"SHE'S STILL TALKING!"

KEEPING CONVERSATIONS BRIEF is just one of the ways of practicing the master rule for the best telephone service..."Do unto others as you would like them to do to you—and do it first".

• • •

THIS YEAR ALONE we are spending $4,000,000 so that more farms may have telephones with fewer people on each line.

FOR BEST RESULTS FROM YOUR TELEPHONE:
1. Keep calls brief.
2. Space your calls.
3. Avoid "listening in".
4. Give right-of-way to emergency calls.

For the first time in many years, a basic improvement for more accurate seed drilling has been developed. It is the adjustable internal run feed of the new Dempster 13x7 in. Single Disc Grain Drill for the Ferguson System.

The new feed eliminates changing of sprockets or shifting of gear ratios when you want to change seeding rate. With it, you can adjust seeding rate to meter any size of seed, from clover or alfalfa to soybeans, with amazing accuracy and convenience. The new adjustable internal run feed provides easier change of seeding rate than with a fluted feed. It provides even greater greater accuracy than the double internal run feed.

"FERGUSON SYSTEM" Grain Drills can be delivered to you immediately, from stock—NO WAITING.
