CREAM

If you were to comply with the wishes of our government, which we are obliged to do, especially during war-time, you would produce more cream, because dairy products are very essential to help feed the British.

You would sell your cream to your nearest creamery, thereby eliminating waste of fuel and labor, which are so important at the present time. Hence by eliminating waste, you would help maintain a higher price for your own product.

Deliver your cream whenever possible and take advantage of the exta cent, or have our truck call and you will be satisfied with our efficient service.

MEAT STORAGE

Many patrons have taken advantage of our meat storage service. All are satisfied. It means a great saving and convenience.

With the possibility of meat prices rising, many patrons are storing their meats now, thus guarding themselves against higher prices. We urge you to take advantage while there is still available storage space.
