FAITHFUL MINISTERS OF HEALTH.—In examing the vessels at the various wharves we find among the curiosities of our commerce the brig Miranda, just in from Truxillo with a cargo of Honduras Sarsuparilla for Dr. J. C. Ayer & Co., of Lowell. So particular are this firm as to the articles used in compounding their various remedies, that they have this drug, like some others they consume, gathered for them by a skillful agent of their own in the tropical regions of its growth. He informs us that there are many species of this plant, but two of which are really valuable in medicine; the qualities of these are also affected by the time of gathering, mode of curing, etc., operations which in that region of unreliable workmen imposes a heavy labor upon him. One of the inert varieties of Sarsaparilla grows wild in our own forests, while several others, nearly worthless, abound in Central and South America. The intelligent agent assured us that the virtues of this drug had never been fully told, and that the reason of the low esteem in which many hold it is mainly due to the importation of such immense quantities of the worthless varieties. His accounts of his trips to Honduras and his business excursions along the Gulf of Dulce and the rivers of Montagua and Santiago and among the adjacent mountains were of intense interest. We can but commend and honor his employers for the faithfulness and energy with which they execute their trust as ministers to the public health, and we suspect that this course is at least one of the reasons why their medicines are held in such extraordinary favor throughout the civilized world.—New York City News. 254
