How Can I?

BY ANNE ASHLEY

Q. What can I do if candy I have been making becomes grainy?

A. If the candy becomes grainy, add half a teaspoon of cream of tartar and a creamy texture will result. Also, if a tablespoon of vinegar is added to the sugared candy, and it is reheated, a creamy texture will be acquired.

Q. How can I sharpen a meat grinder?

A. If the meat grinder is working poorly, run a piece of sandpaper through it. This will sharpen the cutters and free them of grease. Rinse well with boiling water.

Q. How can I remedy cream which is too thick for whipping?

A. Place the dish in another dish of cold water. When it is chilled, place in a dish of hot water, and it will then whip easily.

Q. How can I press suits properly?

A. Try this method: Fold a large piece of newspaper lengthwise, wet one side of it, and fold the dry side over the wet side. Place the wet side against the suit and iron on the dry side. This also prevents shine.

Q. How can I refreshen bread and rolls that have become stale?

A. Place in a brown paper bag; then dampen the bag and put into the oven until thoroughly heated. They will be like newly baked.

All Tenants Can Appeal On Rents

If It Appears Exorbitant—Ottawa Board Has Power to Set Rentals Anywhere In Canada

Persons living in an uncontrolled rental area may appeal to the rentals administrator of the Wartime Prices and Trade Board if they feel they are paying an exorbitant rental a spokesman for the board said last week.

He said the board has authority to set rentals anywhere in Canada, although rentals committees have been set up only in areas principally affected by rentals increases

CERTAIN UNCONTROLLED AREAS

In the case of an appeal from a tenant in an uncontrolled rental area, landlord and tenant are required to submit particulars and a decision in them made.

The procedure in controlled areas differs only in that the parties in the dispute receive hearings instead of submitting their claims in writing.

Britain's "Air Ambassador" Inspects Bomber

Sir Hugh Dowding, England's "air ambassador" to the United States looks over a new high-speed giant Martin bomber at the Glenn L. Martin plane plant at Baltimore. The new ship is explained by J. F. Hartson, LEFT, executive vice-president of the plant. Sir Hugh is in the United States to make a survey of aircraft factories and to see what what can be done toward a general standardization of airplanes and parts.

HAVE YOU HEARD?

Fifty Nazi pilots knocked at the gates of Heaven and sought admittance. St. Peter waved them back.

"I'm sorry," he said, but only six of you can come in."

"But there are fifty of us," the Nazis protested.

"Maybe," replied St. Peter, "but Field Marshal Goering's communique said that only six had been shot down."

Waitress—"Why do you always dust off the plate before you are served?"

Diner—You will have to excuse me. I'm a baseball umpire.

When he returned from the office he found his little wife very unhappy, and at last she told him why.

"Oh, Bill, I've found out that that woman next door has a coat exactly like mine."

Bill smothered a sigh as he said:

"Well, darling, I expect you want me to buy you a new coat?"

"Yes, dear," she replied, sweetly; "it would be cheaper than moving, wouldn't it?"

Tommy: Why are you so bald, dad?

Dad: Well, the reason is that my mother used to pat me on the head so often for being a good boy.

Travelling on a bus route strange to her, the old lady was very anxious not to pass her desination. Suddenly she leaned forward and poked the conductor in the ribs with her umbrella.

"Is that the Bank of England, my good man?" she asked.

"No, ma'am," replied the conductor, coldly; "it's me!"

Actor: I insist on real food in the banqueting scene.

Director: Right, and you'll also get real poison in the death scene.

My Heart Is Like a Rainbow

My heart is like a singing bird
Whose nest is in a watered shoot;
My heart is like an apple-tree
Whose boughs are bent with thick-set fruit;
My heart is like a rainbow shell
That paddles in a halcyon sea;
My heart is gladder than all these,
Because my love is come to me.

Raise me a dais of silk and down;
Hang it with vair and purple dyes;
Carve it with doves and pomegranates,
And peacocks with a hundred eyes;
Work it in gold and silver grapes,
In leaves and silver fleur-de-lys;
Because the birthday of my life
Is come, my love is come to me.

—Christina Rosetti.

Stop Scratching Relieve Itch Fast or Money Back

For quick relief from itching of eczema, pimples, athlete's foot, scales, scabies, rashes and other externally caused skin troubles, use fast-acting, cooling, antiseptic, liquid D. D. D. Prescription. Greaseless, stainless. Soothes irritation and quickly stops intense itching. 35c trial bottle proves it, or money back. Ask your druggist today for D. D. D. PRESCRIPTION.

Trend Of Travel To Pacific Coast

Since Residents of Central And Eastern Canada Can't Go South, They Go West

Many hundreds of residents of Eastern and Central Canada who annually head south when the cold weather sets in, will have to seek a winter resort at home because of the restrictions on travel to the United States necessitated by war conditions. In view of these circumstances, reports received by the Canadian National Railways indicate that the trend of travel this winter is now westward to the Pacific slope of British Columbia via the Jasper National Park route.

This Pacific Coast region has been rightfully named the "Evergreen Playground" and visitors to Vancouver and Victoria soon learn of the mellowing influence of warm ocean currents which serve to maintain pleasant temperatures throughout the Winter months. For the energetic, golf is available on links playable the year round, while for anglers, steelhead trout and tyee salmon abound in the inland and coastal waters of British Columbia .

The Continental Limited train of the Canadian National Railways assures air-conditioned comfort via "the Jasper Park Way", providing daily services from the East, through the Rockies to Vancouver, at low winter fares.

March Is Next Season For Colds

There Are Two Peak-Periods For Common Cold Epidemics —March and September Every Year

March is the next common-cold period, says a study from Cornell Medical Centre-New York Hospital.

Each year there are two peak periods, the other in September. As a result, most people have two colds a year, a fall cold and a spring cold.

Drafts, wet feet and sudden changes in temperature do not necessarily cause colds. Most — perhaps all of them — are caught from other people.

And they are most easily given to others before the first sufferer even knows he has a cold. The reason is that the cause of colds, a tiny, unseen organism known as filterable virus, disappears from the throat within three or four days.

Dog's Legacy

$500 has been left by a 76-years-old Englishwoman to secure the future of a three-years old Cairn.

What Science Is Doing

NEW CANCER THEORY

A possible new treatment for cancer in the advanced stages which may be superior to the X-ray was described last week by Dr. John H. Lawrence, University of California scientist distinguished for his work with the atom-smashing cyclotron.

Lawrence said he and associates had observed that uncharged particles of matter known as neutrons caused a regression in the malignant tumor without damage to overlying live tissue. In treating deep-seated cancer with X-ray, he poined out, there may be danger of injuring live-tissue.

* * *

PNEUMONIA GERMS

Of 500 persons from whom throat cultures were taken for the study of tuberculosis or other respiratory infections excepting pneumonia, 337, or 67 per cent, were found to harbor pneumonia germs, including the deadly type 3, without manifesting signs of the disease. Pneumonia strains found totalled 34, many persons having two or more kinds.

* * *

SPLITS SECONDS 1,000 WAYS

A timing device that splits seconds 1,000 ways and will measure from 1 to 200 of these units with error of less than 1 per cent has been developed by the research dviision of the Remington Arms Company. It is being used in studying the effect of velocity and flight time on the accuracy, trajectory, range and hitting power of bullets, but it has a wide variety of uses in other fields, such as telling how long it takes a fuse to blow out, a photo-flash lamp to light and and a telephone relay to operate. Electric eyes can be used to time the bullet entering and leaving a given length of its path.

HEALTH TOPICS

Care Is Urged For Tot's Teeth

Every second child, at the age of 2 years has dental decay. Many children's mouths are wrecked for life before the age of 5, unless routine dental care is instituted. This was the message given 200 members of the Toronto Academy of Dentisty in Osler-Hall in January by Dr. John C. Brauer, professor of child dentistry at Iowa State University.

"One must think of aesthetic values," said Dr. Brauer, "and remember that a good-looking girl of 17 or 18 without teeth would not have a very good time at a ball."

Says Diet Halts Decay

"Education in the main, today, has accepted the responsibility and duty of teaching dental health," said the speaker. "Health is our most prized possession for without it few can succeed or achieve happiness."

Dr. Brauer outlined a daily diet which in many cases had halted tooth decay, as follows: One quart milk, one to two eggs, one serving of meat, fish or chicken, two vegetables (half cup each), two fruits (orange, apple or tomato), one teaspoon of cod liver oil, about six teaspoons butter.

Original Cinderella

Few people know that the Third Pyramid of Gizeh, in Egypt, was erected by King Mycerinus to commemorate Nitokris, a very beautiful maiden who was the original Cinderella. While bathing by the river, Nitokris lost her slipper. A great eagle swooped on it and carried it high over Memphis, where. finding it unpalatable, the bird released it. The slipper fell into the lap of the King as he sat eating a peach in his garden. He was so struck by the strange incident as well as by the beauty of the slipper and the shape of the foot that he immediately instigated a search for the owner. She was found, came up to expectations, and because his bride, and it was to commemorate her that the pyramid was built. The original slipper was made of fur, but the story came to us through France, and in translation "fur" was changed to "glass."

Modern Etiquette

BY ROBERTA LEE

7. How should the flower girls at a church wedding be dressed?

8. When a man is dancing and another man "cuts in," how long can he wait before he "cuts in" to get his girl again?

9. Is it all right for one to put a few oyster crackers in soup?

10. When walking with a friend and there is a chance meeting with another friend, is it necessary to introduce them?

11. Is it all right to accept a second helping at the table?

12. Is it all right for a woman to invite men to a theatre party?

ANSWERS

7. They may be dressed in white or any color that blends with the color scheme of the wedding. If the bridesmaids wear hats, flower girls usually do also. 8. He must wait until the man who "cut in" on him is no longer dancing with this girl. 9. Yes. 10. No. Introductions in public should be avoided whenever possible; if the circumstances make it awkward without an introduction, then one must be made. 11. It is permissible if it doesn't keep the other guests waiting. 12. Yes.

Yip-ee, it's Ogden's!

Yes, it's not just another tobacco — it's Ogden's! And old timers, who have been rolling-their-own for a quarter of a century, know that "Ogden's" means a distinctive blend of choicer, riper tobaccos. Try it once. Then you'll always roll 'em with Ogden's.

Only the best cigarette papers—"Vogue" or "Chantecler" are good enough for Ogden's

Railway Solomon Solved Problem

It definitely required the services of a transportation Solomon to solve the problem raised by two passengers who on the same day and on the same train operating over the Canadian National Railways, forgot overcoats. When the descriptions were compared it was discovered that each traveller was seeking an overcoat from the same manufacturer identical in size, color and style. The Lost and Found experts succeeded in returning to each owner his own coat.

Canadian National Railways Revenues

The gross revenues of the all-inclusive Canadian National Railways system for the week ending January 14, 1941, were $4,795,-037 as compared with $3,741,181 for the corresponding period of 1940 an increase of $1,053,856 or 28.2%.
