WHITE'S
Patented Insulated Metallic Soles,
BEING an improvement in the manufacture of BOOTS and SHOES, which will prevent damp or heat from penetrating to the feet or the Electricity of the body to the earth. These Boots and Shoes preserve their original form, prevent corns, chilblains and otherwise sore feet, and are much easier to the wearer and much more durable than any others.
PATENTED 14th MARCH, 1860,
BY
GEO. WILLIAM WHITE,
MONTREAL.
Among the giant strides that have been made in Arts and Manufactures during the past century, no branch has, strange to say, been perhaps more neglected or overlooked than that of the Manufacture of this article, yet in no manner can the public comfort, health and economy, be more surely obtained than by due attention to a proper covering for the feet. The question arises: Is leather more impenetrable to damp, or are Boots and Shoes more durable than they were a century past? Facts are stubborn things, and one elicited will in answer to this enquiry reply, No. No improvement has been made except in obtaining a fine exterior, and this leads to the conclusion that leather cannot be made impervious to damp or more durable than it has been, and not as a whole good for the Manufacture of Boots and Shoes; again, as is admitted, the human body contains a surplus of positive electricity which the general negative state of the earth tends unduly to diminish, hence the propriety of wearing some insulating substance between the feet and the ground, thereby further avoiding the disagreeable, and in this country, most dangerous and unhealthy effects of damp feet.
Self-preservation being one of the first laws of nature, let the Shoe wearers save their money and their health. Wear White's Patent Boots and Shoes, which will diminish Shoemaker's bills and prevent Doctor's bills. It is the great improvement of the age. Specimens can be seen at the Ottawa House, Kingston. Orders will be promptly supplied.
The invention adds little to the expense of Manufacture—while its advantages are so great as must at once command universal adoption.

This Branch was only opened last January, and now has an income of
$75,000!
Which is retained in this country.
The increase of business in England is unprecedented, as shown by the Parliamentary returns, and the following taken from the last September Report:
'It will thus be seen that the total amount of business done during the last nine months of the Company's operations has been TWENTY TWO THOUSAND NINE HUNDRED AND ONE NEW POLICIES, producing an additional annual income of
$150,060
Representing Property Insured to the extent of
THIRTY MILLION DOLLARS!
The Report further says, that 'the Directors congratulate the Shareholders on this satisfactory increase in the business of the Company, and they have every reason to believe that from the connection now formed it will continue to increase in the same ratio.
The Capital of the Company is devoted entirely to Fire Liabilities, having no reserve for a Life Branch.
All losses in Canada are submitted to the gentlemen composing the Board who examine the particulars, and if found satisfactory at once order the payment of the claim. This system has called forth numerous cards of thanks.
If differences should arise between claimants and the Company, the Manager is fully empowered to accept service of any process in law.

RENOVATING AND PURIFYING THE BLOOD
which science has ever offered to man. In this resides its PECULIAR EXCELLENCE, and to this is due its WORLD-WIDE RENOWN.
It contains all the vegetable principles which experience has proved useful in CLEARING THE SYSTEM from DISEASE, extracted and combined with the highest skill which the refinements of modern chemistry enable us to employ.
Whatever may be said by morbified competitors or splenetic physicians, the fact that this medicine is EVERYWHERE USED, and that its use creates an increased demand, shows conclusively that it possesses medicinal merits of the first order.
