Keep Cream Cool

It appears as though margarine is here to stay. We have a good market for first grade butter, but there is no market for second grade butter. Therefore take good care of your cream, because second grade cream is to be returned to the farm. It would be wise to start and cool each separating by placing it in a pail of cold water immediately after separating.

EGGS

Bring your Eggs in with your cream, as we are paying top market prices for Eggs and Poultry.
