How the Hard of Hearing Can Assist Themselves To Hearing

The many hard-of-hearing in this town will have an exceptional opportunity to find out how they may once again experience relaxed, noise-free hearing... A FREE HEARING CLINIC will be held at the Park Hotel, Flesherton, on Monday, May 10, from 2 p.m. to 8 p.m., by Mr. Dunbar, at which time he will test the hard-of-hearing for individual hearing deficiencies. The clinic will also serve to introduce a new Acousticon development in hearing aids. This newhearing aid, by the world's first and oldests manufacturer of electrical hearing aids, offers clarity of tone without the harsh back-ground noises usually encountered. This instrument, in spite of its power, is small, even with the batteries enclosed!

Letters have been pouring in from those who have already tried this new Acousticon saying how thrilled they were with this hearing aid. Many of them say that they never experienced such clarity of tone against such a velvet-quiet background. The manufacturers of this instrument say that one one can even imagine what it may do for them until they hear it with their own ears.

Those hard of hearing who have been searching for the answer to their personal hearing problems are urged to attend this FREE CLINIC. Complete Free information will be mailed if you cannot be there. Write to Mr. Dunbar at the Acousticon Institute, Owen Sound.

Putting it into practice on every call you make is your best guarantee that others will do the same for you.
