Several Homes Being Built In Flesherton

Considerable building is going on in the village and three houses are in various stages of completing. Walter Russell is completing a fine new residence on the south side of Durham street, on the corner, which will be a credit to the village. Reg. Boden has commenced erection of a dwelling on Toronto street, on the property recently purchased from Gordon Long. Laurie Russell is busy on his new home on Collingwood street, working in his spare time, Thos. Sled is finishing renovating his home moved to a lot on Peter street purchased from F. J. Thurston last spring. D. McTavish & Sons are making extensive alterations to their garage, installing large display windows in the front and changing the interior, which will greatly improve the appearance of the building.

Public And Experts Agree On Most Accident Causes

Unsafe driving habits are the greatest cause of traffic accidents say two-thirds of the people polled recently by the Department of Highways in a survey done to find out how much the average driver knows about avoiding accident hazards.

Public and expert opinions don't often agree too closely, but in this instance a group of auto insurance men, highway and municipal officials and driver examiners were polled on the same question: they give exactly the same answer as the cross-section of drivers. So the consensus appears to rate the "nut that holds the wheel" as the leading villain of traffic tragedies.

Which driving habit is considered least safe? The answer is "excessive speed," say both experts and the public. This opinion is proved correct by the statistical accident records of both the Ontario Department of Highways and the National Safety Council, which show "speed too fast for road or traffic conditions" as an accident factor more often than any other reported violation.

Compared with the two-thirds who say that "unsafe driving habits' contribute most to accidents, just one-quarter of those blame liquor. Less frequent hazards mentioned are pedestrian actions, weather and road conditions and mechanical condition of cars.

Both groups agree that Saturday and Sunday are the most likely days for accidents, and put Friday in third place. However, accident statistics show that Saturday, Friday and Sunday (in that order) are the worst days for accidents. And while both drivers and the expert group say that dusk is the time of day when most accidents happen, actually statistics show that more accidents occur in broad daylight than at any other time.

Mushrooms Plentiful Throughout District

This season has been perfect for the growth of meadow mushrooms and for the past week or so lovers of this delicacy have been feasting themselves to utmost. Many people do not know the difference between the edible mushroom and the poisoncus variety, so leave them strictly alone, as they are afraid of making a mistake. The heavy rain Saturday night and Sunday brought the mushrooms out in myriads, some of them being seven inches in diameter. Puffballs are also in season and are quite plentiful.
