Grey County Farm Forum Notes

(Edited by Elwood Lemon)

Attendance on farm forum night of December 10th, Monday evening fell off slightly with only ninety forums reporting attendance of 1694. Forums which have been meeting regularly erported that many of their members were in Christmas concerts and were unable to attend. Then again, Christmas concerts began on that evening in some parts of the County. When 1694 people, scattered all over the County of Grey, walk, ride by sleigh, cutter or car to forums in their community, there must be a reason for it. Is it just the fellowship? Why doesn't your community start a forum?

Discussions were held on Health and centered on Dominion Government Health Insurance in all its aspects. Some forums did not know exactly what Health Insurance meant, some thought it was like an insurance (life or fire) policy that the government was going to start selling, and others thought it something the government was giving out free (another type of insurance policy).

The first question on whether government handout was a bad thing or not brought forth such answers as: Health Insurance not a handout but a public service for which everyone pays equally through taxes; must be administered locally but controlled centrally for the whole country if we are to insure against contagious diseases.

Disucssion on the second question was fumbled by most forums because of misinterpreting of the question which was not very clear. Health schemes which are now in force were described and the service rendered by them is too limited. Dental clinics, school nurses, accident plans, Blue Cross Plan, and health schemes are good but not good enough. They operate in communities but have no connection provincially (except Blue Cross) By having Provincial connections you provide better service, prevent spread of germs, infection, epidemics, and ease the financial burden.

Nearly 75 per cent believe it would be more advantageous to the doctors to serve in the Health Scheme. People would be healthier and feel more secure because of yearly check-ups, they wouldn't wait until it was too late, and there would be no fee troubles.

Most forums agree that the administration of the Health Scheme should be done locally but government financed. Some groups are impatient that nothing has been done before this and others feel that innoculations, check-ups should be compulsory.

Doings in the Forums

"Holford", Holland Centre, Mr. T. S. Cooper spoke on Federation of Agriculture and cost of Hydro. "Good Neighbor" forum of Dundalk will now be known "Hi-Land" Forum. "Allan Park" forum played bingo during their recreation period. "Rockview" forum is sending Mr. Gerald Cavell to the Short Course at London. Most forums send in collections, some promised them for the following week, what about yours?

The Weekly Paper

Just as politicians seek the support of small-town and rural sentiment, it is suggested that business, particularly Big Business so-called, should endeavor to win the understanding of the people who live outside the larger cities. Business largely has neglected an influential portion of the population where the politicians have been busy for generations.

If one were to inquire as to how best to reach the rural people with their messages, the answer must be that the country weekly papers are publications which are closely read by their subscribers, their subscribers' families and their subscribers' neighbors. One would not suggest that metropolitan opinion be neglected by the omitting the messages from the daily papers, but it is believed that the work is not being even half done if only the metropolitan papers are used.

Economic and other conditions which have lead to the demise of the party organ and the reduction in the number of daily papers, likewise have brought about the death of a hundred or two of the rural weeklies of a geneartion ago. But the 700-odd weeklies which are left have survived because there is room for them, and two or three hundred of these are serving their communities superlatively well. An institutional advertising campaign which overlooks these papers is a campaign which is incomplete. Therefore it is likely to be ineffective in part. — Printed Word.

MODERNIZE
THE FARM HOME

● We make Farm Improvement Loans at 5 per cent per annum for a variety of purposes, including not only the purchase of implements and equipment, but also additions and repairs to buildings, painting and interior decoration of farm dwellings, and the installation of heating and plumbing systems.

These loans may also be obtained for the purchase of household and dairy appliances of particular interest to the farm housewife, such as:

Washing machines	Refrigerators
Water heaters	Cream separators
Stoves	Churns
