FLESHERTON TEAM WINS HOLLAND LEAGUE TROPHY

On Thursday evening of last week, the Flesherton locals won from Holland Centre 10-6, taking the series in two straight wins for the Holland League Trophy.

Ken Betts was the star of the game by getting 4 hits at four times to bat, one being a homer. The locals have a real team this year and should go far in the Ontario play-offs for the Premier Hepburn Trophy.

Osprey Prize Lists

The prize lists of the Osprey Fall Fair were delivered to the secretary, Mr. Geo. W. Ross, Maxwell, on Saturday. The Fair is being held on September 30th and October 1st, the last date being the main day. If you are not a member of the Society and not in the habit of showing, get one of the prize lists at once and look it over and see what you can show. It will assist the Society and will give you a great deal more interest in the show. A number of special prizes have been donated by various citizens and business places, and many of them are for those residing within a radius of eight miles of Feversham, thus giving the local resident a break over outside competition. Write to Secretary Ross now and ask for a copy of the prize list.

A lark is something that if you go out on you can't get up with.

To the glad to-morrow, when we meet above.

Hugh Templin, editor of the Fergus News-Record, and whose articles on the British Commonwealth Air Training Plan are appearing in The Advance has been chosen as one of a party of ten Canadian newspapermen to go to Great Britain as guests of the British Council in London.

The invtation was extended by Sir Malcom Robertson, president of the British Council. It is planned to let the Canadian journalists see first hand the preparations for the Battle of Britain. The group will spend three weeks in Great Britain and will cross the Atlantic by plane.

Details of the trip have not been made public yet, but it is said that the Fergus editor has been chosen as the representative of the Canadian Weekly Newspapers. The invitation was extended through W. Rupert Davies of Kingston, President and chairman of the Canadian Section of the Empire Press Union.

No better selection could have been made to represent the weekly editors on this important mission than Mr. Templin. His observations will be looked forward to with considerable anticipation.

MANY IMPROVEMTS ARE MADE IN FLESHERTON CHURCH

The congregation of the Flesherton Baptist Church have made many splendid improvements in their church in the past few weeks. They have had the roof shingled, the inside painted and a new lighting system installed. Many of the old trees and bushes from around the side and front of the building have been removed and the ground leveled up ready for planting grass. A new sidewalk has been put along the side of the church and a new door opened on the left side. They also have had a new pulpit made. We wish to compliment the members on their fine work.

GUELPH WINS FIRST SOFTBALL GAME

Guelph won the first game from Flesherton 4-1 on Monday, in the first round of the Ontario play-offs. The game was played at Eden Mills before a crowd of 300 enthusiastic fans.

The locals were short handed, with five of the regular players away at Military Camp, Niagara-on-the Lake, but made a real showing nevertheless, with Genoe pitching sensational ball.

The return game will be played in Flesherton on Saturday, August 23 at 3 o'clock, when the score will be reversed (we hope). The boys at Niagara are coming back for the game. Come out and help support our team. Admission: 15c.

Why Streams Dry Up

King township has a lesson for the nation. It is a horrible example of what follows in the wake of forest removal. Not that it is worse than a lot of other townships. It isn't. It just happened to be the township that was selected by forest conservationists for a survey. The results of the survey were sketched to the recent meeting of the Canadian Society of Technical Agriculturalists at the Ontario Agricultural College by Prof. A. F. Coventry of Toronto. The headliner was that this York County township had eight times as many running streams 100 years ago as today. Over 60 per cent of all the streams still running dry up for a part of the year, and in the most highly developed section agriculturally there is not now one permanent stream.

The essential relationship between bush land and water conservation was illustrated by the speaker in one telling instance. A local grist mill was serving its community with the water power of a small stream. The cutting of five acres of bush from the water shed of that stream so decreased the flow that the mill had to close for lack of water.

With the removal of the forests beyond the safety limit, there goes also a terrific national loss through soil erosion. Prof. Coventry here did not limit himself to King township. He had slides form photographs taken all over Ontario to show that this loss is general and occurs in all types of soils. And the remedy? The conservation of farm bush lots still remaining, private planting of trees on parts of the farm not well suited to tillage, and extensive reforestration of non-arable land by municipal, county and provincial authority.
