To Help Farmers Secure Hydro Service In Grey

The Grey County Agricultural Committee will make several recommendations to the Ontario Minister of Agriculture following their meeting recently in Owen Sound. It was pointed out that although Grey County has one of the most profitable Hydro systems in the province, less than 12½ per cent of the farmers have hydro service, the proportion being lower than any other county in Ontario. As a result of this, the Committee will recommend that authority be granted to establish a body to work toward securing more hydro in the rural districts. Recommendations for "weed control," the improvement of hog, cattle and sheep breeding, and the labor shortage problem will be other matters brought up for their consideration.

Getting Around It?

(Alliston Herald)

The press has received from the Department of the Attorney General for Ontario a memorandum that sets out in brief some details of the criminal code as related to lotteries, bings and raffles. The memorandum states that games of chance for prizes such as bungalos, automobiles, free trips, etc., are contrary to the code and no person can give permission to conduct a lottery for such prizes. Raffles may be held for prizes of small value at any bazaar held for charitable or religious object, if permission from the authorities is obtained. The articles to be raffled must first be offered for sale and must not exceed $50 in value. Charitable or religious organizations may operate bingos occasionally only, not on set dates advertised regularly, such as "Bingo Every Tuesday." No permission is required, but the organization holds a bingo on its own responsibility. The above means that the bingo games operated by the Canadian Legion in Alliston are permissable, but cannot be advertised in the paper. If The Herald should make reference to a public entertainment being held at the Legion Club house, friends of the veterans will have to construe what the announcement means, as we cannot say the boys are holding a bingo. But there is nothing to prevent the veterans holding a bingo night occasionally and friends of the branch can safely attend and take part in the games. Watch for other forms of announcement.

MENTIONED IN DESPATCHES

According to a letter received this week from Ottawa, Marjor 'Ark' Dunlop has been "Mentioned in Despatches" for gallantry during the fighting in Holland. The recognition which Ark explained in really intended for "C" Company, of which he was Commanding Officer, was for their outstanding service in Holland one year ago to-day (Wednesday) when his Company held their bridgehead at Delden, near Hengelo. Major Dunlop was earlier awarded the Croix de Guerre with gold star for personal bravery during the closing of the Falaise gap.—Markdale Standard.

IS IT "ADEQUATE" HARRY?

● Adequate capacity to carry any probable load is of first importance whether you are building a bridge or wiring your farm. It might appear that enough wiring to give you lights and a minimum of motor equipment would do for a start. Beware of falling into that mistake. It will only cause you needless expense and inconvenience later on.

Electricity should be a worker as well as a convenience on the farm. You will gradually discover many ways in which you can save time and money by using more electricity. When and if you decide to have an electric stove in the kitchen, a water heater in your home or dairy, or an extra motor some place or another, have the necessary wiring all done and ready right from the start. The most economical time to wire adequately is the first time you wire.

Ask any reliable electrical contractor or your Hydro rural superintendent for advice on adequate wiring. You will always be glad that you did it right the first time.

ASK YOUR HYDRO RURAL OFFICE FOR THE NEW FOLDER "HYDRO GOES TO WORK ON THE FARM"!
