WHITE'S
Patented Insulated Metallic Soles,
BEING an improvement in the manufacture of BOOTS and SHOES, which will prevent damp or heat from penetrating to the feet or the Electricity of the body to the earth. These Boots and Shoes preserve their original form, prevent corns, chilblains and otherwise sore feet, and are much easier to the wearer and much more durable than any others.
PATENTED 14th MARCH, 1860,
BY
GEO. WILLIAM WHITE,
MONTREAL.
Among the giant strides that have been made in Arts and Manufactures during the past century, no branch has, strange to say, been perhaps more neglected or overlooked than that of the Manufacture of this article, yet in no manner can the public comfort, health and economy, be more surely obtained than by due attention to a proper covering for the feet. The question arises: Is leather more impenetrable to damp, or are Boots and Shoes more durable than they were a century past? Facts are stubborn things, and one elicited will in answer to this enquiry reply, No. No improvement has been made except in obtaining a fine exterior, and this leads to the conclusion that leather cannot be made impervious to damp or more durable than it has been, and not as a whole good for the Manufacture of Boots and Shoes; again, as is admitted, the human body contains a surplus of positive electricity which the general negative state of the earth tends unduly to diminish, hence the propriety of wearing some insulating substance between the feet and the ground, thereby further avoiding the disagreeable, and in this country, most dangerous and unhealthy effects of damp feet.
Self-preservation being one of the first laws of nature, let the Shoe wearers save their money and their health. Wear White's Patent Boots and Shoes, which will diminish Shoemaker's bills and prevent Doctor's bills. It is the great improvement of the age. Specimens can be seen at the Ottawa House, Kingston. Orders will be promptly supplied.
The invention adds little to the expense of Manufacture—while its advantages are so great as must at once command universal adoption.
