Messrs. Elmer and Reggie Nichols are visiting their grandparents, Mr. and Mrs. Geo. Ross.

Essential Elements

The three "essential" elements of fertility are nitrogen, phosphoric acid and potash. These elements have received this name not because they are more essential to the growth of crops than the other nine or ten elements entering into the composition of plant tissues, but because they are the three elements which must be constantly returned to the soil if its productiveness is to be maintained under ordinary systems of farming.

A man in Montreal was fined $100 for illegally practising as a lawyer. And we noticed only a few weeks ago that three lawyers had been banned for illegal practices.
