Aid For The Beaten Foe

Two British soldiers help a wounded Bismarck survivor across the gangplank on arrival at a British port. German sailor was one of about 100 saved by British after Royal Navy, avenging sinking of H.M.S. Hood, quickly ended Bismarck's brief career.

Modern Etiquette

BY ROBERTA LEE

1. When a man and a woman are standing in a crowded streetcar and a man offers his seat to the woman, should her escort also extend his thanks?

2. Where should a couple stop dancing when they wish to leave the floor during a dance?

3. Should a man, when starting to smoke, offer a cigar or cigarette to the other men in the party?

4. Is it permissible to contradict another person in conversation?

5. When a child has outgrown wearing of a bib, should he be allowed to eat with his napkin tucked under his chin?

6. Where, in the church, is the bridal procession formed?

Answers

1. Yes, both the woman and the man thank the person who offers the seat, and the man lifts his hat to him. 2. They should dance to the edge of the circle of dancers. They should not stop in the middle of the floor and try to walk between the dancers, where they are certain to be in the way. 3. Yes, or if the party is too large to do this, he should offer one to those nearest him. 4. No. If you can politely present an opposing viewpoint, it will create further conversation; but drop the subject if you find that the other person's feelings are becoming hurt. 5. No, he should be taught to use a napkin exactly as older persons do. 6. In the vestibule. This can be done very quickly if it has been properly rehearsed.

HAVE YOU HEARD?

This story won first prize in a competition run by an American periodical for stories of brevity and dramatic content:—

Elvina Parker received a telegram from her brother, who was accompanying her husband on a big-game expedition in Africa. The telegram read: "Bob killed lion hunting.—Fred."

Elvina, overcome with grief wired back: "Send him home.—Elvina."

Three weeks later a large packing-case arrived from Africa. Inside was a lion. Elvina sent a telegram: "Lion received. Must be mistake. Send Bob—Elvina."

Back from Africa came the reply:

"No mistake. Bob in lion.—Fred."

It is no wonder that nearly everyone becomes more irritable in hot weather, because for every degree increase in temperature, noise travels one foot faster each second.

A pilot officer was detailed to telephone an urgent message to the Air Ministry.

He was switched from one person to the next until finally he lost his temper with the seventh person to whom he had been put through.

"Do you know who I am?" said the man he blew up. "I am Air Marshal—"

Despite the voice of thunder, the pilot officer replied: "And do you know who I am?"

"No," said the air marshal.

"Thank Heaven for that," said the pilot officer, and hung up.

"I'm going to kiss you before I go," said the young man who had outstayed his welcome.

"Do it now while I'm still young," replied the girl wearily.

An elderly woman was visiting a ranch in Wyoming, and, on noticing a lasso coiled up on a cowboy's saddle, she inquired what it was used for.

"We use that for catching cattle and horses," came the reply.

"Indeed," retorted the woman, "and what do you use for bait?"

Boy: "Mother this book says that in the ocean the big fish eat up the little sardines. Is that true?"

Mother: "Yes, I believe it is."

Boy: "How do they open the tins?"

How Can I?

BY ANNE ASHLEY

Q. How can I prevent paint from dripping over my hand when painting a ceiling or any overhead work?

A. Cut a large rubber ball in half and push it up the handle of the paint brush as close as possible; the cup will catch all drippings.

Q. How can I heat rolls satisfactorily?

A. A most satisfactory method of heating rolls so that they will taste the same as when freshly baked, is to sprinkle them with water, place in a covered pan, and heat in a moderate oven from five to ten minutes.

Q. How can I increase the gloss of my hair?

A. The beaten white of an egg added to the regular shampoo water greatly increases the gloss of the hair.

Q. How can I prevent painted surfaces from blistering?

A. Excess moisture in wood, which is drawn to the surface by heat, either from the sun's rays or other sources, causes paint to blister. Always be sure, before starting to paint, that the wood is thoroughly dry.

v. How can I destroy water bugs around my kitchen sink?

A. Pour a pint of kerosene down the sink drain once a week. Always allow about an hour to pass before letting the water run. The bugs will soon disappear.

Job Insurance Stamps On Sale Late This Month

13,000 Post Offices Handle Distribution of Sheets Throughout Canada

Sale of stamps to be used in the establishment of the unemployment insurance fund will be made through 13,000 post offices throughout Canada, it was announced at the Insurance Commission's office in Ottawa. It is expected that these stamps, which will be placed by employers in employees stamp books, will be available for purchase a few days before the start of the operation of the law on July 1. They will be sold in sheets.

SOLD IN SHEETS

There will be no distinction on these stamps between the employee deductions and the payments made by employers for the reason that the commission is not concerned whether the employer makes the total payment or divides the contribution between himself and his workmen on the strict letter of the law. Officials of the commission state that some employers will pay the entire shot, as is done in Britain, but of course they do not make any recommendation that this be done.

NO OTHER TIRE LIKE IT!

Firestone CHAMPION

FROM the innermost fibre to the sensational new Gear Grip Tread, everything in this smart, streamlined Firestone Champion tire is new and different. It sets up entirely new standards of safety and long mileage because it is the result of Firestone's quarter-century of experience in building tires for race track speeds.

Here are some of the things you get in Firestone Champion tires—new Safety-Lock cords treated with a new and advanced Gum-Dipping process; 27% stronger bond between tread and body; 35% greater heat protection against blowouts; an amazing new tread with thousands of sharp-edged angles for quick stops—a tread that gives 11% more non-skid mileage.

Not only is the Firestone Champion an engineering triumph but it is super-value as well—for, with all its extra value, *it does not cost one cent more than ordinary tires.* Have your nearby Firestone Dealer put them on today.

LOWER PRICED FIRESTONE TIRES

In addition to the sensational new Champion tire, Firestone Dealers have three other lower priced tires—

HIGH SPEED, STANDARD, SENTINEL

No matter what price you want to pay for a tire, go to the nearest Firestone Dealer and see the bargains he has to save you money.

SAFETY-PROVED ON THE SPEEDWAY FOR YOUR PROTECTION ON THE HIGHWAY

"Shooting" At Jasper Big Scale Affair

There will be considerable "shooting" at Jasper National Park, Alta., this season. While some of it may be "explosive" none of it will require firearms. The first "shooting" will begin in mid-June when Canadian and United States camera enthusiasts will gather under direction of Ivan Dmitri, color camera expert, with an opportunity of widening their picture skill. The second "shooting" season will begin August 31 with the opening of the 16th annual Totem Pole Golf Tournament for which already 150 entries have been received.

What Science Is Doing

HALF BRAIN GONE, LIVES

It is possible to live with only half a brain and still not be half-witted.

At the American Medical Association convention this month two Cleveland Clinic physicians, Dr. Louis J. Karnosh and Dr. W. James Gardner reported the cases of three persons who lived more than two years with the entire right halves of their brains removed.

The two halves of the brain are not identical in their function and seem to act as two drivers of a twelve-horse team which co-operate with each other in keeping all movements co-ordinated.

—o—

NUTRITION AND MOTHERHOOD

Proper nutrition eliminates the danger of miscarriages and stillbirths, among other beneficial results, according to tests made at Toronto's prenatal clinic over a period of several years, it was disclosed at the recent Ontario Medical Association convention.

The diet additions for prospective mothers in the test provided included oranges, eggs, milk, tomatoes, cheese and wheat germ. One of the outstanding results of the experiment was that among the mothers receiving this supplementary diet, there were no stillbirths or miscarriages.

Other beneficial results included: fewer complications during pregnancy, reduction in the prevalence of anaemia among expectant mothers, shorter duration of labor, increased ability on the part of mothers to nurse their own children; reduction in illnesses among the babies.

Will Demonstrate Canadian Dishes

How to use up Canada's unexportable surplus will be the theme of the free cooking school held twice daily in the Electrical Building at the Canadian National Exhibition this year. Typical Canadian dishes will be demonstrated, featuring apples and other fruits, vegetables, flour, eggs and milk.

The women in the class have requested the privilege of collecting among themselves money for a mobile canteen to be known as the C. N. E. Mobile Canteen. As the auditorium seats 1200 and is always filled to capacity this worthy goal should easily be achieved. As in other years, a birthday cake will be presented to the oldest lady present at each day's cooking class.

Canadian Public School children will be thrilled to see in their war work display, socks, sweater and helmet knit by Princess Elizabeth and Princess Margaret Rose for their soldiers. The work done by Canadian school children for their British cousins overseas makes an imposing display in the Women's Building.

Building permits issued by 204 municipalities in Canada during 1940 had a total value of $113,005,208. New construction accounted for $85,613,697, and the remaining amount was spent for additions, alterations and repairs.

DON'T LET'M ROT

"Osmose Special Fence Post Mixture" — deeply penetrating — protects the vital groundline — prolongs life of posts four to five times — just paint 4" above and 6" below the groundline — a highly concentrated, effective material used in large quantities by the Power Companies.

Quart ..... $1.20 treats 20-25 posts
Gallon ..... $4.15 treats 80-100 posts
