Some Kick

McTavish was in a pub when the sirens went, and the customers went outside, leaving their drinks.

McTavish walked calmly round the bar, finishing them off.

He was just tossing down the fifteenth or so when a German bomb crashed nearby. The explosion blew him flat on his back.

"Oh boy!" he cried. "That last drink certainly had a kick in it!"

Clear telephone lines for ALL-OUT PRODUCTION

Your telephone is part of a vast *interlocking* system now carrying an abnormal wartime load. Don't let needless delays hold up messages on which production efficiency may depend.

OTHER "WARTIME TELEPHONE TACTICS"

1. SPEAK distinctly, directly into the mouthpiece.
2. ANSWER promptly when the bell rings.
3. BE BRIEF. Clear your line for the next call.
4. USE OFF-PEAK hours for your Long Distance Calls.

These things may look trifling, but on 6,500,000 daily telephone calls, they are very important.

FARMERS' INCOME WAS HIGHER IN 1941

Farmers' cash income from the sale of farm products in 1941 was 18.5 per cent greater than in 1940, and the highest for any year since 1929, states the latest issue of tre Current Review of Agricultural Conditions in Canada. Increased production and better prices for live stock and animal products have brought income from these cources to the highest levels on record. Although the income from field crops was the highest for any year since 1929, with the exception of 1939, the wheat situation continues to depress farm income in the Prairie Provinces below the average level from 1926 to 1929. In 1941 the income of Western farmers was supplemented by the Dominion Government under the Wheat Acreage Reduction Policy, Prairie Farm Assistance Act, and in the form of special Prairie farm income payments.

WHERE ARE THE NEW CARBURETORS?

For years there have been press reports and rumors abou the development of new-type gasoline carburetors, the use of which would greetly reduce the average automobile's consumption of gasoline. Very few, if any, of these have ever reached the open market, because in per-war years, with an abundance of gasoline on the market, it was apparently deemed unwise, but now however, when gasoline is a rationed commodity, it seems only fair to the nation that these improvements should be placed on the open market. As a conservation measure the government would welcome the introduction of any device that would reduce consumption and thus conserve supply, while motoring public would welcome it with a warmth second only to the welcome they would give right now for a device to indefinitely prolong the life of their tires.

ANNOUNCEMENT

Cream

Spring is here and a new cream season also. Because of the serious world conditions now existing, may we point out to you the following two important factors:-

1. By delivering your cream to the creamery, besides obtaining obtaining the differential in prces, you are also saving in tires and gasoline, which is used, by the unnecessary duplication of trucks on the road.
2. Cream cans are scarce. No more can be bought. We urge you to bring in any surplus cans you have on the farm, so they can be put to use.

SEE US ABOUT LOCKERS. THE SAVING IS WORTHWHILE.

THE CREAMERY WILL BE OPEN EACH SATURDAY NIGHT
