Seventh Volume of the Scientific American.

MESSRS. MUNN & CO.,

American and Foreign Patent Agents, and Publishers of the Scientific American,

RESPECTFULLY announce to the public that the first number of Volume VII. of this widely circulated and valuable journal will come on the 20th September. The new volume will commence with new type, printed upon paper of a heavier texture than that used in the preceding volumes. It is the intention of the publishers to illustrate it more fully, by introducing representations of prominent subjects connected with the advancement of science; besides increasing the usual amount of engravings of the inventions it is published weekly in form for binding, and affords at the end of the year a splendid volume of nine hundred pages, with a copious index, and from five to six hundred engravings, together with a vast amount of practical information concerning the progress of invention and science throughout the world. There is no subject so interesting to the mechanic, inventor, manufacturer and general reader which is not treated in the most comprehensive manner; the editorial contributions and correspondence being more of the highest attainable kind, to render it the leading scientific journal of our country.
