A Message of Importance
to Cream Producers

Since Ceram is an exceptionally good price, it is worth-while to maintain the maximum production of your dairy herd. Nothing will cut produrtion more sharply than the producing cows being left out during the unexpected cold nights. It is, therefore, advisable to stable the milch cows at night from now on.

A Glenelg farmer was in this office yesterday to complain of certain parties of running dogs and hunting on his property, and on farms in the district. This practice is illegal and he asked us to put in a warning, charges will be laid. He stated further, this is the last warning, and that if the hunting continues he will immediatly institute proceedings, as he knows the names of all breaking the law against hunting and discharging firearms on Sunday.—Durham Chronicle.
