphere, I have declined; but with a clear proof in various instances and particularly of the usefulness in my own family, of Dr. Hoofland's German Bitters, I depart for once from my usual course, to express my full conviction that, for general debility of the system, and especially for Liver Complaint, it is a safe and valuable preparation. In some cases it may fail; but usually, I doubt not, it will be very beneficial to those who suffer from the above causes.

Yours, very respectfully,
J. H. KENNARD,
Eighth, below Coates St.

FROM REV. E. D. FENDALL,
Assistant Editor *Christian Chronicle*, Philada.

I have derived decided benefit from the use of Hoofland's German Bitters, and feel it my privilege to recommend them as a most valuable tonic, to all who are suffering from general debility or from diseases arising from derangement of the liver.

Yours truly,
E. D. FENDALL.

Caution.

MOREHEADS
MAGNETIC PLASTER.

The Great Strengthener and Pain Destroyer.

The best and cheapest Household Remedy in the World. Simple and pleasant in its application, certain and effectual in its results. Suitable for the relief of Pain at any time, in any part of the human system, and under all circumstances. If you put this Plaster anywhere, if Pain is there, the Plaster will stick there until the Pain has vanished. The Plaster magnetizes the Pain away, and

PAIN CANNOT EXIST

WHERE THIS PLASTER IS APPLIED.

Rheumatism, Lameness, Stiffness, Weakness, Debility, Nervousness, Neuralgia, Dyspepsia, Coughs and Colds, Pains and Aches of every kind are IMMEDIATELY RELIEVED, and with a little patience, PERMANENTLY CURED, by the magic influence of the MAGNETIC PLASTER. It is the simplest, surest, safest, pleasantest and cheapest remedy in existence. Its application is universal—qually to the strong man, the delicate woman, and the feeble infant. Its use is agreeable, and without annoyance and trouble. Its price is within reach of all—rich or poor; all may have it, and all should have it, who are sick and suffering in any way.

Put up in air tight tin boxes, thus keeping it always fresh and pure. Each box will make four to six Plasters, and a child can spread them. Price 25 cents a box.
