Is it the zoot suist that cause so much touble, or the material that goes into them?

To be sure of obtaining their fertilizer, farmers should take early deliveries, as it is next to impossible for the industry to deliver nearly three-quarters of a million tons in the few weeks of early spring.

Fewer Jobs This Winter

It now looks as if Canada is likely to have a reduced working force this winter, warns The Financial Post. As conditions retreat from the abnormal of war and postwar, there will be some reduction in various industries. The pattern of that may well reach 100,000. Overall, however, and barring a major breakdown in the U.S. because of strike trouble, the Canadian economy will still end the year with plus signs.

...well

practically **unanimous**

YOU CAN still find people who "don't believe in banks" . . . who keep their cash in old coffee pots, or hide it in the woodpile, or carry it around.

But most folk nowadays keep their money in bank accounts. They can get it whenever they want it; and they can pay their bills by cheque. Canadians have more than seven million such deposit accounts. In terms of Canada's adult population, that makes it practically unanimous.

The banks, in turn, know they must earn this confidence by giving you the best service they know how.

Today you can take your account to any bank you choose. And what is in your bank book is strictly between you and your bank. It is your own private business.
